PREFACE TO THE XLVITH ANNUAL VOLUME.

(1914.)

ADDITIONS to the general statistical tables and summaries, and the inclusion of articles on matters of current interest, have increased the size of the forty-sixth annual volume by 32 pages.

Among the additions will be found statistics dealing with Housing and Town Planning, Unemployment in the United Kingdom and the United States, Labour Exchanges, Increased Cost of Living, Decreased Purchasing Power of the Pound, and Registered Friendly Societies; while the sections devoted to Banks and Banking, Weights and Measures, and Mercantile Shipping have been extended, and articles have been inserted on Land Banks, Co-operation and Co-partnership, National Health Insurance Amendment Act, Aeronautics, Cable and Wireless Telegraphy, and the provisions of the Irish Home Rule Bill. The page of Hall Marks on Plate has also been restored in response to the requests of many collectors.

The Editor has received the assistance of correspondents in all quarters of the globe, and takes this opportunity of thanking them for the suggestions that have been made concerning existing or future articles. In order that such communications may be dealt with adequately it is in the highest degree desirable that they should reach the office not later than the *last day of October*.

12 WARWICK LANE, E.C.,
LONDON.
17th November, 1913.

DURATION OF LIGHT AND DARKNESS.

THE second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or of Sun or Moonlight. These small figures represent the twelve hours from 6 P.M. to 6 A.M., and have four divisions, each representing three hours. From the 7th to the 13th of Jan. 1914, there is moonlight from 6 P.M. till 6 A.M., but from the 21st to the 28th it will be seen that there is no moonlight. In the summer months the Sun comes to our aid.

THE DIAGRAMS USED ARE—

WHITAKER'S ALMANACK, 1914.

BEING THE SECOND AFTER BISSEXTILE OR LEAP YEAR, AND 4 AND 5 OF KING GEORGE V.

Common Notes for the Year 1914.

Owing to Jupiter's nearness to the Sun, the Satellites will not be visible in the month of January.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

January 1. Day breaks at 6h. 2m. morn., and Twilight ends at 6h. 4m. aft., the length of the Day being 7h. 50m.

Jan. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 10' 78".

Jan. 9. Saturn in conjunction with the Moon, 9h. 41m. morn. 12 6' 47' S.

Jan. 9. Occultation of B.A.C. 1648; magnitude 6.4. See p. 80.

Jan. 10. Occultation of B.A.C. 1746; magnitude 6.5. See p. 80.

Jan. 11. Mars in conjunction with the Moon, 1h. 49m. aft. 0° 34' S.

Jan. 12. Occultation of κ Geminorum; magnitude 3.6. See p. 80.

Jan. 12. Occultation of B.D. + 23° 19' 13; magnitude 6.4. See p. 80.

Jan. 15. Occultation of 45 Leonis; magnitude 5.8. See p. 80.

Jan. 15. Occultation of ρ Leonis; magnitude 3.8. See p. 80.

Jan. 16. Occultation of B.A.C. 4054; magnitude 6.4. See p. 80.

Jan. 20. Occultation of B.A.C. 4867; magnitude 6.4. See p. 80.

Jan. 20. Occultation of B.A.C. 4879; magnitude 6.1. See p. 80.

Jan. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 9' 48".

Jan. 22. Mercury and Jupiter in conjunction, 1h. 54m. aft. ♀ 1° 40' S.

Jan. 25. Venus and Jupiter in conjunction, 6h. 32m. aft. ♀ 0° 33' S.

Jan. 25. Jupiter in conjunction with the Moon, 8h. 43m. aft. ♀ 3° 22' N.

Jan. 25. Venus in conjunction with the Moon, 8h. 54m. aft. ♀ 2° 48' N.

Jan. 26. Mercury in conjunction with the Moon, 7h. 15m. morn. ♀ 1° 15' N.

Jan. 26. Uranus in conjunction with the Moon, 9h. 0m. morn. ♀ 2° 44' N.

Jan. 26. Mercury and Uranus in conjunction, 8h. 21m. aft. ♀ 1° 32' S.

Jan. 31. Venus and Uranus in conjunction, 3h. 36m. morn. ♀ 0° 30' S.

Jan. 31. Occultation of 62 Piscium; magnitude 6.1. See p. 80.

Jan. 31. Occultation of 8 Piscium; magnitude 4.6. See p. 80.

In this month the Mornings increase 25m., and the Afternoons 46m.

10	1 28	29 2	88	51	13
19	1 28	19 2	88	51	14
28	1 28	9 7	88	51	14

MORNING AND EVENING STARS.
☿ MERCURY is a morning star to the middle of the month, rising S.E.; an evening star at the end of the month, setting S.W. by W.
♀ VENUS is a morning star, rising S.E.; near the end of the month rises with the Sun.
♂ MARS rises early in the afternoon in the N.E.
♃ JUPITER is an evening star, setting S.W. by W.; after the middle of the month will be too near the Sun for observation.
♄ SATURN rises early in the afternoon N.E. by E.

In the early part of the month the constellations Camelopardalis, Lynx, Gemini, Monoceros, and Canis Major are on the meridian about midnight. In Gemini there is a fine compressed cluster of small stars, crowded together, nearly midway between γ and ζ Geminorum. It can be best observed on the nights immediately before and after the 25th. There is a very fine cluster in Canis Major, in R.A. 6h. 43m. and Decl. 20° 39' S., 4° South of Sirius. With a very small astronomical telescope the individual stars can be easily distinguished; and with a low-power eye-piece, on the larger instruments, the field appears full of stars of various magnitudes. Neptune and Juno can be well observed in this month. See p. 82.

MONTHLY NOTES.

Feb. 1. Copies of Registers of Voters to be sent to Secretary of State within three weeks.

12. Scottish general salmon-fishing begins.

15. Old Candlemas.

19. Notice of Election of Borough Auditors to be published. Nominations must be delivered by the 20th.

22. Washington's Birthday, General Holiday, U.S.A.

28. Hare-hunting ends.

RAIN FELL IN FEBRUARY, 1913, on 11 days; total fall, 0.80 inch; below the average, 1841-90, by 0.68 inch.

* The Meteorological observations throughout the Almanack are those recorded at the Royal Observatory, Greenwich. They include the highest and lowest readings of the *Thermometer*, with the average for 65 years; the mean of *Barometer* at a height of 159 feet above the mean level of the sea; the daily *Rainfall*, the daily *Sunshine* and the daily general direction and maximum force of the *Wind*.

Configurations of Jupiter's Satellites at 6h. 30m. A.M.

Owing to Jupiter's nearness to the Sun, the Satellites will not be visible till the 22nd.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

February 1. Day breaks at 5h. 52m. morn., and Twilight ends at 6h. 46m. aft., the length of the day being 9h. 4m.

Feb. 3. Occultation of ϵ Arietis; magnitude 4.6. See p. 80.

Feb. 4. Venus at greatest distance from the Sun, 7h. morn.

Feb. 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 7.6s.

Feb. 5. Saturn in conjunction with the Moon, 5h. 32m. aft. h 6° 50' 8.

Feb. 6. Occultation of B.A.C. 1348; magnitude 5.6. See p. 80.

Feb. 7. Mars in conjunction with the Moon, oh. 39m. aft. δ 1° 9' S.

Feb. 8. Neptune in conjunction with the Moon, 10h. 38m. aft. λ 4° 31' S.

Feb. 11. Occultation of Regulus; magnitude 1.3. See p. 80.

Feb. 12. Occultation of ζ Leonis; magnitude 6.1. See p. 80.

Feb. 12. Saturn stationary, 4h. morn.

Feb. 13. Mars stationary, 1h. morn.

Feb. 18. Occultation of τ Scorpii; magnitude 2.9. See p. 80.

Feb. 20. Mean time of Sun's semi-diameter passing the meridian, 1m. 6.0s.

Feb. 22. Jupiter in conjunction with the Moon, 3h. 30m. aft. λ 2° 56' N.

Feb. 22. Mercury at greatest elongation ($18^{\circ} 6'$) East, 6h. aft.

Feb. 22. Uranus in conjunction with the Moon, 6h. 41m. aft. λ 2° 39' N.

Feb. 24-25. An Annular Eclipse of the Sun, invisible at Greenwich. See p. 78.

Feb. 25. Venus in conjunction with the Moon, 8h. 1m. morn. γ 1° 1' S.

Feb. 26. Mercury in conjunction with the Moon, oh. om. aft. γ 1° 36' N.

Feb. 28. Mercury stationary, 8h. aft.

In this month the Mornings increase 51m., and the Afternoons 49m.

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames will probably cause a higher rise of the river, and the low-lying riverside districts to be flooded.

MORNING AND EVENING STARS.

☿ MERCURY is an evening star, setting at first W. S. W., afterwards W. by S., and at end of month nearly due W.

♀ VENUS rises very nearly with the Sun till quite the end of the month, when it becomes an evening star, setting W. by S.

♂ MARS souths between 8h. and 9h. in the evening; altitude about 65°, between ε and μ Geminorum.

♃ JUPITER is a morning star in Capricornus, rising S. E. by E.

♄ SATURN in Taurus a little N. E. of Aldebaran.

In the early part of this month the constellations Ursa Major, Lynx, Cancer, and a part of Hydra are on the meridian about midnight. In Cancer there is a very beautiful cluster of stars, preceding α Cancri about 8m. in R.A. and nearly same declination, consisting of some 200 stars from the 8th to 13th magnitudes. The fine group of stars in Cancer, called "Praesepe," can be best observed in this month on the nights immediately preceding and following the 24th. It does not

consist of a very great number of stars, but the components are, as compared with those of other clusters, of considerable magnitude. It is situated in R.A. 8h. 34m. and Decl. 20° 20' N., about 1° to the west of a line joining the stars δ and γ Cancri.

The triple star ζ in Cancer may be examined in this month: it will be found in R.A. 8h. 7m. 16s. and Decl. 17° 55' N. Neptune can be observed in this month. See p. 82.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

March 1. Day breaks at 4h. 55m. morn., and Twilight ends at 7h. 31m. aft., the length of the Day being 10h. 48m.

Mar. 2. Occultation of μ Arietis; magnitude 5.7. See p. 80.

Mar. 3-4. Occultations of 16 and 19 Tauri; magnitudes 5.4 and 4.3 respectively. See p. 80.

Mar. 4. Occultations of 20, 21, and 22 Tauri; magnitudes 4.1, 5.8, 6.5 respectively. See p. 80.

Mar. 4. Jupiter and Uranus in conjunction, 9h. 36m. morn. γ 0' 9" N.

Mar. 5. Saturn in conjunction with the Moon, 2h. 39m. morn. δ 6' 47" S.

Mar. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 5.08.

Mar. 5. Occultation of B.A.C. 1648; magnitude 6.4. See p. 80.

Mar. 7. Mars in conjunction with the Moon, 2h. 44m. morn. δ 1' 49" S.

Mar. 8. Occultation of κ Geminorum; magnitude 3.6. See p. 80.

Mar. 8. Neptune in conjunction with the Moon, 8h. 6m. morn. γ 4' 35" S.

Mar. 11. Occultations of 45 Leonis, magnitude 5.8; ρ Leonis, magnitude 3.8; 49 Leonis, magnitude 5.7. See p. 80.

Mar. 12. A Partial Eclipse of the Moon, partly visible at Greenwich. See p. 78.

Mar. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 4.38.

Mar. 21. Sun enters the sign Aries, 11h. 11m. morn.

Mar. 22. Uranus in conjunction with the Moon, 2h. 58m. morn. δ 2' 32" N.

Mar. 22. Jupiter in conjunction with the Moon, 8h. 39m. morn. γ 2' 26" N.

Mar. 24. Mercury in conjunction with the Moon, 4h. 16m. aft. γ 1' 8" N.

Mar. 27. Venus in conjunction with the Moon, 9h. 55m. aft. γ 4' 16" S.

In this month the Mornings increase 1h. 8m., and the Afternoons 51m.

1	1 27	40.2	88	51	9
10	1 27	34.5	88	51	7
19	1 27	30.5	88	51	5
28	1 27	27.0	88	51	2

MORNING AND EVENING STARS.

☿ MERCURY is a morning star, rising nearly due E. at first, afterwards E. by S.

♀ VENUS is an evening star, setting at first W. by S., afterwards W. by N.

♂ MARS souths in the evening; altitude about 64°. Near to ε Geminaurum on the 5th.

♃ JUPITER is a morning star, rising S.E. by E., in Capricornus.

♄ SATURN souths in the early evening; altitude about 59°. Nearly in same position as last month.

At midnight, in the beginning of March, the constellations Ursa Major, Leo, Crater, and Hydra are on the meridian. In Ursa Major is a large planetary Nebula, appearing as a mass of attenuated light, from 3½' to 4' in diameter; it lies 1½° S.E. of β Ursa Majoris.

Virgo comes to the meridian about midnight towards the end of this month. Between Virgo and Coma Berenices is a large Nebula, one of the

class known as "Spiral Nebulae," situated in R.A. 12h. 14m. and Decl. 15° 0' N. With a large telescope of 8 inches aperture it appears to be resolvable in the centre into two bright star-like points. This constellation is thickly strewn with nebulae, which may be best observed on the evenings immediately before and after the 26th of the month.

PHASES OF THE MOON.

☾ First Quarter	3d.	7h.	42m.	Afternoon.
○ Full Moon	10	1	28	Afternoon.
☾ Last Quarter	17	7	52	Morning.
● New Moon	25	11	22	Morning.

Perigee 10d. 10h. M. 221,900.

Apogee 23d. 6h. A. 252,600.

RAIN FELL IN APRIL, 1913,

on 20 days; total fall. 2.21 inches; above the average, 1841-90, by 0.55 inch.

MONTHLY NOTES.

April 1. Refreshment House Licences to be renewed. Clerks of the Peace and Town Clerks send registration precepts to Overseers before 15th inst.

5. Dividends on Consols, &c., due. Financial year, 1913-1914 for Imperial purposes ends to-day.

- Quarter Sessions to be held this week unless otherwise fixed.

9. Fire Insurances must be paid.

15. Parish Councils to hold their annual meeting on or within seven days of this date.

Mean Longitude of Moon's Ascending Node, April 1, 343° 36' 8".

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

April 1. Day breaks at 3h. 37m. morn., and Twilight ends at 8h. 31m. aft., the length of the Day being 12h. 51m.

Apr. 1. Saturn in conjunction with the Moon, oh. 30m. aft. 12 6' 37" S.

Apr. 4. Mars in conjunction with the Moon, 3h. 6m. morn. ♂ 2° 0' S.

Apr. 4. Neptune in conjunction with the Moon, 4h. 28m. aft. 11° 4' 30" S.

Apr. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 4' 48".

Apr. 7. Occultation of Regulus; magnitude 1.3. See p. 80.

Apr. 7. Mercury at greatest elongation (27° 46') West, 7h. morn.

Apr. 8. Occultation of 56 Leonis; magnitude 6.1. See p. 80.

Apr. 11. Occultation of 85 Virginis; magnitude 6.1. See p. 80.

Apr. 11. Occultation of B.A.C. 4814; magnitude 6.5. See p. 80.

Apr. 14. Occultation of B.A.C. 5603; magnitude 6.0. See p. 80.

Apr. 18. Uranus in conjunction with the Moon, 10h. 50m. morn. 11 2' 20" N.

Apr. 19. Jupiter in conjunction with the Moon, oh. 13m. morn. ♀ 1° 50' N.

Apr. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 5' 08".

Apr. 21. Mars and Neptune in conjunction, 10h. 24m. morn. ♂ 2° 34' N.

Apr. 23. Mercury in conjunction with the Moon, 2h. 33m. aft. ♀ 5° 30' S.

Apr. 27. Venus in conjunction with the Moon, 6h. 20m. morn. ♀ 4° 52' S.

Apr. 28. Saturn in conjunction with the Moon, 11h. 11m. aft. 12 6' 22" S.

Apr. 29. Occultation of B.A.C. 1848; magnitude 5.6. See p. 80.

Apr. 29. Occultation of 136 Tauri; magnitude 4.6. See p. 80.

Apr. 29. Occultation of B.A.C. 1918; magnitude 6.1. See p. 80.

In this month the Mornings increase 1h. 2m., and the Afternoons 48m.

19	1	27 27.3		88	50	55
28	1	27 30.6		88	50	52

MORNING AND EVENING STARS.

☿ MERCURY is a morning star, rising E. by S. at first, and later E. by N.

♀ VENUS is an evening star, setting at first W.N.W., and at end of month N.W. by W.

♂ MARS souths in the early evening; altitude about 62°. Near ♋ Gemini on the 11th.

♃ JUPITER is a morning star, rising E.S.E., a little W. of 8 Capricorni.

♄ SATURN is an evening star towards the end of the month, setting N.W. by W., not far from Aldebaran.

At the latter part of April the constellations Draco, Bootes, and Libra will be on the meridian about midnight. An irresolvable double Nebula in Canes Venatici, about 4° S.W. of η Ursæ Majoris, can be observed in this month. The Southern Nebula is surrounded by a faint ring of nebulous light, and was called by Herschel, in his Catalogue, "the Halo Nebula." That this is not a true incandescent Nebula is shown by the absence of bright lines in its spectrum. In R.A.

15h. 14m., Decl. 2° 28' N., is a very fine cluster of stars, condensed into great brilliancy towards the centre. Sir W. Herschel was able to distinguish over 200 stars in this group in the field of his 40-ft. reflector, but found the middle portion so condensed that the individual stars could not be separated. The stars range from the 12th to 15th mag. The evenings about the 24th are the best for observing these objects.

Mean Longitude of Moon's Ascending Node, May 1, 342° 0' 7".

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

May 1. Day breaks at 2h. 3m. morn., and Twilight ends at 9h. 51m. aft., the length of the Day being 14h. 44m.

May 1. Neptune in conjunction with the Moon, 11h. 24m. aft. 4° 17' S.

May 2. Mars in conjunction with the Moon, 8h. 43m. morn. ♂ 1° 37' S.

May 4. Occultation of 45 Leonis; magnitude 5.8. See p. 80.

May 5. Occultation of 49 Leonis; magnitude 5.7. See p. 80.

May 5. Mean time of Sun's semidiameter passing the meridian, 1m. 6' 18.

May 14. Occultation of B.A.C. 6666; magnitude 5.7. See p. 80.

May 15. Uranus in conjunction with the Moon, 7h. 4m. aft. ♀ 2° 3' N.

May 16. Jupiter in conjunction with the Moon, 1h. 50m. aft. ♀ 1° 13' N.

May 16. Venus and Saturn in conjunction, 2h. 7m. aft. ♀ 2° 10' N.

May 17. Occultation of Aquarii; magnitude 4.4. See p. 80.

May 20. Mean time of Sun's semidiameter passing the meridian, 1m. 7' 38.

May 26. Mercury in conjunction with the Moon, 1h. 7m. morn. ♀ 3° 28' S.

May 26. Saturn in conjunction with the Moon, 11h. 5m. morn. ♀ 6° 9' S.

May 27. Venus in conjunction with the Moon, 9h. 2m. morn. ♀ 3° 21' N.

May 27. Venus at least distance from the Sun, 4h. aft.

May 28. Occultation of B.A.C. 2506; magnitude 6.3. See p. 80.

May 28. Occultation of B.A.C. 2514; magnitude 6.0. See p. 80.

May 30. Occultation of Mars. See p. 80.

May 30. Mars in conjunction with the Moon, 5h. 16m. aft. ♂ 0° 42' S.

May 31. Occultation of Regulus; magnitude 1.3. See p. 80.

In this month the Mornings increase 44m., and the Afternoons 44m.

10	1	27 36'8	88	50 49
19	1	27 42'4	88	50 47
28	1	27 50'3	88	50 46

MORNING AND EVENING STARS.

☿ MERCURY is a morning star early in the month, rising E.N.E. ; an evening star at end of the month, setting N.W.

♀ VENUS is an evening star, setting N.W.

♂ MARS is an evening star near the end of the month, setting N.W. by W.

♃ JUPITER is a morning star, rising E.S.E.

♄ SATURN is an evening star, setting N.W. by W., 5° or 6° N.E. of Aldebaran.

Towards the end of May we shall find the constellations Draco, Hercules, Ophiuchus, and Scorpio on the meridian about midnight.

Hercules contains a very splendid cluster of stars situated in R.A. 16h. 38m. and Decl. 36° 41' N. This, like most of the star-clusters, is condensed in the centre, and may be easily resolved with moderate telescopic aid; and a few days about the 24th, when the Moon is absent, it

may, if the opportunity is taken of a very clear night, be seen with the naked eye plainly between the stars ζ and η Herculis, rather nearer to η. This cluster, discovered by Halley in 1714, is one of the most beautiful examples of these bodies to be seen in the heavens. With the great Refractor of the Lick Observatory the nebulous glow at the centre has been resolved into separate points.

Mean Longitude of Moon's Ascending Node, June 1, 340° 23' 8".

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

June 1. There is no real night in this month, but either daylight or twilight, the length of the Day being 16h. 14m.

June 4-5. Occultations of 83 and 85 Virginis; magnitudes 5.6 and 6.1 respectively. See p. 80.

June 5. Mean time of Sun's semidiameter passing the meridian, 1m. 8.4s.

June 5. Occultation of B.A.C. 4814; magnitude 6.5. See p. 80.

June 7. Occultation of B.A.C. 5603; magnitude 6.0. See p. 80.

June 10. Occultation of γ Sagittarii; magnitude 3.5. See p. 80.

June 13. Occultation of δ Capricorni; magnitude 3.0. See p. 80.

June 13. Jupiter in conjunction with the Moon, oh. 32m. morn. 11° 0' 44" N.

June 17. Venus and Neptune in conjunction, 2h. 1m. morn. ♀ 2° 14' N.

June 19. Mercury at greatest elongation (24° 55') East, 8h. morn.

June 20. Occultation of 47 Arietis; magnitude 5.8. See p. 80.

June 20. Mean time of Sun's semidiameter passing the meridian, 1m. 8.7s.

June 21. Occultations of 27 Tauri, magnitude 3.7; and 28 Tauri, magnitude 5.2. See p. 80.

June 22. Sun enters the sign Cancer, 6h. 55m. morn.

June 23. Saturn in conjunction with the Moon, oh. 24m. morn. 12° 6' 1" S.

June 25. Mercury in conjunction with the Moon, 1h. 10m. aft. ♀ 3° 55' S.

June 25. Neptune in conjunction with the Moon, 1h. 29m. aft. ♀ 3° 49' S.

June 25. Mercury and Neptune in conjunction, 1oh. 47m. aft. ♀ 0° 11' S.

June 26. Occultation of Venus. See p. 80.

June 26. Venus in conjunction with the Moon, 9h. 9m. morn. ♀ 0° 46' S.

June 28. Mars in conjunction with the Moon, 3h. 58m. morn. ♂ 0° 36' N.

In this month the Mornings increase 3m., and the Afternoons 13 m.

28	1	28	21.0	88	50	43	

MORNING AND EVENING STARS.

♿ MERCURY is an evening star, setting N.W. at first, afterwards N.W. by W.

♀ VENUS is an evening star, setting N.W. at first, in latter part of month N.W. by W., near to Mercury.

♂ MARS is an evening star, setting W.N.W.

♃ JUPITER is an evening star, setting W.S.W.

♄ SATURN is an evening star early in the month, setting N.W. by W., near ♄ Tauri.

In the last week of June the constellations Draco, Lyra, a portion of Hercules, Scutum Sobieski, and a part of Sagittarius will south about midnight.

In Sagittarius there is a notable and very extensive Nebula, somewhat like a horseshoe in shape. It will be found in R.A. 18h. 15m., and Decl. 16° 15' S. The spectroscope shows this Nebula to consist of a mass of incandescent gas. Professor Holden says that one arm of the Nebula has

changed its position since Herschel's time. In good weather it can be well seen with a small telescope.

In Sagittarius, a little West and North of λ, is a globular cluster of very minute stars, densely crowded, to be seen only with difficulty in small telescopes. Owing to its great southern declination there is but little chance of seeing it except when southing. Pallas may be observed in this month. See p. 82.

Mean Longitude of Moon's Ascending Node, July 1, 338° 47' 7".

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

July 1. In this month there is no real night till after the 20th, the length of the Day being 16h. 30m.

July 2. Mercury stationary, 2h. aft.

July 2. Earth at greatest distance from the Sun, 11h. aft.

July 5. Mean time of Sun's semidiameter passing the meridian, 1m. 8' 4s.

July 9. Uranus in conjunction with the Moon, 11h. 27m. morn. H 1° 42' N.

July 10. Jupiter in conjunction with the Moon, 7h. 14m. morn. L 0° 32' N.

July 12. Occultation of 8z Aquarii; magnitude 6.4. See p. 80.

July 16. Mercury in inferior conjunction with the Sun, 6h. aft.

July 17. Occultation of μ Arietis; magnitude 5.7. See p. 80.

July 20. Mean time of Sun's semidiameter passing the meridian, 1m. 7' 5s.

July 20. Saturn in conjunction with the Moon, 2h. 43m. aft. L 5° 59' S.

July 21. Neptune in conjunction with the Sun, 2h. aft.

July 22. Mercury in conjunction with the Moon, 7h. 46m. morn. Q 8° 37' S.

July 22. Neptune in conjunction with the Moon, 10h. 50m. aft. $\frac{1}{2}$ 3° 43' S.

July 26. Venus in conjunction with the Moon, 6h. 24m. morn. ♀ 1° 52' N.

July 26. Mars in conjunction with the Moon, 4h. 33m. aft. ♂ 2° 7' N.

July 27. Mercury stationary, 5h. morn.

In this month the Mornings decrease 35m., and the Afternoons 29m.

19	1	28	44.9	88	50 44
28	1	28	54.3	88	50 45

MORNING AND EVENING STARS.

☿ MERCURY is an evening star early in the month, a morning star after the 15th, rising E.N.E.

♀ VENUS is an evening star, setting at first W.N.W., and at end of month W. by N.

♂ MARS is an evening star, setting W. by N.; in the southern portion of Leo.

♃ JUPITER rises late in the evening E.S.E., near to δ Capricorni.

♄ SATURN is a morning star; rises N.E. by E. in Taurus.

In the middle of July the constellations Cygnus, Vulpecula, Aquila, and Sagittarius will be on the meridian about midnight.

The Annular Nebula in Lyra, situated between β and γ, is the best example of the Annular Nebula; the heavens containing, as far as is at present known, comparatively few examples of this class. It requires a rather good telescope to see it well: it is in R.A. 18h. 50m. and Decl. 32° 54' N. It

exhibits a spectrum as if composed of an incandescent gas. There is also a globular cluster in Lyra, as nearly as possible midway between γ Lyrae and β Cygni. It is in R.A. 19h. 13m., Decl. 30° 1' N. The best nights for the observation of these objects are those just before and after the 22nd.

Uranus, Ceres, and Pallas may be well observed in this month. See p. 82.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

August 1. Day breaks at 1h. 31m. morn., and Twilight ends at 10h. 41m. aft., the length of the Day being 15h. 24m.

Aug. 2. Occultation of B.A.C. 6160; magnitude 6.4. See p. 80.

Aug. 3. Occultation of γ Sagittarii; magnitude 3.5. See p. 80.

Aug. 5. Mercury at greatest elongation (19° 14') West, 1h. aft.

Aug. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 6.18.

Aug. 5. Uranus in conjunction with the Moon, 5h. 57m. aft.

Aug. 5. Occultation of η Capricorni; magnitude 4.8. See p. 80.

Aug. 6. Venus and Mars in conjunction, 1h. 47m. morn. ♀ 0° 10' S.

Aug. 6. Jupiter in conjunction with the Moon, 9h. 59m. morn.

Aug. 10. Mercury and Neptune in conjunction, 8h. 5m. morn. ♀ 0° 1' S.

Aug. 10. Occultation of δ Piscium; magnitude 4.6. See p. 80.

Aug. 16. Occultation of B.D. + 27° 723; magnitude 6.5. See p. 80.

Aug. 16-17. Occultation of 136 Tauri; magnitude 4.6. See p. 80.

Aug. 17. Saturn in conjunction with the Moon, 4h. 59m. morn.

Aug. 17. Occultation of B.A.C. 1918; magnitude 6.1. See p. 80.

Aug. 19. Neptune in conjunction with the Moon, 9h. 45m. morn.

Aug. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 4.98.

Aug. 20. Mercury in conjunction with the Moon, 5h. 40m. aft.

Aug. 21. A Total Eclipse of the Sun, visible as a Partial Eclipse at Greenwich. See p. 78.

Aug. 24. Mars in conjunction with the Moon, 6h. 46m. morn.

Aug. 24. Venus in conjunction with the Moon, 9h. 48m. aft.

Aug. 28. Occultation of B.A.C. 5603; magnitude 6.0. See p. 80.

In this month the Mornings decrease 47m., and the Afternoons 59m.

Mean Longitude of Moon's Ascending Node, August 1, 337° 8' 8".

28	1 29	25	1	88	50	52

MORNING AND EVENING STARS.

♂ MERCURY is a morning star, rising N.E. by E. at first, afterwards E.N.E.

♀ VENUS is an evening star, setting at first nearly due W., afterwards W. by S.

♂ MARS is an evening star, setting a little N. of W., and towards end of month S. of W.

♃ JUPITER in Capricornus, rising in the early evening.

♄ SATURN in Taurus; sets in the early afternoon.

At the beginning of August, Cepheus, Cygnus, Vulpecula, Delphinus, and Capricornus south at midnight.

In Vulpecula, $3\frac{1}{2}^{\circ}$ due north of γ Sagittæ, is the "Dumb-bell" Nebula, generally considered irresolvable, although under the higher powers of Lord Rosse's telescope there seemed some trace of resolvability shown. It is situated in R.A. $10^h. 55^m$ and Decl. $22^{\circ} 26' N.$, and gives a spectrum of bright lines.

There is a little bright globular cluster, 4° due south of ϵ Delphini, consisting of a mass of very small stars; ϵ Delphini is situated in R.A. $20^h. 29^m. 6s$ and Decl. $11^{\circ} 1' N.$ —a tiny star, 9th mag. precedes it. This though a small is yet a bright cluster, and may be observed easily on the evenings immediately before and after the 21st of this month. Uranus, Ceres, and Pallas may be observed in this month. See p. 82.

Fasts and Festivals.

Mean Longitude of Moon's Ascending Node, September 1, 335° 31' 48".

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3h. 7m. morn., and Twilight ends at 8h. 53m. aft., the length of the Day being 13h. 34m.

Sept. 1. Occultation of 17 Capricorn; magnitude 5.8. See p. 80.

Sept. 2. Jupiter in conjunction with the Moon, 10h. 39m. morn. 1° 58' N.

Sept. 4. A Partial Eclipse of the Moon, invisible at Greenwich. See p. 78.

Sept. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 40s.

Sept. 9. Occultation of B.D. +16° 247; magnitude 6.4. See p. 80.

Sept. 10. Occultation of 16 Tauri; magnitude 5.4. See p. 80.

Sept. 10-11. Occultations of 19 Tauri, magnitude 4.3; 21 Tauri, magnitude 5.8; 20 Tauri, magnitude 4.1; 22 Tauri, magnitude 6.5. See p. 80.

Sept. 13. Occultation of B.A.C. 1745; magnitude 6.5. See p. 80.

Sept. 13. Saturn in conjunction with the Moon, 5h. 33m. aft. 5° 54' S.

Sept. 14. Occultation of A Gemina; magnitude 5.1. See p. 80.

Sept. 15. Neptune in conjunction with the Moon, 8h. 59m. aft. 3° 37' S.

Sept. 17. Occultation of B.A.C. 3209; magnitude 6.3. See p. 80.

Sept. 18. Venus at greatest elongation (46° 27') East, 10h. morn.

Sept. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 38s.

Sept. 21. Mercury in conjunction with the Moon, 4h. 8m. morn. 3° 23' N.

Sept. 21. Mars in conjunction with the Moon, 10h. 27m. aft. 4° 32' N.

Sept. 23. Venus in conjunction with the Moon, 5h. 46m. morn. 1° 30' N.

Sept. 23. Sun enters the sign Libra, 9h. 35m. aft.

Sept. 29. Uranus in conjunction with the Moon, 3h. 19m. morn. 1° 53' N.

Sept. 29. Jupiter in conjunction with the Moon, 4h. 38m. aft. 1° 6' N.

In this month the Mornings decrease 46m., and the Afternoons 1h. 6m.

28	1	29	45.2	88	51 2

MORNING AND EVENING STARS.

☿ MERCURY is an evening star, setting W. by N., then due W., and at end of month W.S.W.

♀ VENUS is an evening star, setting W.N.W., and at end of month N.W. by W.

♂ MARS is an evening star, setting at first W. by S., and towards end of the month W.S.W. Near Spica Virginis on the 15th.

♃ JUPITER nearly in the same place as in July and August.

♄ Saturn sets in the early afternoon; in Gemini, near to μ and η .

On the 1st of September, Cepheus, Pegasus, Aquarius, and Piscis Australis will be on the meridian at midnight.

In Pegasus is a fine globular cluster of very small stars, $3\frac{1}{2}'$ in diameter, $4\frac{1}{2}^\circ$ north-west of ϵ Pegasi, much condensed towards the centre, where the stars cannot be resolved; there are many telescopic and several rather bright stars in the field. Aquarius contains a fine cluster of stars, condensed in the centre, and presenting

a true globular form, consisting of very small stars very much compressed. It is situated in R.A. 21^h . 28^m . and Decl. 1° $20'$ S.

In the early evening at the beginning of the month, the bright cluster in Capricornus, situated in R.A. 21^h . 35^m . and Decl. 23° $40'$ S., can be observed. The best evenings for observation are those immediately before and after the 15th.

Ceres may be observed in this month. See p. 82.

Mean Longitude of Moon's Ascending Node, October 1. 333° 54' 4".

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4h. 8m. morn., and Twilight ends at 7h. 32m. aft., the length of the Day being 11h. 38m.

Oct. 1. Occultation of λ Aquarii; magnitude 3.9. See p. 80.

Oct. 1. Occultation of 78 Aquarii; magnitude 6.3. See p. 80.

Oct. 5. Mean time of Sun's semi-diameter passing the meridian, 1m. 4' 38".

Oct. 6. Mercury and Mars in conjunction, 8h. 15m. morn. ♀ 2° 11 S.

Oct. 7. Occultation of μ Arietis; magnitude 5.7. See p. 80.

Oct. 10. Occultation of B.A.C. 1648; magnitude 6.4. See p. 80.

Oct. 10. Occultation of B.A.C. 1918; magnitude 6.1. See p. 80.

Oct. 11. Saturn in conjunction with the Moon, 2h. 46m. morn. ♀ 5° 45' S.

Oct. 11. Occultation of 39 Geminorum; magnitude 6.2. See p. 80.

Oct. 11. Occultation of 40 Geminorum; magnitude 6.3. See p. 81.

Oct. 15. Mercury at greatest elongation (24° 52') East, 4h. aft.

Oct. 20. Mean time of Sun's semi-diameter passing the meridian, 1m. 5' 48".

Oct. 20. Mars in conjunction with the Moon, 3h. 30m. aft. ♂ 4° 55' N.

Oct. 20. Mercury in conjunction with the Moon, 11h. 37m. aft. ♀ 1° 55' N.

Oct. 22. Venus in conjunction with the Moon, 2h. 2m. morn. ♀ 0° 24' S.

Oct. 23. Venus at greatest brilliancy, 5h. aft.

Oct. 23. Occultation of B.A.C. 6160; magnitude 6.4. See p. 81.

Oct. 26. Jupiter in conjunction with the Moon, 7h. 8m. aft. ♀ 0° 56' N.

Oct. 26. Occultation of η Capricorni; magnitude 4.8. See p. 81.

Oct. 28. Occultation of B.A.C. 7919; magnitude 6.5. See p. 81.

Oct. 30. Occultation of 14 Piscium; magnitude 5.9. See p. 81.

Oct. 30. Mercury and Mars in conjunction, 4h. 0m. aft. ♂ 2° 14' S.

Oct. 31. Occultation of 8 Piscium; magnitude 4.6. See p. 81.

In this month the Mornings decrease 51m., and the Afternoons 1h. 3m.

	H.	M.	S.	°	'	"
1	1	29	46.0	88	51	4
10	1	29	49.4	88	51	7
19	1	29	50.5	88	51	10
28	1	29	50.8	88	51	14

MORNING AND EVENING STARS.

♿ MERCURY is an evening star, setting W.S.W., and later S.W. by W.

♀ VENUS is an evening star, setting S.W.

♂ MARS is an evening star, setting W.S.W.

♃ JUPITER souths between 7 and 8 in the afternoon. Altitude about 20°.

♄ SATURN souths in the early afternoon. Altitude about 60°.

On the 1st of October, Cassiopeia, Andromeda, Pisces, and Cetus are on the meridian at midnight; while Cancer and Orion are rising, and Hercules and Capricornus setting.

In Andromeda, near to the 4th mag. star ν , is a large and irresolvable Nebula in the form of an elongated ellipse. It is situated in R.A. $oh. 37m.$ and Decl. $40^{\circ} 43' N.$ In Sept., 1885, a decided stellar nucleus was observed in R.A. $oh. 36m. 31s.$, Decl. $40^{\circ} 38' N.$, probably unconnected with the Nebula. Very many minute stars can be seen within the Nebula.

A fine double cluster of stars, situated midway on a line joining α Persei and γ Cassiopeia, may be observed in this month. The northern cluster is a magnificent collection of stars, 30' in diameter, ranging in magnitude from the 6th to 14th. The smaller southern cluster, 15' in diameter, is less rich in stars, and much condensed toward the centre. On fine nights about the 18th these objects afford one of the most beautiful subjects for observation.

DAY OF			Fasts and Festivals. Remarkable Days--Events.	THE SUN	DAYS

1		S	21st Sunday after Trinity. All Saints.	6 54	4 34	305	60
2		M	All Souls' Day. Melton Prior died, 1910.	6 56	4 32	306	59
3		Tu	Acre, 1840. Adm. Sir H. Rawson, d. 1910.	6 58	4 30	307	58
4		W	The Gunpowder Plot discovered, 1605.	7 0	4 28	308	57
5		Th	Inkermann, 1854. William III. landed, 1688.	7 2	4 26	309	56
6		F	St. Leonard. Caliph Omar I. assassinated, 644.	7 3	4 25	310	55
7		S	Sir Martin Frobisher, navigator, d. 1594.	7 5	4 23	311	54
8		S	22nd Sunday aft. Trinity. J. Milton, d. 1674.	7 6	4 22	312	53
9		M	Lord Mayor's Day. King Edward VII. b. 1841.	7 8	4 20	313	52
10		Tu	Martin Luther born, 1483; d. 18 Feb., 1546.	7 10	4 18	314	51
11		W	St. Martin. Martinmas. Half Quarter Day.	7 12	4 16	315	50
12		Th	Charles Kemble, actor, died, 1854.	7 14	4 14	316	49
13		F	St. Brice. Uhland, German poet, died, 1862.	7 15	4 13	317	48
14		S	John Abercrombie, metaphysician, died, 1844.	7 17	4 11	318	47
15		S	23rd Sunday after Trinity. St. Machutus.	7 19	4 10	319	46
16		M	Inauguration of the Suez Canal, 1869.	7 21	4 9	320	45
17		Tu	St. Hugh. Sir John Mandeville died, 1372.	7 22	4 8	321	44
18		W	Last convict landed at Sydney, N.S.W., 1840.	7 24	4 6	322	43
19		Th	Ferdinand de Lesseps b. 1805; d. 7 Dec. 1894.	7 26	4 5	323	42
20		F	St. Edmund. Sir Wilfrid Laurier b. 1841.	7 28	4 4	324	41
21		S	Sir Thomas Gresham died, 1579.	7 30	4 2	325	40
22		S	24th Sunday after Trinity. St. Cecilia.	7 31	4 1	326	39
23		M	St. Clement. Franklin Pierce born, 1804.	7 33	4 0	327	38
24		Tu	Old Martinmas. Tasmania discovered, 1642.	7 35	3 59	328	37
25		W	St. Catherine. Sir Francis Chantrey d. 1841.	7 36	3 58	329	36
26		Th	Queen Maud of Norway born, 1869.	7 37	3 57	330	35
27		F	Alexander Dumas fils died, 1895.	7 39	3 57	331	34
28		S	The Times first printed by steam, 1814.	7 40	3 56	332	33
29		S	1st Sunday in Advent.	7 42	3 55	333	32
30		M	St. Andrew, Apostle & Martyr.	7 43	3 55	334	31

PHASES OF THE MOON.

○ Full Moon	2d. 11h. 49m.	Afternoon.
◐ East Quarter	10 11 37	Afternoon.
● New Moon	17 4 2	Afternoon.
◑ First Quarter	24 1 39	Afternoon.
Apogee	2d. 8h. A.	252,600.
Perigee	17d. 4h. M.	222,000.
Apogee	29d. 11h. A.	252,400.

RAIN FELL IN NOVEMBER, 1912,

on 14 days; total fall, 172 inches; below the average, 1841-90, by 0.55 inches.

MONTHLY NOTES.

- November 1. Latest day for receiving corrections for Whitaker's Almanack.
 - Salmon-fishing with rod and line ends.
 - Ordinary day of election of Borough Councillors.
 - Holiday at London Stock Exchange.
 2 Fox-hunting begins.
 9. Mayors and Aldermen of Boroughs to be elected and Sheriffs appointed.
 12. County Sheriffs for next year nominated.
 15. Solicitors', notaries', proctors', and sworn clerks' certificates expire. See Note, Dec. 15.
 26. Thanksgiving Day, U.S.A.

Mean Longitude of Moon's Ascending Node, November 1, 332° 17' 1/2.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 5h. 11m. morn., and Twilight ends at 6h. 27m. aft., the length of the Day being 9h. 40m.

Nov. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 7 1/2.

Nov. 6. Occultation of 136 Tauri; magnitude 4.6. See p. 81.

Nov. 7. Occultation of B.A.C. 1918; magnitude 6.1. See p. 81.

Nov. 7. Saturn in conjunction with the Moon, 8h. 3m. morn. 5 34' 8.

Nov. 7. Venus stationary, 9h. morn.

Nov. 7. Transit of Mercury across Sun's disc. See p. 78.

Nov. 8. Occultation of 39 Geminorum; magnitude 6.2. See p. 81.

Nov. 8. Occultation of B.A.C. 2506, magnitude 6.3; and B.A.C. 2514, magnitude 6.0. See p. 81.

Nov. 9. Neptune in conjunction with the Moon, 2h. 10m. aft. 3 3 11' 8.

Nov. 9. Occultation of 7 Cancri; magnitude 5.5. See p. 81.

Nov. 13. Occultation of 79 Leonis; magnitude 5.5. See p. 81.

Nov. 16. Mercury in conjunction with the Moon, 4h. 17m. aft. 5 7 11' N.

Nov. 18. Mars in conjunction with the Moon, 9h. 57m. morn. 6 4 38' N.

Nov. 18. Venus in conjunction with the Moon, 4h. 12m. aft. 1 0 7' N.

Nov. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 8 9/10.

Nov. 21. Venus and Mars in conjunction, 10h. 13m. aft. 2 45' S.

Nov. 23. Jupiter in conjunction with the Moon, 7h. 40m. morn. 1 0 28' N.

Nov. 24. Mercury at greatest elongation (19° 51') West, 2h. morn.

Nov. 29. Occultation of B.D. 160 247; magnitude 6.4. See p. 81.

Nov. 30. Occultation of 6 Arietis; magnitude 4.6. See p. 81.

In this month the Mornings decrease 49m., and the Afternoons 39m.

MORNING AND EVENING STARS.

- ☿ MERCURY rises and sets nearly with the Sun at the beginning of the month, after which becomes a morning star, rising E.S.E.
 ♀ VENUS is an evening star early in the month, setting S.W.
 ♀ MARS too near the Sun for observation.
 ♃ JUPITER is an evening star, setting W.S.W.
 ♄ SATURN nearly stationary in Gemini, near the star η.

On the 1st of November, Perseus, Aries, and Cetus are on the meridian at midnight.

An irresolvable Nebula $2\frac{1}{2}^{\circ}$ to the East of γ Andromedæ may be observed in this month. It was discovered by Miss Herschel, with a small reflecting telescope of twenty-seven inches in focal length. It is a very elongated Nebula, $15'$

long by $3'$ broad, with a cleft, dark in the middle and suggests the idea of a vast flat ring seen very obliquely. It is in R.A. $2^h. 16^m.$ and Decl. $41^{\circ} 09' N.$ The best evenings for observing it are those about the 17th.

Vesta may be observed in this month. See p. 82.

Mean Longitude of Moon's Ascending Node, December 1, 330° 41' 30".

WHITAKER'S ALMANACK, 1914.

ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5h. 41m. morn., and Twilight ends at 5h. 57m. aft., the length of the Day being 8h. 16m.

Dec. 1. Occultations of 17 Tauri, magnitude 3.8; 16 Tauri, magnitude 5.4; 19 Tauri, magnitude 4.3; 20 Tauri, magnitude 4.1; 22 Tauri, magnitude 6.5; 21 Tauri, magnitude 5.8. See p. 81.

Dec. 4. Saturn in conjunction with the Moon, 10h. 44m. morn. 1/2 5° 26' S.

Dec. 5. Mean time of Sun's semidiameter passing the meridian, 1m. 10.38.

Dec. 5. Occultation of A Geminorum; magnitude 5.1. See p. 81.

Dec. 6. Occultations of B.A.C. 2506, magnitude 6.3; B.A.C. 2514, magnitude 6.0. See p. 81.

Dec. 6. Neptune in conjunction with the Moon, 7h. 19m. aft. 2° 58' S.

Dec. 7. Occultation of η Cancri; magnitude 5.5. See p. 81.

Dec. 7. Mercury and Venus in conjunction, 3h. 32m. aft. 0° 21' N.

Dec. 15. Venus in conjunction with the Moon, 9h. 50m. morn. 7° 36' N.

Dec. 16. Mercury in conjunction with the Moon, 8h. 22m. morn. 0° 56' N.

Dec. 17. Mars in conjunction with the Moon, 5h. 58m. morn. 3° 47' N.

Dec. 20. Mean time of Sun's semidiameter passing the meridian, 1m. 11.08.

Dec. 20. Occultation of 31 Capricorn; magnitude 6.3. See p. 81.

Dec. 21. Jupiter in conjunction with the Moon, 1h. 33m. morn. 1° 12' S.

Dec. 21. Occultation of ε2 Aquarii; magnitude 5.4. See p. 81.

Dec. 22. Sun enters the sign Capricornus, 4h. 24m. aft.

Dec. 25. Occultation of 51 Piscium; magnitude 5.6. See p. 81.

Dec. 11. Occultations of 16 Tauri, magnitude 5.4; 19 Tauri, magnitude 4.3; 21 Tauri, magnitude 5.8; 20 Tauri, magnitude 4.1; 22 Tauri, magnitude 6.5. See p. 81.

Dec. 31. Saturn in conjunction with the Moon, 1h. 21m. aft. 1/2 5° 31' S.

In this month the Mornings decrease 24m., and the Afternoons increase 4m.

MORNING AND EVENING STARS.

- ☿ MERCURY is a morning star, rising S.E. by E.; near to the Sun at end of month.
- ♀ VENUS is a morning star, rising S.E. by E.
- ♂ MARS too near the Sun for observation.
- ♃ JUPITER is an evening star, setting W.S.W.
- ♄ SATURN rises in the early afternoon N.E. by E.

On the 1st of December, at midnight, the constellations Camelopardus, Taurus, and Eridanus will be on the meridian.

In Taurus is a fine Nebula of a pearly white colour $1\frac{1}{2}^{\circ}$ North-west of ζ Tauri. Lord Rosse compared its appearance to that of a crab, and it is generally known as the "Crab Nebula."

About the middle of December Orion souths at midnight, and can be best observed in this month.

This magnificent constellation contains the grandest of all the Nebulae, situated in the Sword-Scabbard. A line drawn from α Orionis through ζ , the third star of the belt, will pass over θ Orionis and the Nebula. It can be seen with the naked eye on any clear night. Evenings about the 16th are the best. Vesta may be observed in this month. See p. 82.

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For Example:—To know on what day of the week H.M. the King was born (June 3, 1865), in the table of years look for 1865, and in a parallel line, under June, is fig. 4, which directs to col. 4, in which it will be seen that June 3 fell on Saturday.

† 1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780. Sept. 3-13 were omitted.

Tidal Constants.

WITH THE RISE OF TIDE AT SPRINGS AND NEAPS.

THE TIME OF HIGH WATER at the undermentioned Ports and Places may be approximately found by taking the Time of High Water at London Bridge, and adding to or subtracting therefrom the quantities annexed.

NOTE.—The time thus found will be Greenwich Time for British French and Belgian Ports, Dublin Time for Irish Ports, and Amsterdam time for Dutch Ports.

EXAMPLE 1.—Required the time of high water at Aberdeen on January 6th:—

Time of high water at London Bridge 8h. 17m. Morn.
Subtract tide interval. 0 50

Time of high water at Aberdeen 7 27 Morn.

EXAMPLE 2.—Required the time of high water at Scarborough on January 9th:—

Time of high water at London Bridge 11h. 39m. Morn.
Add tide interval 2 15

Time of high water at Scarborough 1 54 After.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be

taken, in which case 12 hours must be added to the London Bridge time: the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes the sum "high water at London Bridge" + "tide interval" will exceed 12 hours: in this case, the excess will be the time of high water after the noon or midnight following, according as the London high water was either morning or afternoon.

EXAMPLE 3.—Required the time of high water at Aberdeen, January 9th aft.:—

Time of high water at London Bridge
on January 10th + 12 hours 12h 10m. Morn.
Subtract tide interval. 0 50

Time of high water at Aberdeen, Jan. 9th 11 20 After.

The Athanasian Creed
on the days marked*.

MORNING PRAYER.

EVENING PRAYER.

	First Lesson.	Second Lesson.
Jan. 1 Circumcision....	Genesis 17, v. 10	Romans 2, v. 17

Previous to 1752 the above dates are computed from the Old Style. The tables in modern Prayer-Books are calculated for the New Style only. Dates here printed in heavier type are leap-years. 1752 had E D up to September 2, but A from September 14 to December 31, the intermediate days being dropped for the change of style. Its Easter was the last in Old Style. The Table of Movable Feasts in the Prayer-Book gives all the others after finding Easter in this.

* Old Style.

† New Style.

Table for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for all practical purposes, the times of sunrise and sunset for any place situated between latitudes 1° and 66° .

To use the table: With the Sun's declination, in the first column, and under the required latitude on the horizontal line, will be found the apparent time of sunset. Subtracting the time so found from 12h. will give the apparent time of sunrise. To obtain the mean or clock time, the numbers in the column headed *before* or *after* clock (which will be found on the second page of each month), giving the difference in time between the mean and true sun for each

day in the year, must be applied to the apparent times of sunrise and sunset, as the particular case may require; that is to say, if the true sun is *before* the clock the equation of time must be subtracted from the apparent to obtain the mean or clock time, and if *after*, added.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator by changing the declination from North to South and *vice versa*.

If the time of sunrise or sunset should be required for any declination or latitude falling between the arguments in the table, these times may easily be found by simple proportion.

3 40	-0 57 52+	15 40	7 40	+0 3 37-	19 40	11 40	+1 1 29-	23 40
3 50	-0 56 11+	15 50	7 50	+0 6 37-	19 50	11 50	+1 2 47-	23 50
4 0	-0 54 22+	16 0	8 0	+0 9 36-	20 0	12 0	+1 3 59-	24 0

The sign on the left-hand side of the *correction* is to be used when the argument is on the left, and *vice versa*: + means that the correction is to be added to the reduced altitude, and - that it is to be subtracted.

24													

The corrections in Tables II. and III. are always additive; but since the numbers in Table III. have been increased by 1' to make them additive, that quantity must be subtracted from the final result.

				30	30	4' 93	60	60	9' 86	30	30' 08	60	60' 16		

To obtain the Sidereal Time corresponding to a given Mean Solar Time, we must take, from the second page of the month, the preceding Sidereal Time at Mean Noon, and add to it the Sidereal Equivalents corresponding to the hours, minutes, and seconds of the given Mean Time. Should the sum come out more than twenty-four hours, that amount must be subtracted from it. As an example, let the Sidereal Time corresponding to the Mean Time of July 3d. 8h. 27m. 12s. be required:—

Sidereal Time at Mean Noon on July 3.....	H.	M.	S.
	6	42	40
Mean Time intervals and Sidereal Equivalents.....	8h. =	8	18' 85
	27m. =	27	4' 44
	12s. =		12' 03
Corresponding Sidereal Time =	15	11	15' 32

This Table may be used to show the acceleration of Sidereal on Mean Solar intervals by subtracting the Mean Time arguments from their sidereal equivalents.

TO CHANGE INTERVALS OF SIDEREAL TIME INTO THE EQUIVALENT INTERVALS OF MEAN SOLAR TIME.

To obtain the Mean Time corresponding to a given Sidereal Time, take, from the second page of the month, the preceding Mean Time at Sidereal Noon, and add to it the Mean Time Equivalents corresponding to the hours, minutes, and seconds of the Sidereal Time.

Let it be required to find the Mean Time corresponding to the Sidereal Time 23h. 25m. 59s. on August 8:—

	D.	H.	M.	S.
Preceding Mean Time at Sidereal Noon	7	14	56	53
Sidereal intervals and Mean Time Equivalents	23h. =	22	56	13' 92
	25m. =	24	55' 90	
	59s. =		58' 84	
Corresponding Mean Time, August 9	2	19	1' 66

78 Celestial Objects and Phenomena for Observation, 1914.

THE following is a summary of the more prominent and interesting astronomical objects and occurrences visible during the year. The information is intended as a guide to that ever-increasing band of amateur observers who "consider the heavens." We have only attempted to describe such events as are capable of being definitely predicted.

ECLIPSES IN 1914.

In the year 1914 there will be two Eclipses of the Sun and two of the Moon, also a Transit of Mercury across the Sun's disc.

I. An Annular Eclipse of the Sun, February 24-25, invisible at Greenwich. Begins on the Earth generally at 9h. 46m. aft. on February 24, in longitude 108° East of Greenwich, and latitude 63° South. Central Eclipse begins generally at 11h. 35m. aft. on February 24, in longitude 31° West of Greenwich, and latitude 78° South. Central Eclipse ends generally at 5h. 52m. morn. on February 25, in longitude 91° West of Greenwich, and latitude 43° South. Ends on the Earth generally at 2h. 41m. morn. on February 25, in longitude 125° West of Greenwich, and latitude 10° South. The hours and minutes are expressed in Mean Time at Greenwich.

II. A Partial Eclipse of the Moon, March 12, partly visible at Greenwich.

First contact with the shadow 2h. 42m. morn.
Middle of the Eclipse 4h. 13m. morn.

Last contact with the shadow 5h. 44m. morn.

Mean Time at Greenwich.

The first contact with the shadow takes place at 88° from the North point of the Moon's limb, and the last contact at 330° from the same point, in both cases counting towards the East. Magnitude of the Eclipse = 0.92. The Moon sets at Greenwich at 6h. 25m. morn.

III. A Total Eclipse of the Sun, August 21, visible as a Partial Eclipse at Greenwich. Begins on the Earth generally at 10h. 12m. morn., in longitude 80° West of Greenwich, and latitude 54° North. Central Eclipse begins generally at 11h. 26m. morn., in longitude 121° West of Greenwich, and latitude 71° North. Central Eclipse ends generally at 1h. 43m. aft., in longitude 71° East of Greenwich, and latitude 24° North. Ends on the Earth generally at 2h. 57m. aft., in longitude 47° East of Greenwich, and latitude 4° North. These times are expressed in Mean Time at Greenwich.

The line of Central Eclipse strikes the coast of Norway somewhat North of Trondhjem; crossing Norway to the Aland islands, Riga, Kief, Nicolaief, the Crimea, Trebizond, Lake Van, Baghdad, across the Gulf of Oman to the mouths of the Indus, where it ends.

At Greenwich a Partial Eclipse is visible; magnitude = 0.65.

Begins	10h. 59m. morn.	Greenwich
Greatest Phase	0h. 11m. aft.	Mean
Ends	1h. 21m. aft.	Time.

The first contact takes place at 341° from the vertex, and the last contact at 87° from the same point, counting in each case towards the East.

At Cambridge a Partial Eclipse is visible; magnitude = 0.67.

Begins	10h. 58m. morn.	Greenwich
Greatest Phase	0h. 10m. aft.	Mean
Ends	1h. 21m. aft.	Time.

The first contact occurs at 339°, and the last at 88° from the vertex, counting towards the East.

At Oxford a Partial Eclipse is visible; magnitude = 0.64.

Begins	10h. 58m. morn.	Greenwich
Greatest Phase	0h. 9m. aft.	Mean
Ends	1h. 19m. aft.	Time.

The first contact occurs at 342°, and the last at 87° from the vertex, counting towards the East.

At Durham a Partial Eclipse is visible; magnitude = 0.70.

Begins	10h. 54m. morn.	Greenwich
Greatest Phase	0h. 5m. aft.	Mean
Ends	1h. 16m. aft.	Time.

The first contact occurs at 338°, and the last at 92° from the vertex, counting towards the East.

At Liverpool a Partial Eclipse is visible; magnitude = 0.66.

Begins	10h. 54m. morn.	Greenwich
Greatest Phase	0h. 5m. aft.	Mean
Ends	1h. 15m. aft.	Time.

The first contact occurs at 343°, and the last at 91° from the vertex, counting towards the East.

At Edinburgh a Partial Eclipse is visible; magnitude = 0.71.

Begins	10h. 51m. morn.	Greenwich
Greatest Phase	0h. 2m. aft.	Mean
Ends	1h. 12m. aft.	Time.

The first contact occurs at 337°, and the last at 96° from the vertex, counting towards the East.

At Glasgow a Partial Eclipse is visible; magnitude = 0.70.

Begins	10h. 50m. morn.	Greenwich
Greatest Phase	0h. 1m. aft.	Mean
Ends	1h. 11m. aft.	Time.

The first contact occurs at 339°, and the last at 96° from the vertex, counting towards the East.

At Dublin a Partial Eclipse is visible; magnitude = 0.62.

Begins	10h. 25m. morn.	Dublin
Greatest Phase	11h. 35m. morn.	Mean
Ends	0h. 45m. aft.	Time.

The first contact occurs at 347°, and the last at 93° from the vertex, counting towards the East.

At Armagh a Partial Eclipse is visible; magnitude = 0.64.

Begins	10h. 24m. morn.	Dublin
Greatest Phase	11h. 34m. morn.	Mean
Ends	0h. 44m. aft.	Time.

The first contact occurs at 345°, and the last at 94° from the vertex, counting towards the East.

At Montreal a Partial Eclipse is visible; magnitude = 0.18.

Begins	5h. 18m. morn.	Standard
Greatest Phase	5h. 52m. morn.	Time.
Ends	6h. 27m. morn.	

The first contact occurs at 30°, and the last at 103° from the vertex, counting towards the East.

IV. A Partial Eclipse of the Moon, September 4, invisible at Greenwich. Magnitude of the Eclipse = 0.86 of Moon's diameter.

First contact with the shadow	0h. 17m. aft.
Middle of the Eclipse	1h. 55m. aft.
Last contact with the shadow	3h. 33m. aft.

Mean Time at Greenwich.

The first contact with the shadow occurs at 94°, and the last at 210° from the North point of the Moon's limb, counting towards the East.

V. A Transit of Mercury across the Sun's disc, November 7, visible at Greenwich.

External contact at Ingress	0h. 57m. 15s. morn.
Internal contact at Ingress	0h. 59m. 29s. morn.
Least distance of centres	0h. 3m. 22s. aft.
Internal contact at Egress	2h. 7m. 16s. aft.
External contact at Egress	2h. 9m. 28s. aft.

Mean Time at Greenwich.

The first contact, at Ingress, takes place at 156° from the North point, and at Egress 255° from the same point, counting towards the East.

VI. ECLIPSES OF JUPITER'S SATELLITES.

The following table contains *all* the Eclipses of the first Satellite, and only *those that are visible at Greenwich* of the second, third, and fourth Satellites.

The Roman numerals indicate the Satellite eclipsed; the letters D. and R. signifying respectively Disappearance and Reappearance. Those Eclipses which are visible at Greenwich have an asterisk after the D. or R. in the second column.

From February 21 until August 10, the dis-

appearances and reappearances take place on the Western side of the Planet; from August 10 to end of year, on the Eastern side. In the astronomical telescope, which inverts the image, the Western side of the Planet will be on the left hand and the Eastern on the right, in the Northern hemisphere.

The mean time for any other place than Greenwich may be found by applying to the times given in the following table the difference of longitude, adding if the longitude of the place is East of Greenwich, and subtracting if West.

Date.	Satellite and Phase.	Greenwich Mean Time.	Date.	Satellite and Phase.	Greenwich Mean Time.	Date.	Satellite and Phase.	Greenwich Mean Time.
Owing to the Planet's proximity to the Sun, the Satellites will not be visible until Feb. 21.			May	II. D.*	H. M. S.	Aug.	I. D.	H. M. S.

The angle from the vertex is measured from the true vertex, or highest upper portion of the Moon's image, counting continuously towards the East from 0° to 360°.

GREENWICH OBSERVATORY.

John Flamsteed (a protégé of Sir Jonas Moore, the mathematician, and of Sir Christopher Wren, the architect) was appointed "Astronomical Observer" by Charles II., the royal warrant being dated 4 March, 1675. A building was hastily run up on the summit of a hill in Greenwich Park from the designs of Wren at the cost of £520, realised in those impecunious times by the sale of some spoil gunpowder.

British Astronomical Observatories.

Frank Watson Dyson.....	1910

THE FRENCH REPUBLICAN CALENDAR.

THIS, although reckoned from the 22nd September, 1792, was not introduced until the 22nd November, 1793. It remained in use only till the 31st December, 1805. The Gregorian Calendar was restored January 1st, 1806 (Nivôse 10, Year XIV.). The months varied in different years, thus Nivôse 1 commenced December 21st in 1793, December 22nd in 1795, December 21st in 1796, December 22nd in 1799, December 23rd in 1803, and December 22nd in 1804 and 1805. The following are the dates for the year 1804, the last complete year of the Calendar:—

Vendémiaire (<i>Vintage</i>),	23 Sept. to Oct. 22	Germinal (<i>Budding</i>),	22 Mar. to Apr. 21
Brumaire (<i>Foggy</i>),	23 Oct. to Nov. 22	Floral (<i>Flowers</i>),	21 April to May 20
Frimaire (<i>Sleet</i>),	22 Nov. to Dec. 21	Prairial (<i>Pasture</i>),	21 May to June 20
Nivôse (<i>Snowy</i>),	22 Dec. to Jan. 21	Messidor (<i>Harvest</i>),	20 June to July 19
Pluviôse (<i>Rainy</i>),	21 Jan. to Feb. 20	Thermidor (<i>Hot</i>),	20 July to Aug. 19
Ventôse (<i>Windy</i>),	20 Feb. to Mar. 21	Fructidor (<i>Fruit</i>),	19 Aug. to Sept. 18

The months were divided into three decades of ten days each, but to make up the 365, five were added at the end of September; (*Primidi*), dedicated to Virtue; (*Duodi*) to Genius; (*Tridi*) to Labour; (*Quartidi*) to Opinion; and the 5th (*Quintidi*) to Rewards. To Leap Year, called *Olympic*, a sixth day, the 22nd or 23rd September (*Sextidi*), "Jour de la Révolution," was added. This variation of dates has led to considerable confusion, but those who may wish to trace the fourteen years will find some very elaborate tables in the English edition of Bourrienne's "Life of Napoleon": Bentley.

Apr. 7 40 '49	-18 '23		Oct. 4 43 '75	-19 '28	
May 7 39 '09	-17 '69		Nov. 3 46 '11	-20 '32	
June 6 38 '47	-17 '45		Dec. 3 47 '75	-21 '19	

The figures of the apparent dimensions of Saturn's Ring as seen from the Earth refer to the outer limit of the outer Ring. The sign + signifies that the northern surface will be visible, and - the southern surface. The Ring will be invisible when its plane passes through either the centre of the Sun, centre of the Earth, or when the Sun and Earth are on opposite sides of the plane of the Ring.

α Trianguli Australis	1.9	16	39	32.8	+ 6	32	- 68 52 17
σ Octantis	5.5	19	22	55.7	+ 95	91	- 89 13 50
α Pavonis	2.0	20	18	51.0	+ 4	76	- 57 0 42
α Gruis	1.9	22	2	49.1	+ 3	78	- 47 22 41

η Argûs, magnitude ranges from 1 to 7.5.

σ Octantis, the Pole Star of the Southern Hemisphere, it will be noticed, is only 46' from the South Pole, while the Pole Star, Polaris, is 1° 9' from the North Pole.

On p. 92, α Ceti is mentioned as the most remarkable variable star visible in the

Northern Hemisphere, both as to extent of change in magnitude and irregularity of period. Scarcely less remarkable is the star η Argûs, in the Southern Hemisphere, which has a very considerable range in magnitude and also shows irregularity in period.

84 Telescopic Powers Suitable for Observing Celestial Objects.

COMETS, and large nebulae such as those in Orion and Andromeda, require very low powers and extensive fields of view, so that the whole of the objects may be viewed, and their light sufficiently concentrated to display the fainter portions. If it is desired to examine critically the structure of a comet's nucleus or details of form in a nebula, then powers of 150 or 200 may be used. The cluster in Hercules (Messier 13) is splendidly resolved with 100 on a 10-in. reflector.

The spots on the Sun are to be very distinctly seen in a small telescope, care being taken to protect the eye with deeply-tinted glass. A 3-in. refractor, powers from 60 to 100, reveals the solar markings in detail and under many varieties of form and grouping. The craters, mountains, clefts, and ridges of the Moon are satisfactorily seen in general outline with 50 and 75, though, for features of small extent, powers of 300 and 400 are necessary on a 10 or 12 in. glass. Solar and lunar eclipses are best visible under low powers, with fields sufficiently ample to include a picture of the whole phenomenon.

The phases of Mercury may be discerned with 150 or 175, but the air must be steady and the object not very near the horizon; those of Venus are plain with quite a low power.

The chief spots on Mars, such as the *Syrtis Major* and *Acidalius Mare*, may be distinguished with 90 on a 2-in. refractor, but powers of 300 and 350 and an 8-in. refractor or 10-in. reflector are desirable to exhibit the outlines of the fainter, narrower markings, many of which are delicate streaks and spots requiring very sharp images as well as ample magnification.

Jupiter's equatorial belts are perceptible in a 1½-in. telescope, power 40, but for studying their variable appearances and taking transit-times of the bright and dark spots 200 and 250 are requisite on a much larger instrument. The writer has successfully employed 150 with a 12½-in. reflector on Jupiter, but found no advantage over powers of 200 to 440. The four bright satellites are visible in an opera-glass. Dark transits of Satellites III. and IV. and their shadows may be observed with a 3-in. refractor and powers of 120 or 150.

Saturn and Mars usually appear well defined under higher powers than Jupiter. The division in Saturn's ring and his principal dark belt are

to be readily glimpsed, when the globe is sufficiently inclined, with a 2½-in. glass, power 120. But magnifiers of 250 to 350, and greater aperture, are essential to reach the delicate features of the planet, such as the spots which appeared in his northern hemisphere in 1903. A good 4½-in. refractor will occasionally show Encke's division in the ring when this is visible, but at the best it is only a faint pencil-like marking; also the interior crape ring and five of the satellites; but the air must be steady. Titan is visible in any small telescope, and Iapetus is sometimes an easy object, but Tethys, Rhea, and Dione are much more difficult, requiring careful scrutiny of the region just outlying the rings, where they will be usually recognised as tiny points of light.

In planetary work the observer will ultimately find it an advantage to accustom himself to one and the same power. If on special occasions or for particular purposes really high magnifiers are employed, they should be single lenses, as they possess a decided advantage in light and definition at the centre of the field.

For planetary observations generally, a telescope of less than 6 inches aperture is not really effective for certain and comprehensive work, nor can powers under 200 be expected to deal satisfactorily with the markings on Mars, Jupiter, and Saturn. When the air is very steady large telescopes and fairly high magnifying powers may be used to the best advantage.

Occultations of stars by the Moon are generally to be well observed with a 3-in. glass, power 50 to 75.

For double stars the eye-piece required will depend in a great measure upon the character of the object. For very close pairs, high powers, such as 300 or 400, and even more, are sometimes desirable, but in cases where the components are distant and the magnitudes differ considerably, as Vega, Polaris, or Rigel, then a moderate power, such as 100 or 150, will give excellent results. For showing variable stars a good field-glass is to be recommended. For groups of stars a comet eye-piece, power 25 or 30 and field about 1½°, will be best. The latter would also be well adapted for comet-seeking, and for general views of large comets, nebulae, and parts of the Milky Way.

The Variable Star Algol (Beta Persei).

THIS star is usually a little fainter than 2nd mag., and remains so for about 2d. 11h., when it rapidly declines in lustre, and in about 4½ hours arrives at a minimum of 3¼ mag. There is then a revival of its brilliancy, and in 5½ hours it reaches its normal magnitude of 2¼. The following are the computed times

of minima in 1914. From the end of March until the beginning of August the star is not favourably visible, being immersed in the vapours and twilight over the northern horizon; but in the autumn and winter months it may be viewed with advantage. Astronomical time is employed in the table.

THE Solar or Planetary System consists of the Sun, with eight planets circulating around him at varying distances, in oval figures not greatly differing from the circular form. Six of these planets have other secondary and smaller bodies circulating round their primary, forming separate systems, and all receiving their light and heat from the Sun.

The periodic comets, which return to perihelion at regular intervals and have the Sun in one focus of their elongated ellipses, are also members of the Solar System, but shine chiefly by their own light.

THE SUN.

The surface of the Sun presents a mottled appearance, with here and there in definite positions certain black spots, the nature of which is not yet certainly known. They vary in numbers, reaching a maximum about every 11 years. They are found in the region about the Sun's equator. As the Sun rotates on its axis in 25 days 8 hours, the spots appear to pass across the disc in 13½ days, moving from east to west, disappearing at the western edge, and, supposing the spot to last long enough, reappearing again at the eastern limb in 13 or 14 days. They are of irregular shape, vary greatly in size, and consist of two distinct parts, a nucleus quite black and a penumbra less dark, the nucleus being at a lower level than the penumbra, and both lower than the bright surface.

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon, as in a total solar eclipse, certain red prominences are seen projecting from the Sun's limb, consisting of masses of glowing hydrogen gas which arise from the chromosphere, sometimes to a height of nine or ten times the diameter of the Earth. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscope. Another appendage to the Sun, extending to an immense distance, is called the corona, and can at present only be seen during total eclipses of the Sun. The lower portion consists of a pale green light containing hydrogen, the upper a beautiful mass of silvery white light, in form of feather-like plumes with dark spaces between. These plumes have sometimes been traced to twice the Sun's diameter. The corona does not always appear of a constant form, but has been observed to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun-spots.

The distance from the Sun to the Earth is about 93,000,000 miles. In comparing distances expressed in such high numbers it is not very easy to get a clear idea of their relation to each other. It will answer the purpose better to take this distance as the unit and express all others in terms of it.

Mercury is the nearest planet to the Sun, and is the smallest in the system. Its mean distance in terms of the unit being 0.387, the next is Venus at mean distance 0.723, then comes the Earth at the unit distance.

If we could observe the planetary system from the Sun the movements of the planets would appear extremely simple, but as we must observe them from the Earth—itsself a planet and, therefore, a moving observatory—the motions appear most complex, sometimes direct and sometimes retrograde; though they are all moving in one direction round the Sun.

As seen from the Earth, all the heavenly bodies appear to rise in the east and set in the west, but we know that this appearance is

caused by the Earth turning on its axis from west to east, which makes the Sun, Moon, and stars apparently move in the opposite direction.

Mercury and Venus, moving in orbits lying between the Sun and Earth, will never be seen very far from the Sun, being sometimes to the east of it as evening stars, and then west as morning stars. Their apparent excursions are technically known as *Elongations*, east or west, the times and distances of which are given on the third page of each month. Owing to the considerable ellipticity of the orbit of Mercury, the amount of the greatest elongation will be found to vary considerably—it may be as little as 16°, and as great as 29°. His period of revolution round the Sun—in other words, his year—consists of 88 solar days, and he turns on his axis in the same time: he therefore always presents the same face to the Sun, like the Moon with respect to the Earth, and also, like the Moon, exhibits similar phases to the Earth, like the Moon in her first quarter if the elongation be in the east, and like her last quarter if in the west, passing from new to full while moving from inferior to superior conjunction, and from full to new again while passing from superior to inferior conjunction.

A planet is said to be in conjunction with another body when it has the same longitude and is seen in the same direction in the heavens. It is obvious that in the case of the inferior planets, Mercury and Venus, the conjunction will be of two kinds—the one when the planet is between the Earth and the Sun, called inferior conjunction, and the other when in the opposite part of its orbit, with the Sun between the planet and the Earth, called superior conjunction.

The nearness of Mercury to the Sun makes him a difficult object to pick up except under favourable circumstances, such as when he sets an hour and a half after the Sun, and rises an hour and a half before the Sun. He may on these occasions be identified by his strongly sparkling light and his movement with regard to the stars.

Venus, nearly twice as far from the Sun as Mercury, is almost exactly the same size as the Earth, and presents phenomena similar to those of Mercury, only that, being farther from the Sun and nearer to the Earth than Mercury, her angles of elongation exceed those of Mercury, extending to 47°. Her year consists of 225 days. The disc of Venus is not telescopically interesting, as owing to her dense cloud-laden atmosphere but very few markings are visible, rendering the determination of her axial rotation uncertain. By many astronomers her day is supposed to be very nearly equal to that of the Earth. At the time of her greatest brilliancy Venus appears as a beautiful crescent, like the Moon when about 3½ days old.

THE MOON.

Our own planet has one Moon, the mean distance of which from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than

we can of any other member of the solar system. When viewed through a telescope, charts of very great accuracy can be made of her surface, having no appreciable atmosphere to obscure the more delicate markings. With a powerful telescope the Moon may be brought apparently within about 500 miles, so that any changes which occur over large tracts of country could be easily distinguished: cities perhaps from cultivated fields. The Moon's surface shows signs of tremendous volcanic action; craters are found all over the surface, varying greatly in size and crowded closely together. The most conspicuous of these craters is Tycho, with a breadth of 50 miles and 20,000 feet deep, having a central cone about 5,000 feet high. It will be noticed that we only see one side of the Moon, and from this fact we infer that she must turn on her axis in the same time that she turns round the Earth. There being no sign of water or vapour on her disc, and consequently no atmosphere, the surface must be exposed to the most violent changes of temperature: heated in the lunar day of half a month to a very high temperature indeed, and in the other half subjected to cold equal to that of interstellar space. Her diameter is 2,160 miles, or a trifle more; and her rate of motion through the firmament $13^{\circ} 10' 35''$ per day and $32' 56''$ per hour. Thus she travels over a space slightly exceeding her own diameter in one hour. The actual time she takes to move around the Earth is $27^d. 7^h. 43^m. 11^s. 46^{\text{th}}$, but the time from one New Moon to another is $29^d. 12^h. 44^m. 3^s$. When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. Quite a small instrument will show the chief "seas," plains, mountain ranges, ring-plains, and crater-pits. We see, as it were, a cold dead world apparently devoid of water or atmosphere. Deep down in the clefts and valleys it is possible that some small amount of moisture may exist, and with it a very low form of vegetation, but it is certain that the water has long since left the regions popularly known as seas. Owing to the absence of moisture all details on the lunar surface stand out with startling distinctness, and the shadows of the mountain peaks are sharp and clear.

Plato is, perhaps, the best known ring-plain, and is easily identified by amateurs. It lies at the extreme lower (N.) edge of the dark greyish sea called the Mare Imbrium. *Plato* is 60 miles in diameter, the walls average 3,800 feet, and the highest peak nearly 7,300 feet.

Tycho is the lunar volcano from which radiate the wonderful systems of bright streaks about whose origin and meaning we know so little. These rays, as they are often called, can be best seen at Full Moon, when they cross almost the entire visible hemisphere of our satellite.

The plane in which the Moon moves is inclined about 5° to the Ecliptic and cuts it in two opposite points, called her nodes. These points are subject to a motion round the Ecliptic, making the complete circuit in about 19 years; so that after every 19 years the eclipses recur in the same order. Owing to this tilt the Moon will have passed over a zone in the heavens of 10° in the course of 19 years, eclipsing, or occulting, as it is called, all the stars and planets which lie along a line joining the Earth, Moon, and star or planet. When the Moon passes between the Earth and Sun and the three bodies lie on a line joining their centres, there will be an eclipse of

the Sun, which may be either total or annular—total if the Moon happens to be near perigee, and annular if near to apogee; the Moon in this latter case being farther from the Earth, looks smaller than the Sun and leaves at the middle of the eclipse a ring of light from the Sun round the dark circular disc of the Moon. When the centres of the Sun and Moon are not coincident, but differing by something less than the Moon's semi-diameter, the eclipse will be partial. Solar eclipses are only total at certain places on the globe, and will be partial in localities off the line of totality, owing to the change in the observer's position placing the Moon out of the direct line between him and the Sun. Total eclipses of the Sun are very rare in this country; there will be none till the year 1927.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon, causing a lunar eclipse, which may be either total or partial as in the case of Solar Eclipses, but with this difference—that the eclipse will be visible alike to all observers where the Moon is above the horizon at the time. The obscuration of the Moon's disc is hardly ever complete, but owing to the Sun's light being scattered by the clouds in the Earth's atmosphere, the Moon appears usually as a dark copper-coloured disc. From what has been said above, it will be seen that solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon.

When the Moon is full in that part of the Ecliptic called the vernal equinox, her motion towards the north is most rapid, and in north latitudes nearly parallel to the horizon; then her tendency to rise later each night is compensated by the northward part of her motion, and she will in that case rise about the same time, nearly full, for two or three successive nights at the time of sunset, and thus give light to get in the harvest. Hence the full Moon which happens nearest to September 22 is called the Harvest Moon. In the United Kingdom, however, the harvest is usually gathered in some three or four weeks before this time.

Beyond the advantage we get from her light, the Moon is most important to us as a tide-producing body.

It is not possible within the limits assigned to this article to enter minutely into all the causes which produce the complex phenomena of the tides, though the most prominent factors may be explained without having recourse to the higher mathematics necessary to a full comprehension of this difficult subject.

The Newtonian law of gravitation teaches us "that every particle of matter in the universe attracts every other particle, with a force varying inversely as the square of their mutual distances, and directly as the mass of the attracting particle."

Suppose the Earth to be a sphere covered by a sea of uniform depth, and the Earth and Moon relatively at rest, then the layer of water immediately under the Moon will be attracted more per unit of mass than the Earth, and heaped up towards the Moon; the layer of water on the opposite side of the Earth will be attracted less than the solid Earth per unit of mass: being further off, the water here will be heaped up away from the Earth and Moon. At these opposite places there will be high water, though in this latter case not quite so high as in the former. The sea will thus have very nearly the form of a prolate spheroid,

with the major axis passing through the Earth and Moon. At places situated on a circle 90° from the major axis there will be low water.

As the Moon revolves around the Earth, and the Earth rotates on its axis, this figure never has time to perfect itself, and an imperfect form of it travels round the Earth in a lunar day, which is longer than a civil day by about 50 minutes. So that high water occurs, generally speaking, about that time later at the same place each day.

Besides the Moon, the Sun exerts a considerable disturbing force, producing tides exactly similar to those produced by the Moon, but smaller in effect, for although the mass of the Sun is immensely greater than that of the Moon, yet his distance from the Earth is such that the ratio of his tide-producing force to that of the Moon is as 1 to $2\frac{1}{4}$. The observed tide, therefore, is the effect of the superimposed lunar and solar tides. Calculation shows that the difference between the major and minor axes of the spheroid due to the Moon alone amounts to 58 in., and according to the ratio above would make the same difference due to the Sun alone about $25\frac{1}{4}$ in.

The following heights of tides on the Thames, with the distance of their respective stations from the mouth of the river, are from *Phil. Trans.* cxxiii. 204:—

	Height.	Distance.
	ft. in.	m.
London Docks.....	18 10	60
Putney	10 2	67½
Kew	7 1	73
Richmond	3 10	76
Readington	1 4½	79

The lunar tides, according to the results of recent investigation, are by friction slowly interfering with the Earth's rotation, and therefore lengthening our day. This must go on through countless centuries till the Earth's time of rotation is equal to a lunation, when the lunar tides will no longer exist, and our seas be disturbed only by the weak action of the solar tides.

THE EARTH.

The Earth in its orbital motion round the Sun has the effect of making the latter body apparently describe a complete revolution among the stars in the course of a year, half of its path being above the Earth's equator, as in summer, and half below, as in winter. The Sun does not, of course, move, but the Earth moves in a direction opposite to the apparent motion of the Sun, in a plane, called the Ecliptic, passing through the Sun's centre. The Earth's equator is inclined $23\frac{1}{2}^\circ$ with respect to the Ecliptic, and this tilt is which causes our seasons. The Earth's equator, therefore, in consequence of this tilt, cuts the Ecliptic in two opposite points, the vernal and autumnal equinoxes; and when the Sun is at either of these points the days and nights all over the globe are of equal duration. The Earth travels over one half of the Ecliptic in summer, and the other half in winter. It will be noticed in comparing the times of the beginning of the seasons, that in the summer half, from spring to autumn, the Earth is delayed in traversing this part some eight days longer than the winter half, from autumn to spring. This is caused by the eccentricity of the orbit and the law of areas—a law which requires that the imaginary line joining the Earth and Sun

shall sweep over equal areas in equal times. The Earth when farthest from the Sun, as at the summer solstice, must move more slowly than at the winter solstice, when the radius vector, as this imaginary line is called, is shorter. In relation to the Sun the Earth is a very small body, the diameter of the Sun being 866,400 miles, that of the Earth only 7,918 miles. The Earth revolves around the Sun, in the Ecliptic, with an average velocity of 18 miles a second, and rotates on its axis once in 23 hours 56 minutes. Mercury and Venus, being nearer to the Sun, have a velocity of 29 and 21 miles a second respectively.

The Ecliptic is the fundamental plane to which the planets' places are generally referred, the planes of their orbits being inclined more or less to this fundamental plane; the longitude is measured along the Ecliptic from the vernal equinox, the latitude to the north or south of the Ecliptic. Astronomers also refer their observations to another system of co-ordinates. Taking the Earth's equator as the fundamental plane, they measure Right Ascension from the same point of intersection along the equator, and Declination north or south of it. These latter being derived from observation, the corresponding celestial longitude and latitude can be deduced from them by calculation.

The inclination of the planetary orbits to the Ecliptic is not large, the greatest being that of Mercury, 7° ; Venus, $3\frac{1}{2}^\circ$; Saturn, $2\frac{1}{2}^\circ$; Mars, Jupiter, and Neptune, rather more than 1° ; and Uranus, $\frac{1}{2}^\circ$. The point of intersection of the equator with the Ecliptic is not stationary, but has an annual motion of $50''$, thus causing the Right Ascensions and longitudes of the stars to increase annually by this amount, called the precession of the equinoxes. The Ecliptic is divided into twelve divisions of 30° , called the signs of the Zodiac, and named after the constellations. This sometimes causes a little confusion, because, at the present time, the precession has carried this point from the constellation of Aries into Pisces. In the time of Hipparchus, B.C. 125, it was situated in Aries, and astronomers still speak of the first point of Aries, by which they mean the first sign of the Zodiac, and not the constellation of Aries. This precessional movement will carry the equinoctial points completely round the Ecliptic in 26,000 years, called the Annus Maximus. The inclination of the planetary orbits to the Ecliptic being but small, it will occasionally happen that the inferior planets, Mercury and Venus, when near their nodes, and passing between the Earth and Sun, will be seen projected as black spots on his disc. These transits, as they are called, take place more frequently in the case of Mercury than Venus. The transits of Venus are useful in determining the parallax of the Sun—that is, his distance from the Earth. Mercury might be used for the same purpose, but the conditions are far less favourable. Such transits may be considered as particular cases of eclipses, but from the smallness of the planetary discs, as compared with that of the Sun, no sensible obscuration of the latter is produced.

MARS.

The next planet is Mars, moving in an ellipse with a mean distance from the Sun of 1·524, and having a diameter rather more than half that of the Earth. His year consists of 687 days, and period of rotation, or day, equals

24h. 37m. Mars, like Mercury and Venus, exhibits phases, but in a much less degree than the inferior planets. He is never seen in crescent phase, and only gibbous to the extent of one eighth of his disc; the maximum occurring when the planet is in quadrature. The other superior planets are too far away to show any appreciable phase.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable his rotation period to be well ascertained, besides white spots at the poles of rotation. These are supposed to consist of snow—a reasonable supposition if, as is probably the case, Mars has a considerable atmosphere. When it is summer to the Martians in the northern hemisphere, the white spot about that pole dwindles considerably in extent, if it does not disappear entirely. The continents and seas, as the markings are called, have been charted and their positions accurately laid down. Many excellent photographs of Mars have also been obtained showing the white polar spots and other markings very plainly.

In 1877 Professor Asaph Hall discovered that Mars was attended by two very small satellites, both too faint to be seen except in the most powerful telescopes. The outermost, Deimos, revolves in 30 hours 18 minutes; and Phobos, the larger and nearer the planet, takes only 7 hours 30 minutes, or less than one-third the time of the rotation of its primary. In consequence of the rapid motion of the inner satellite a very interesting appearance would be presented to an inhabitant on Mars; it would be seen to rise in the west and set in the east twice in the course of one night, while the outer satellite would revolve in the opposite direction—from east to west. Mars is an interesting object for telescopic study, as his actual surface may be seen. Dark and light patches, long dark streaks—often called “canals”—and white polar caps are amongst the most prominent and easily distinguished features on his disc.

ASTEROIDS.

Between Mars and the next conspicuous planet, Jupiter, there are a number of small planets, or asteroids, amounting at the present time to about 700. Of this number Vesta, Juno, Ceres, and Pallas are the larger; the largest, Vesta, when in opposition, being just visible to the naked eye. Her diameter is 239 miles. Her light-reflecting capacity is very great, being the most brilliant of all the asteroids.

The periodic times of their revolutions vary considerably, amounting on an average to about 1,600 days, or $4\frac{1}{2}$ years. Some of the orbits are very oval and the inclination of their planes varies considerably; in the case of Pallas it amounts to 35° , that of Juno being only 13° . Many of these asteroids are less than 10 miles in diameter, and they are probably nothing more than great masses of rock flying round the Sun. One of the more recently discovered of these small bodies is named Eros, which at some oppositions approaches nearer to the Earth than Mars does at any time, thus affording the best opportunity for the determination of the solar parallax.

The distances of the planets from the Sun are observed to be connected by a curious progression known as *Bode's Law*, that holds good approximately for all of them except Neptune, which it would make too far from the Sun. According to this law there ought to be another planet in the space between Mars and Jupiter. Although

this law is quite empirical, and only roughly true, it led astronomers to explore the region between Mars and Jupiter, which resulted in the discovery of Vesta, Ceres, Juno, and Pallas, and subsequently of the vast number at present known.

It has been suggested that these bodies, very small as contrasted with the other members of the solar system, may be the result of the destruction of a large planet originally circulating between Mars and Jupiter, which had become shattered by some catastrophe scattering its fragments in all directions. One of the difficulties in accepting this explanation is that if all of the fragments of the exploded planet started from the same place their orbits should have a point of intersection with the Ecliptic common to them all, which is not now the case.

JUPITER.

The next planet, Jupiter, distant from the Sun 5.20 times that of the Earth, is the largest planet in the system, having a diameter eleven times that of the Earth. His year is equivalent to twelve of our years, and his day 9h. 56m. long. Though so much larger than the Earth, his density is but $\frac{1}{4}$ th of the latter. His orbit is only inclined $1^\circ 20'$ to the Ecliptic. On viewing Jupiter through a telescope the first thing that strikes the observer is that his disc is not circular, but oval, the polar diameter being 84,574 miles and the equatorial 90,190 miles.

This form, of an oblate spheroid, is due to his rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree. Jupiter has four principal satellites about the same size as our moon. They were the first celestial objects discovered with the telescope, by Galileo, its inventor, in the year 1610. Their orbits are but slightly inclined to that of Jupiter, and in consequence eclipses of the three inner moons occur every lunation, the shadow of the planet being large as compared with their distances. As seen from the Earth, before opposition, the eclipses will take place when the satellites are west of Jupiter, and after opposition on the east of the planet. The motions of the satellites are eastwards. Besides the eclipses of the satellites they are seen at times to transit the disc of the planet, with their shadows, and are sometimes occulted, behind his disc. These four principal moons can be observed with a good field-glass.

The disc of the planet when viewed through a good telescope presents a very interesting appearance; the bright belts, variously coloured and shaded, are full of detail. They are supposed to be clouds formed by winds analogous to our trade winds, and lie parallel to his equator. There is one remarkable feature—a large oval spot—which has been visible for many years situated partly within a hollow on the southern equatorial belt of Jupiter. Its rotation period has varied in different years, increasing from 9h. 55m. 33s. in 1879 to 9h. 55m. 42s. in 1901, when irregularities of striking character set in after developed, and these were probably due to the disturbing action of a large dusky spot in nearly the same latitude. Since the year 1901 the red spot and hollow in the belt have exhibited a surprising increase of velocity, the rotation period having decreased to about 9h. 55m. 30s. In three years the spot has lost nearly 100° longitude, being in 263° (June, 1913), while it v

1° at midsummer, 1910. This corresponds to westerly displacement of nearly 70,000 miles. A small telescope will show the hollow in the belt, though the red spot itself is extremely faint and not to be so readily detected. It will be near the central meridian of Jupiter at following times, though it is impossible to make really accurate predictions owing to the irregular motion of the marking:—

APPROXIMATE TIMES OF TRANSIT OF GREAT RED SPOT ON JUPITER, 1914.

TRANSITS OF THE THIRD AND FOURTH SATELLITES OF JUPITER (GANYMEDE AND CALLISTO).

These phenomena are very interesting, and visible in small telescopes, the satellites resolving themselves into dark spots when crossing the disc of Jupiter. The shadows are visible at about the same times, but precede the satellites before opposition and follow them afterwards. The list comprises those transits either partly or wholly visible at Greenwich:—

Date.	Satellite.	Time.		h. m.	
May 3	III.	12	35	to	16 12
June 5	IV.	9	23	to	14 15
" 15	III.	11	47	to	15 25
" 22	III.	15	23	to	19 1
July 28	III.	8	25	to	12 4

SATURN.

The next planet we come to is Saturn, distant from the Sun $9\frac{1}{2}$ times that of the Earth, having a diameter of 76,470 miles, or nearly nine times that of the Earth; his day consists of 10 hours 46 minutes, and his year $29\frac{1}{2}$ of our years. His rings consist of three bright ones and one interior dusky ring, through which the body of the planet can be seen. Some recent observations seem to show that another dusky ring, outside the bright ones, also exists. The rings appear to consist of three flat annular discs of extreme thinness, inclined at 28° to the Ecliptic, and extending to a distance a little greater than the radius of the planet. It has been shown that these rings cannot be a coherent mass, or in one piece, whether solid or liquid, as in that case it

would be difficult to account for their stability. On the contrary, they probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Of the three bright rings the middle one is the brightest. When the Earth is in the plane of the rings they would be seen edgewise, but owing to their thinness they would be invisible to us except in the field of a good telescope. Also when the Sun and Earth are on opposite sides of this plane the rings will be invisible. At the present time the rings are opening out. On p. 83 will be found a table showing the dimensions of Saturn's outer ring as seen from the Earth. Belts like those on Jupiter may be seen on Saturn, but not of so pronounced a character. His figure also shows a bulging out of his equator, the ratio of the polar to the equatorial diameter being as 14 to 15.

Saturn has ten satellites, situated outside the rings, some of which are visible in low-power telescopes. Titan, the largest, is about $1\frac{1}{2}$ times the size of our moon, whilst Iapetus is about the same size as our satellite. Phoebe moves in a retrograde direction—that is, like the hands of a watch—and therefore contrary to the other satellites of this planet. The seven nearest to the planet move in planes nearly coincident with that of the rings, but the eighth, Iapetus, is inclined to it at an angle of 10° . Saturn moves in his orbit at the rate of only six miles a second.

URANUS.

The next planet we come to is Uranus, rather more than nineteen times as far from the Sun as is the Earth, and $4\frac{1}{2}$ times its diameter. His orbit is approximately circular, and nearly coincident with the Ecliptic. His year is equivalent to 84 of our years, and he has a velocity in his orbit of only $4\frac{1}{2}$ miles in a second.

Uranus has four satellites, which differ from those of the other planets in that they revolve round the primary in orbits nearly perpendicular to the Ecliptic, and in a retrograde direction (westerly), contrary to that of other planets. The satellites of Uranus are visible only in the large telescopes found in the chief observatories of the world. By recent spectroscopic observations on the first and second limbs of the planet Professor Lowell has, from measurement of the displacement of the lines in the spectra, deduced a value of 10h. 45m. for the period of rotation.

NEPTUNE.

The last planet of our system, Neptune, is distant from the Sun thirty times that of the Earth, with a diameter $5\frac{1}{2}$ times greater—slightly larger than Uranus. Neptune has one satellite, moving, like those of Uranus, in a retrograde direction, in an orbit inclined 35° to the Ecliptic. His year is equivalent to 165 of our years, and velocity in orbit a little more than three miles a second.

Not much is known as to the physical appearance of these two planets, owing to the apparent smallness of disc, in consequence of their great distance from the Earth. For the same reason their periods of rotation are not certainly known. No belts or spots have been glimpsed on Neptune's disc, but probably he and Uranus resemble Jupiter in this respect. Bode's Law would make the distance of Neptune greater considerably than is found to be the case, leading to the suspicion that there may be another planet still more remote.

Of the conditions to which the planets are exposed, owing to their distance from the Sun and the possible effect any atmospheres they may have would produce on their temperature, we know but little. To Mercury the Sun would appear seven times larger in area than to the Earth, while to Neptune only $\frac{1}{100}$. The temperature on Mercury, we should imagine, would be extremely high, and that on Neptune nearly equal to the temperature of interstellar space—nearly 600° Fahrenheit below the freezing point of water. The internal heat of a planet may be so much greater than that of the earth, and its atmosphere so dense as to prevent in a great measure the radiation of the internal heat into space, that the temperatures of both interior and exterior planets may not be so widely different as would be the case if they depended solely on the Sun's distance. It is probable that Jupiter is still very hot, and, like Saturn, has an extensive atmosphere. Generally, as we go outward from the Sun, the planets decrease in density. Taking the density of the Earth as unity, that of the Sun is $\frac{1}{4}$, Mercury $\frac{1}{12}$, Venus $\frac{1}{84}$, Mars $\frac{1}{72}$, Jupiter $\frac{1}{24}$, Saturn, $\frac{1}{11}$, Uranus $\frac{1}{20}$, and Neptune $\frac{1}{15}$.

COMETS.

In addition to the planets, there are other interesting objects belonging to the solar system, called comets. Some of these revolve in elliptical orbits, and their periodic times range from $3\frac{1}{2}$ years to more than 100,000 years. Others move in parabolic courses and do not repeat their visits to the Sun.

Comets revolving around the Sun in comparatively limited periods are not numerous, but our knowledge of them is constantly becoming comprehensive and accurate. The "giant planet" has an abundant family of comets more or less under his sway, the outer part of their orbits lying near his path and in a position to be considerably influenced by his strong attractive power. These small periodical comets revolve around the Sun in periods from $3\frac{1}{2}$ to 9 years, and deserve special notice, as their orbits are well known and predictions of their reappearances can be accurately made.

The majority of these short-period comets extend their flights to a little distance outside the orbit of Jupiter, and approach the Sun to about the average distance of Mars. It appears that though new comets of short period are being introduced by means of planetary perturbations (Jupiter being mainly responsible), there are others which meet with disturbances sufficiently powerful to endanger, and sometimes terminate, their visible existence. Biela's double comet has not returned during the last 60 years, and its material seems to have been distributed into a stream of November shooting stars. Brorsen's comet is another missing member of the Jovian family of comets, and may have been dispersed in the same manner as Biela's. The materials of which these presumably lost bodies were composed no doubt still exist and pursue their orbital revolutions in regular periods, but it is doubtful whether they will ever be viewed again under the same aspect as formerly. During the years from 1880 to 1896 no less than 16 new comets of short period were discovered. The following are the approximate dates when members of the Jovian group may be expected to reach perihelion:—

	Expected Return.	Period in Years.	Name of Comet and Year of Discovery.
1914.	June.....	5'68 ...	Tempel-Swift... 1869
	July.....	7'59 ...	Metcalf..... 1906
	August.....	6'87 ...	Giacobini..... 1900
	November.	3'30 ...	Encke..... 1786
1915.	March.....	5'25 ...	Tempel..... 1873
	July.....	5'80 ...	Pons-Winnecke 1819
	July.....	8'53 ...	Swift..... 1889
1916.	March.....	7'19 ...	Swift..... 1895
	May.....	7'42 ...	Denning..... 1894
	May.....	6'53 ...	Perrine..... 1896
	June.....	6'48 ...	Daniel..... 1909
	June.....	8'68 ...	Denning..... 1881
	July.....	6'42 ...	Spitaler..... 1890
	October ..	6'64 ...	Giacobini..... 1866
1917.	January ..	5'308...	Barnard..... 1884
	March.....	6'686...	D'Arrest..... 1851
	June.....	5'456...	Brorsen..... 1846
	November.	7'100...	Brooks..... 1889

These periodical comets move in elliptic orbits not much inclined to the Ecliptic. The great majority of them travel in *direct* courses, and in these respects present an analogy to the planets, but of those that move in very long ellipses, or parabolas, about two-thirds have a retrograde (westerly) motion.

The tails seem to be formed by jets thrown out towards the Sun, which appear to curve back and so form the tail. In the life of a comet the tail sometimes appears to undergo very rapid and curious changes. On examination of the light of comets with the spectroscope, it appears to consist of carbon in various forms, and cyanogen has also been detected. These materials exhibit themselves as bright bands. Generally a continuous spectrum is shown as a background to the bright lines, from which we infer that a part of the comet's light is due to reflected sunlight. Comets' tails are generally directed away from the Sun, as if acted upon by some repulsive action—perhaps light.

METEORS.

Another class of objects which belong to the solar system are the meteoric streams, giving rise to occasional showers of meteors, falling stars, or fire-balls, as they are differently called, but which represent one and the same class of objects, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form impressive showers. There were brilliant and plentiful displays of the November Meteors, called Leonids, in the years 1799, 1833, 1866, 1867, 1868, and less striking exhibitions of the same objects in 1901 and 1903. It is not to be expected, however, that this particular system of falling stars will again show itself prominently until the years 1933 to 1937. The meteors return numerously every 33½ years, but it appears that just before their last visit the planet Jupiter disturbed their orbit so much that the main collection of meteors was enabled to avoid encountering the Earth, and the observed showers were more scanty than usual. But some of the meteors are visible every year at the middle of November. This meteoric system appears to be identical with, and its material actually derived from, a periodical comet, which was discovered by Tempel in December, 1865. In the present year very few of these Leonid meteors are expected in our skies, but observers

should maintain an attentive watch for them at the important time. The maximum date is usually the morning of November 15 or 16, but it varies a little owing to leap year. Whenever any conspicuous meteors are seen, whether during a rich shower or on an ordinary night, their paths amongst the stars should be carefully and accurately recorded. The same advice applies to occasional fireballs, which often shine suddenly and startle spectators by lighting up the heavens very vividly for one or two seconds. Observers should always remember that mere descriptions of the brilliancy or general situation of these phenomena are practically useless for scientific purposes. What is required by those who critically discuss such observations relates specially to the exact path of the object in the heavens and to the duration of its visible flight. The following is a table of the radiant points of some of the more prominent meteoric streams visible during the year 1914:—

No.	Epoch.	Radiant Point. R.A. Dec.	Name of Shower.
1	January 2-4 ...	230° 53	Quadrantids.
2	January 11	220° 13	ζ Bootids.
3	January 25-29 ..	131° 32	ι Canerids.
4	Feb. 5-23	75° 41	α Aurigids.
5	February 20	263° 36	ρ Herculis.
6	Feb. 22-28	155° 14	σ Leonids.
7	March 1-4	166° 4	τ Leonids.
8	March 13-24	161° 58	β Ursids.
9	April 12-24	208° 10	α Virginids.
10	April 19-30	201° 9	ο Virginids.
11	April 20-22	271° 33	Lyrids.
12	May 1-6	338° 2	γ Aquarids.
13	May, June, July ..	253° 21	α Scorpiids.
14	May 18-26	246° 29	Coronids.
15	May 26-31	310° 80	α Cepheids.
16	June 10-28	335° 57	δ Cepheids.
17	June and Aug.	312° 61	δ Cepheids.
18	June-Sept.	303° 24	η Sagittids.
19	July 1-2	270° 30	ο Herculis.
20	July 6-Aug. 22 ..	284° 13	λ Aquilids.
21	July 8-13	316° 31	ε Cygnids.
22	July 6-Aug. 16 ..	315° 48	α Cygnids.
23	July 15-28	304° 12	α Capricornids.
24	July-Aug.	280° 57	β Draconids.
25	July 15-27	24° 43	γ Andromedids.
26	July 4-Aug. 4	47° 43	α-β Persids.
27	July 22-27	335° 51	Lacertids.

No.	Epoch.	Radiant Point. R.A. Dec.	Name of Shower.
28	July 25-30	339° 11	δ Aquarids.
29	August 10-12 ...	45° 57	Persids.
30	August 5-16 ...	292° 53	κ Cygnids.
31	Aug.-Sept. 16 ..	353° 11	ψ Aquarids.
32	Aug. 12-Oct. 2 ..	74° 41	α Aurigids.
33	August 15-25 ...	291° 60	ο Draconids.
34	Aug. 21-Sept. 21	62° 37	ε Persids.
35	Aug. 20-Sept. 10	334° 72	β Cepheids.
36	Sept. 3-21	61° 49	μ Persids.
37	Sept. 15-30	14° 6	ε Piscids.
38	Sept. and Nov.	64° 22	ε Taurids.
39	October 3-4 ...	133° 79	Cameloparids.
40	October 8-16 ...	44° 58	η Persids.
41	October 11-24 ...	40° 20	ε Arietids.
42	October 17-24 ...	92° 15	Orionids.
43	October 23	100° 13	ε Geminids.
44	Nov. 2-3	55° 9	ε Taurids.
45	Nov. 13-15	150° 23	Leonids.
46	Nov. 13-28	155° 40	Leo Minorids.
47	Nov. 17 23	25° 43	Andromedids.
48	Nov. 23 Dec. 1 ..	193° 73	χ Draconids.
49	Nov. 30-Dec. 9 ..	162° 58	β Ursids.
50	Dec. 1-14	108° 33	Geminids.
51	Dec. 7-12	119° 29	α Geminids.
52	Dec. 21-25	166° 33	ξ Ursids.

The Persids (No. 29 in the foregoing list) display some singular characteristics, for they probably continue visible for more than a month, during which period their radiant point exhibits a diurnal motion of about 1° to the E.N.E. The places of this radiant on alternate days during about four weeks of the chief activity of the shower are as follows:—

DATES AND POSITIONS OF PERSEID RADIANT.

Date.	Radiant. R.A. Dec.	Date.	Radiant. R.A. Dec.
July 19	18° 9' 50.5	Aug. 4	36° 4' 55.5
" 21	20° 8' 51.1	" 6	38° 9' 56.0
" 23	22° 8' 51.8	" 8	41° 5' 56.5

† The period of rotation of Neptune and Venus has not been definitely ascertained.
 § The numbers in this column refer to the mean distances at Inferior Conjunctions for the Inferior Planets; at Opposition, for the Superior Planets.

The Stellar System.

FAR beyond the confines of the Solar System we come to the Stars, apparently scattered about without any particular plan. We note also that "one star differeth from another star in glory."

THE CONSTELLATIONS.

In early times the stars were grouped into constellations, named after a fanciful resemblance to some animal or mythological personage, the individual stars in the group being distinguished by the letters of the Greek alphabet, in order of brightness, so that α Orionis was meant for the brightest star in that constellation, β for the next brightest, and so on. As by the help of the telescope more stars were observed, it was not possible to continue this method. At the present time the numbers of the stars in the various catalogues are generally used to identify particular stars. In England some eight thousand stars are visible to the naked eye. The number visible in the whole heavens is about fourteen thousand. This includes stars down to the sixth order of magnitude—the faintest stars thus visible. For stars below the sixth magnitude a telescope would be required, and with every increase in their power the number of stars is enormously multiplied. Since the introduction of photography still more have become known, till the number becomes almost beyond counting.

An object, viewed in the field of a telescope, which is so faint as to be seen only with difficulty, cannot be held long under inspection in consequence of the fatigue of the optic nerve; but the photographic film feels no such fatigue, and exposures can be prolonged till an image is formed, for hours if need be. In this way a great number of objects have been indirectly observed which in all probability no human eyes will ever directly see. The most superficial observer of the stars must have noticed that they describe circles about the pole, and that at any place, a star whose distance from the pole is less than the complement of the latitude will be a circumpolar star, and never set to that place.

VARIABLE STARS.

Although the stars generally shine with uniform brightness, there are among them some remarkable exceptions to this general rule. The earliest known, and the most remarkable amongst this class of stars, is one situated in the constellation Cetus, and known by the name of α Ceti, or Mira Ceti. It has a period of nearly 331.6 days; that is to say, it goes through its cycle of variations in that length of time, continuing for about twelve or fourteen days at its maximum brightness, which has, at some of its maxima, reached to the second order of magnitude; it then goes on decreasing for some three months until it becomes invisible, in which condition it remains for five more months, when it again goes on increasing to the end of the period, when the maximum is again reached; but the order of magnitude is not always the same at successive maxima. The month of October is the best time for observing it. Quite recent observations seem to show that this star has now settled down to the 8th magnitude, after having exhausted its changes of magnitude. It will be found in R.A. 2h. 15m. 4s. and South Declination $3^{\circ} 23'$.

Another remarkable variable star is Algol, β Persei. This has a very short period—not quite three days—and has a range of magnitude from 2.2 to 3.7. On page 84 will be found a history of this star, and the times of minima throughout the year. In R.A. 3h. 27m. 34s., Declination $40^{\circ} 38' N$.

Υ Ophiuchi varies from the 6th to the 6½ magnitude, with a period of 20h. 8m. It may be observed in June, southward about midnight on the 9th. Will be found in R.A. 17h. 12m. 10s. and North Declination $1^{\circ} 19'$.

The variable star β Lyrae is remarkable in having a double period, viz., two maxima and two minima—the double period being very nearly equal to thirteen days; the difference between the maximum and minimum is only one degree of magnitude. There is another peculiarity in the changes of this star—that, although the two maxima are equal, the minima are unequal. It is situated in R.A. 18h. 46m. 54s. and North Declination $33^{\circ} 16'$. The best time for observing it is in the months of June and July. Bright lines are occasionally seen in the spectrum of this star.

The star δ Cephei is also subject to considerable variations in magnitude, passing from the third to the fifth with a period of 5½ days. In passing from the minimum to the maximum it occupies less time than that required for it to reach the minimum again—in the proportion of 38 hours to 91. It is to be found in R.A. 22h. 26m. 1s. and North Declination $57^{\circ} 57'$. August and September are the best months in which to observe it.

FIXED STARS.

Many of the so-called fixed stars are gradually changing their position in space and are said to have a proper motion, part of which is due to the motion of our star, the Sun, moving with all the planets, through space, towards a point in the constellation Hercules. There are also many cases among the stars of binary systems, where we find two stars close together, one of which describes an orbit round the other; these appear as one star to the naked eye, being too near together to be distinguished apart, some so close as to be hardly separated from the rays of the larger star. The orbital periods of many of these have been well determined. The distance from the Earth to the nearest star is so great that it can only be referred to in terms of the velocity of light, which in round numbers amounts to 186,000 miles per second; moving with this enormous velocity it would require four years and four months to reach the Earth, so that we see the star as it was that much earlier.

STAR CLUSTERS AND NEBULÆ.

Among the other apparently solitary stars we may notice groups of stars gathered close together, sometimes easily separable into individual stars, others that can only be separated in the most powerful telescopes, and some that appear as unresolvable patches of light: these last are called nebulae, and appear to consist, in some instances, of an incandescent gas, according to the evidence of the spectroscope. Of the more interesting of these mention will be found at the foot of the last page of each month in the Almanack.

COLOURED STARS.

It will be noticed that among the stars some differ from others in colour, and in the case of some of the binary stars the contrast in the colours is very marked. White stars are at a very high temperature; yellow stars at a lower temperature—our Sun belonging to this class; while in red stars the temperature is so low as to show a spectrum with broad absorption bands. Temporary stars, as they are called, sometimes burst suddenly into view, and after a time become visible as very faint stars, or disappear altogether. As our Sun is in the second class as regards temperature we may suppose that he has passed his meridian, and may perhaps, after many ages, become a dark and burnt-out sun.

The changes in some of the variable stars lead to the idea that there are dark bodies in the universe, and that their interposition between us and the bright star will account for the variability observed. As our Sun has his family of planets, we might imagine that the other suns are similarly provided, and may go on to speculate whether or no they are inhabited, and what sort of creatures they may be. There will be no harm in any amount of speculation, but we are never likely to be able to prove our speculations true.

CLOCK STARS.

Certain of the stars, whose places have been determined with the greatest accuracy, and technically known as Clock Stars, are used in determining the error of the Astronomical or Observatory Clock, which should show *oh. om. os.* when the great circle passing through the vernal equinox is on the meridian, and as the Right Ascension of a star or planet is the arc measured along the equator from this point it may be called the sidereal time of southing. The observed sidereal time of a star's southing by the clock, compared with the star's Right Ascension on pp. 82 and 83, will give the error of the clock on sidereal time.

The Mean Right Ascension for any other year may be found from this table by multiplying the annual precession by the number of years elapsed, and applying the result to the quantities given in the table. If the required date be earlier than 1913 the signs of the annual variations must be changed. In applying the precession to the declinations it must be borne in mind that N. Declination means +, and S. Declination —, and that the corrections must be applied algebraically.

Besides these Clock Stars, the Sun can also be used to ascertain the error of the clock—by observing its passage over the meridian, as in the case of the stars, or by showing equal altitudes on each side of the meridian. For all practical purposes this would probably be a sufficiently accurate method, but in observatories where calculations are made to determine the places of the Sun, Moon, and planets for comparison with their places deduced from the tables, clock errors obtained from the Sun would fail to give them with that accuracy which is possible from observation of the stars. Occasionally, during long spells of cloudy weather, when no star observations have been made, an observation of the Sun will be used for the service of the time ball at Greenwich, but only on such occasions, the stars being always used when available.

Not only is an observation of the Sun less easily taken, but the solar tables are to some extent affected with errors, which, though very small, would render the clock errors to that extent unsatisfactory.

MAGNETIC ELEMENTS.

The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and applies to Greenwich only.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in C. G. S. Units at Greenwich.	Mean Inclination or Dip of Needle at Greenwich.
1898	16 31'0	1837	67 12'0
1899	16 34'2	1842	67 10'2
1900	16 29'0	1844	67 8'5
1901	16 26'0	1848	67 6'1
1902	16 22'8	1850	67 3'4
1903	16 19'1	1850	67 0'9
1904	16 15'0	1852	66 57'2
1905	16 9'9	1852	66 55'9
1906	16 3'0	1852	66 55'17
1907	15 59'8	1853	66 56'0
1908	15 53'5	1854	66 56'3
1909	15 47'6	1853	66 53'57
1910	15 41'2	1853	66 52'37
1911	15 33'0	1853	66 52'1
1912	15 24'3	1853	66 51'8

The diurnal variation of the magnetic declination at Greenwich is about 12' in summer and 7' in winter. The needle occupies its mean position about 10h. a.m., and again about 6h. p.m., throughout the year. It reaches its most westerly position about 2h. p.m., and its most easterly position during the night or early morning, according to the season of the year. The inclination or dip also varies, from hour to hour, in a similar manner to the declination. The declination and dip are also subject to secular variations, the duration of which is not accurately known. Accidental perturbations, due to magnetic storms, affect the needles. These variations in the position of the magnets occur with great suddenness, deflecting the needle right and left with great rapidity, almost like ordinary telegraphic signalling, and are, generally speaking, coincident with the passage of great outbursts of Sun-spots across the Sun's central meridian.

SIGNS OF THE ZODIAC.

♈ Aries, the Ram; ♉ Taurus, the Bull; ♊ Gemini, the Twins; ♋ Cancer, the Crab; ♌ Leo, the Lion; ♍ Virgo, the Virgin; ♎ Libra, the Balance; ♏ Scorpio, the Scorpion; ♐ Sagittarius, the Archer; ♑ Capricornus, the Goat; ♒ Aquarius, the Water-Bearer; ♓ Pisces, the Fishes.

AN INCH OF RAIN.

THE statistics concerning rainfall are expressed in "inches," and are based upon observations recorded at the Royal Observatory, Greenwich. The expression "an inch of rain" refers to the marks upon a standard rain-gauge, the amount of rain equivalent to the distance between two such marks being represented by nearly 101 tons over an acre of land, as follows:—

An inch of rain on the surface of an imperial acre = 43,560 sq. feet = 3,630 cubic feet = 100,993 tons.

It was from observation of the sky and the varying appearance of the clouds, their colour and formation, that the ancient meteorologist formed prognostications as to the weather conditions likely to prevail at short periods in advance. He was able also to draw more or less certain inferences from the behaviour of birds and beasts—all, in some measure, sensitive to coming changes in the weather. As an instance, it may be observed that sea birds, as stormy weather comes on, fly inland in search of food; wild-fowl leave the marshy ground for higher localities; swallows and rooks fly low before and during bad weather; frogs are unusually noisy before rain; sheep huddle together near bushes and trees, and in hill countries come down to the plains at the approach of bad weather.

With the discovery of the *Barometer* in 1643, the first step towards a clearer knowledge of the great aerial ocean by which we are surrounded, and at the bottom of which we live, was made. By the movements of the barometric column we learn the weight, or pressure of the air, and can infer from these the condition of our aerial ocean, whether it be in a state of calm or storm.

The invention of the *Thermometer*, shortly afterwards, gave the means of determining its temperature. The *Hygrometer*,* for showing the amount of moisture it contained, and the *Anemometer*, for giving the direction and force of the wind, are also instruments of great importance to the meteorologist. The indications of these instruments, combined with the careful observation of atmospheric appearances, interpreted by the results of former observations, will enable the individual observer generally to predict the kind of weather that may be expected in his immediate locality for a day or sometimes longer in advance.

The principal rules in use for forecasting the weather may be briefly stated as follows:—

A rising barometer usually foretells less wind or rain, and a falling barometer more wind or rain, or both; a high barometer, fine weather, and a low one the contrary.

If the barometer has been about its ordinary height at the sea level, and is steady or rising, while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly wind, or less wind, may be expected; and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south-west; a fall of the barometer, with low thermometer, foretells snow.

With the barometer below its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north-west, north, or north-east, and continued rising foretells improving weather.

If the barometer falls and warmth continues, the wind will probably *back*, and more southerly or south-westerly winds will follow.

In northern latitudes the heaviest northerly gales occur after the barometer first rises from a very low point. A rapid rise generally indicates unsettled weather; slow rise or steadiness, with little moisture in the atmosphere, fair weather. A rapid and considerable fall signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind; though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain or snow will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

When a gale sets in from the east or south-east, and wind *ceers* by the south, the barometer will continue falling till the wind becomes south-west, when, after a lull, the gale will be renewed.

The north-east wind tends to raise the barometer most, and the south-west to lower it most.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, or both.

Predictions founded solely on the indications of the barometer and thermometer may be made with more certainty if combined with careful observation of the appearance of the sky, and the atmospheric effects peculiar to the particular locality.

A rosy sky at sunset, whether clouded or clear, a grey sky in the morning, a low dawn (that is, when the first signs of the dawn appear on the horizon), all indicate fair weather. A red sky in the morning indicates bad weather, or much wind; and a high dawn (or when the first signs of the dawn are seen above a bank of clouds) presages wind.

From the clouds we may draw the following conclusions:—Soft-looking and delicate clouds foretell fine weather, with moderate breezes; hard-edged clouds, wind; rolled or ragged clouds, strong wind. A bright yellow sky at sunset also presages wind, and a pale yellow sky wet.

Dew and fog both indicate fine weather, while remarkable clearness of the atmosphere near the horizon (causing distant objects to appear very distinct and nearer than usual) is one of the most characteristic signs of coming wet.

Daily returns, forwarded by telegraph from stations in the country, are received at the Meteorological Office, and a comparison of these, one with another, enables the officers at headquarters to draw such conclusions as furnish the weather forecasts in the daily papers.

Meteorological Observatories.

Kew Observatory, Richmond.
Supt., C. Chree, Sc.D., F.R.S.

Esksdale Observatory, Langholm, N.B.
Supt., G. W. Walker, M.A.

Valencia Observatory, Co. Kerry.
Supt., J. E. Cullum.

Director of Experiments in Upper Air, W. H. Dines, F.R.S.

* A strip of sea-weed forms a very useful hygrometer for practical purposes, provided it be not kept in a room warmed artificially. In fine weather it will keep dry and have a somewhat dusty feeling, but with an increase of moisture in the air will become moist and sticky, indicating a probable change of weather in the shape of rain.

SCIENTIFIC CHRONOLOGY is not yet a hundred years old, and in so far as it deals with the age of the world in which we live, it may be said to have its origin in the researches of geologists and ethnologists in the nineteenth century. These researches led to the discovery of extinct mammals buried under a surface which was calculated by geologists to have required many thousands of years in formation. The geological measure of time is the period occupied in the stratification of rocks, with allowances for intervals between the periods. By this measure the conjectural age of the World varies from 40 to 100 million years.

Geological Chronology.—The periods of stratification of the Earth's crust are classified by geologists as shown in the following list, each period having sub-divisions :—

- I. Eozoic.
- II. PALÆOZOIC or PRIMARY.
 - i. Cambrian.
 - ii. Silurian.
 - iii. Devonian or Old Red Sandstone.
 - iv. Carboniferous.
 - v. Permian.
- III. MEZOZOIC or SECONDARY.
 - i. Triassic.
 - ii. Jurassic.
 - iii. Lower Cretaceous.
 - iv. Upper Cretaceous.
- IV. CAINOZOIC or TERTIARY.
 - i. Eocene.
 - ii. Oligocene.
 - iii. Miocene.
 - iv. Pliocene.
- V. QUATERNARY or POST-TERTIARY.
 - i. Pleistocene or Glacial.
 - ii. Recent or Post-Glacial.

No dates are assigned to these periods, as they are too indefinite and remote for comprehension. Traces of human life are found in V. i. and ii., which correspond with the Eolithic, Palæolithic, Neolithic, Bronze, and Iron Ages of our next paragraph.

Ethnological Periods.—The terms employed by ethnologists cover periods which reach to the more recent geological divisions of time and extend to the present day. They are periods, not of time, but of culture, and are of local application only. The terms in use are :—

1. Eolithic, or Dawn of the Stone Age.
2. Palæolithic, or Older Stone Age.
3. Neolithic, or Later Stone Age.
4. Bronze Age.
5. Early Iron Age.

Of these periods the last three can be dated for Europe as follows :—

Neolithic ends about 2000 B.C.
Bronze Age ends about 1000 to 500 B.C.
Early Iron Age from about 500 B.C.

Various systems of Chronology are dealt with in alphabetical sequence in the following list :—

Abyssinian.—The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, commencing at 1 again upon the completion of each cycle. Their first year began on 29th August, 284 A.D.

Armenian.—The Armenians marked their secession from the Greek Church by adopting it as their epoch. This corresponds to 9th July, 552 A.D.

Assyrian or Babylonian.—In the eighth century B.C. the Babylonians commenced a chronology

with the era of the founder of their Empire. Their epoch corresponds to 20th February, 747 B.C.

Biblical.—The Christians of Western Europe made many calculations concerning the date of the Creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century James Ussher, Archbishop of Armagh, adopted the system, and *Ussher's Notation* was thenceforward printed in marginal notes to the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

Chinese.—In 1913 the Chinese Republic adopted the calendar of Western Europe.

Christian.—The Christian Era was first adopted in Italy in the sixth and was accepted by England in the eighth century. The years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or, more rarely, A.C. (*Ante Christum*) and A.D. (*Anno Domini*). The correlative dates of the epoch are the 4th year of the 104th Olympiad, the 753rd year from the Foundation of Rome, and the 4714th year of the Julian Period. The Christian Era commenced originally on 25th March, but in England Christmas Day was adopted as the beginning of the year from the seventh to twelfth centuries, after which time the Annunciation (25th March) prevailed until January 1 was adopted at the reform of the calendar in 1752. The reform of 1752 (see also "Roman Chronology" below) omitted 11 days from the year in order to connect the civil and astronomical years, and thenceforward the *New Style* was adopted, the previous period being known as the *Old Style*. Through the omission of the extra day in 1800 and 1900 (which were not leap years) the difference between the Old and New Styles is now 13 days. The Eastern Church employs the Old Style, and a Greek and Russian calendar for 1914 will be found on p. 97.

Hindu.—In addition to the Muhammadan reckoning there are four eras used in India. The principal astronomical system was the *Kaliyuga Era*, which appears to have been adopted in the fourth century A.D. It began on 18 February, 3102 B.C. The chronological system of Northern India, known as the *Vikrama Samvat Era*, prevalent in Western India, began on 23 February, 57 B.C. The year 1914 A.D. is, therefore, the year 1971 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March, A.D. 78, was probably founded by Kanishka (whose sway was widely extended), and is in general use. The year 1914 A.D. is 1836 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The *Buddhists* reckoned from the death of Buddha in 543 B.C. (the actual date being 487 B.C.); and the epoch of the *Jains* was the death of Vardhamana, the founder of their faith, in 527 B.C.

Jewish.—In the fifteenth century the Jews adopted as their epoch the Creation of the World, which was placed in a year called in the Christian chronology 3760 B.C. Thus the year 1914 A.D. is *Anno Mundi* 5675 in the Jewish Calendar. A calendar for 5674-5675 will be found on p. 97.

Julian Period.—A period of 7980 Julian years, proposed by Joseph Scaliger in 1582 as a universal standard of comparison of chronology, consisting

of the product of the number of years in the solar and lunar cycles and the cycle of the indiction ($28 \times 19 \times 15$).”—*New English Dictionary*.

Macedonian.—The epoch was the occupation of Babylon by Seleucus Nicator in 311 B.C., and this system of chronology prevailed in all Greek countries until the Middle Ages, and was adopted by the Jews until the fifteenth century. It is extant among certain nomadic Arab tribes.

Muhammadan.—The Muhammadan Epoch is the Hejira, or Flight of Mahomet, from Mecca to Medina in 622 A.D. The first day of the first month of the Muhammadan Era corresponds to 16th July, 622 A.D. The year 1914 is therefore 1332–1333 of the Hejira, a calendar for which year will be found on p. 97.

Olympiads.—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia, in Elis, once in four years; the intervening years being the first, second, &c., of the Olympiad, which received the name of the victor at the Games. The first recorded Olympiad is that of Choroebus, 776 B.C.

Persian.—The chronology of Persia, which is still followed by the Parsees of India, dates from the accession of Yazdegerd III. to the throne on 10th June, 632 A.D. The year 1914 is, therefore, 1283 of the Parsees.

Roman.—Roman historians adopted as an epoch the Foundation of Rome, which they signified by the abbreviation A.U.C., *Ab anno Urbis Condite* (From the year of the founded city). This epoch is believed to fall in the year 753 B.C. The Calendar as we know it was a Roman institution; it was revised and reformed in 46 B.C. by Julius Cæsar, and remained unchanged in Western Europe until the year 1752 A.D. The Julian year contained $365\frac{1}{4}$ days, so that of every four years three were *Common Years* of 365 days and the fourth a *Leap Year* of 366 days. But this system made the civil year longer than the astronomical year, the difference being 3 days in 400 years, so that in the year 1752 A.D. there was an error of 11 days. Under the reformed scheme 3 leap years are omitted in each 400 years, and the years 1800 and 1900 each consisted of 365 days only. The year 2000 will be a leap year, the next subsequent end-of-century leap year being 2400.

CHRONOLOGICAL TERMS EXPLAINED.

Golden Number, so called from its importance in calculating the date of Easter, is the number of any year in a lunar cycle of nineteen years. It contains (approximately) 235 lunations, in which period the Moon returns to the same apparent position with regard to the Sun, so that new and full Moons occur at the same dates in the corresponding year of each cycle.

Easter Day is the first Sunday after the *Paschal Full Moon* (i.e., the full moon which happens upon, or next after, March 21; if that full moon occurs on a Sunday, Easter Day is the Sunday after).

Epect.—The age of the Moon at the commencement of the year, thus indicating the difference between the solar and lunar cycles.

Solar Cycle.—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the same days of the month.

Roman Indiction.—A period of fifteen years, instituted by the Emperor Constantine in A.D. 313 for fiscal purposes.

The Dominical Letter is one of the first seven

letters of the alphabet, A–G, which are used in succession to denote the Sundays (Lord's Day) in a particular year. If the first day of the year is a Sunday the letter is A; if the second, B; the third, C; and so on. Leap year requires two letters, the first for Jan. 1–Feb. 29, the second from March 1–Dec. 31.

ASTRONOMICAL TERMS EXPLAINED.

The time used throughout this Almanack, with the one exception of that of High Water at Dublin, is Greenwich Mean Time, or the time which should be shown by a well-regulated clock; the column headed "Sun before or after Clock" gives the difference between mean and apparent time, or the time as shown by the Sun.

N. North; S. South; E. East; W. West.

h. hours; m. minutes of time; s. seconds of time; ° deg. of arc, or thermometer; ' minutes of arc; " seconds of arc.

Conjunction.—A Planet is said to be in Conjunction with another body when it has the same longitude, and is seen in the same direction in the heavens. It is obvious that in the case of the inferior Planets this Conjunction will be of two kinds—the one when the Planet is between the Earth and the Sun, called *inferior* Conjunction; and the other when at the opposite point of its orbit, with the Sun between the Planet and the Earth, called *superior* Conjunction. The latter is the only kind of Conjunction that can happen to the *superior* Planets, Mars, Jupiter, Saturn, Uranus, and Neptune; the *inferior* Planets, Mercury and Venus, being subject to both kinds.

Opposition.—A Planet is said to be in Opposition when it is distant from the Sun 180° of longitude, at which time it is most brilliant, souths about midnight, and is, generally, at its least distance from the Earth.

Elongation.—The inferior Planets, in their revolutions round the Sun, appear to an observer on the Earth to swing pendulum-like from side to side, being alternately east and west of the Sun; the greatest Elongation is the termination of one of the swings, either east or west; and at these times the Planet appears, when viewed through a telescope, like the Moon in her first quarter if the Elongation be in the east, and like her last quarter if west. Both Mercury and Venus exhibit these phases, passing from new to full while moving from inferior to superior Conjunction, and from full to new again while passing from superior to inferior Conjunction.

Occultation.—It often happens that the Moon in her orbital motion passes before, and hides from a spectator on the Earth, certain of the Fixed Stars, and occasionally one or other of the Planets; these occurrences are called *Occultations*. Among the "Celestial Phenomena," on the third page of each month, are given the dates at which certain of these Occultations take place, with reference to the pages where details of each occurrence may be found. The disappearance always takes place on the left-hand side of the Moon, and the reappearance on the right, but *vice versa* when viewed through an inverting or astronomical telescope. Stars to the sixth magnitude inclusive have been included in this summary.

Southing.—The *Time of Southing* is the time at which the heavenly bodies pass the Meridian, and is so called because they are then due south. The Meridian being a great circle passing through the Pole and Zenith of the place, the southing will also be the time when they attain their greatest altitude above the horizon.

JEWISH CALENDAR. (A.M. 5674 and part of A.M. 5675.)

A.M. 5674.	A.D. 1913.	
Tishri	1 Oct.	2 Rosh Hashanah (New Year).
"	2 "	3 Second day of New Year.

* Peculiar to Russia.

JULIAN CALENDAR.

IN the Roman (Julian) Calendar the months corresponded exactly with our own, excepting that down to the time of the great Emperor Augustus, the fifth and sixth months of the year — which, with the Romans, began with March — were called Quintilis and Sextilis; afterwards they were named in honour of the emperors Julius and Augustus.

In reckoning the days of each month three fixed points were taken, and any particular day was said to be so many days *before* the next coming fixed day. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and the Ides, which always fell eight days after the Nones.

For example, the 1st of January was the Kalends of January (*Kalendis Januariis*), the 31st of December was the day before the Kalends of January (*pridie Kalendas Januarias*); but Dec. 30th was the third day before the Kalends of January (*ante diem tertium Kalendas Januarias*), in this case both Jan. 1st and Dec. 31st being included in the reckoning. And so on back to Dec. 14th, which was the nineteenth day before the January Kalends (*ante diem undevicesimum Kal. Jan.*), Dec. 13th being *Idibus Decembris*, the Ides of December. In Leap-year, both Feb. 24th and Feb. 25th were known as the sixth day before the March Kalends, being distinguished respectively as *prior* and *posterior*.

Standard, or Zone, Time

It is well known that the "time of day" differs everywhere except in places on the same meridian, the difference in local times being caused by the rotation of the Earth on its axis from West to East in each twenty-four hours; and as the globe is divided astronomically into 360° of longitude, reckoned by us from the meridian of Greenwich, 180° to the East and 180° to the West, it is easily seen that each 15° is equal to one hour of time.

By *Standard Time* is meant that the hour of each 15° of longitude becomes the local mean time for the zone or belt extending $7\frac{1}{2}^\circ$ on each side of the central meridian; though in practice the zone has to be adapted to local circumstances, and so cannot conform to the exact line or meridian, but is arranged to suit boundaries of States or Provinces as may be most convenient. By way of illustration, it may be noted that in the Province of Ontario, Canada, by Act of the Legislature, the hour of 75° W. is Standard Time for the Province as far as 87° W., and that the S.W. point, 83° W., extends westerly beyond the eastern part of the State of Michigan, where the time of 90° W. is used; so at Windsor, Ontario, it is noon while in Michigan—more to the east—it is 11 A.M. The *Standard Time* as used in the chief cities of Canada and the United States may be noted: at Quebec, Montreal and Toronto, at Boston, New York and Washington, the time of 75° W., five hours earlier than Greenwich, is used; at Winnipeg in Manitoba, and at Detroit,

Chicago and New Orleans, the time of 90° , six hours earlier than Greenwich, is used; at Regina and Denver it is the time of 105° , seven hours earlier than Greenwich; and in British Columbia and at San Francisco the time of 120° W., eight hours earlier than Greenwich, is used; and when 180° is reached another day begins in Eastern Siberia, at the Fiji Islands, and a little to the east of New Zealand.

The same rule applies to places east of Greenwich, where noon is earlier than at Greenwich according to the longitude. When noon at Greenwich it is 2 P.M. in Egypt and South Africa; it is 5 P.M. in India, $82\frac{1}{2}^\circ$ E.; in Japan and Korea, 135° E., it is 9 P.M.; and in Eastern Australia, 150° E., it is 10 P.M.

The question has been asked very often, "Where does a day begin?"—that is, any special day, New Year's Day or Easter Day—and the answer is that for all peoples, nations, and languages, using maps with longitude East and West from Greenwich, each day begins at the meridian of 180° , slightly east of New Zealand in the South, and intersecting Eastern Siberia in the North, and so the last day of the nineteenth century (Dec. 31, 1900) and the first day of the twentieth (Jan. 1, 1901) were on the Earth together, not running concurrently or side by side, north and south of the Equator, as has been supposed, erroneously, but the latter following the former from 180° westerly to Greenwich, and on again to 180° , where it gave place to January 2nd.

STANDARD, OR ZONE, TIME.

Country.	Central Meridian.	Fast or Slow on Greenwich Time.	Country.	Central Meridian.	Fast or Slow on Greenwich Time.

For convenience in practice, the arbitrary arrangement called *Standard Time*, described above, has been adopted generally throughout the world.

THE *Superficial Area* of the Earth is estimated to be 96,550,000 square miles, of which 55,500,000 square miles are Land and 41,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7,926 English miles, and at the Poles 7,899 English miles. The *Equatorial Circumference* is 24,872·4 English miles, divided into 360 Degrees of Longitude, each of 69·09 English (or 60 Geographical) miles; these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by Parallels of Latitude, which proceed from zero (at the Equator) to 90° at the Poles.

AREA AND POPULATION.

Continent.	Area in Square Miles.	Estimated Population.
Europe	3,750,000	400,000,000
Asia	17,000,000	900,000,000
Africa	11,500,000	170,000,000
North America...	8,000,000	110,000,000
South America...	6,800,000	35,000,000
Oceania	3,450,000	8,000,000
Polar Regions ...	5,000,000	...
	55,500,000	1,623,000,000

The British Empire extends over the largest area (13,123,000 sq. miles); Russia is the second largest Empire (8,400,000 sq. miles); France is third, with 4,330,000 sq. miles; China extends over 4,300,000 sq. miles; the United States, with its Insular Jurisdiction, &c., covers 3,750,000 sq. miles, and Brazil 3,220,000 sq. miles.

THE RACES OF MANKIND.†

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White, (3) Black, (4) Brown, (5) Red. The main Divisions of the Races are as follows:—

Division.	Area.	Estimated Number.
Mongolian ...	Asia	655,000,000
Caucasian ...	Europe & Orient	645,000,000
Negro	Africa	170,000,000
Semitic	North Africa ...	80,000,000
Malayan	Australasia	50,000,000
Red Indian ...	America	23,000,000
		1,623,000,000

* The Earth is a *Sphere*, with a Northern and Southern *Hemisphere*; the Ocean surface is called the *Hydrosphere*, and the gaseous envelope the *Atmosphere*. The science concerned with the study of the Earth's crust is *Geology*, with the measurement of its surface *Geodesy*; the study of its surface is *Geography*, and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography*, of the lakes *Limnology*, and of the mountains *Orography*. The study of the Races of Mankind is *Ethnology*, and of their location *Ethnography*. The study of extinct organic life is *Paleontology*, and of existing life *Biology*.

If an airship, with a constant speed of 50 miles an hour, started from the Earth on a journey to the Sun on January 1, 1914, it would be nearly 23 years on the journey, as it would not arrive until Nov. 23, 2121! The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (24,872·4 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 66,000 miles an hour (590,000,000 miles in 365 days, 6 hours, 9 minutes).

† It has been estimated that the Earth can maintain a population of 6,000,000,000, a total which will be reached about A.D. 2100, at the present rate of increase.

THE LARGEST CITIES.

The following 48 cities have an ascertained population exceeding half a million, according to the latest census returns:—

New York, U.S.A. (1910)	4,767,000
LONDON, England (1911)	4,523,000
PARIS, France (1911)	2,888,000
TOKYO, Japan (1908)	2,186,000
Chicago, U.S.A. (1910)	2,185,000
BERLIN, Prussia (1910)	2,071,000
VIENNA, Austria (1910)	2,031,000
ST. PETERSBURG, Russia (1910)	1,908,000
Philadelphia, U.S.A. (1910)	1,550,000
Moscow, Russia (1909)	1,481,000
Osaka, Japan (1908)	1,227,000
RIO DE JANEIRO, Brazil (1910)	1,130,000
BUENOS AIRES, Argentina (1905)	1,026,000
Calcutta, India (1911)	1,222,000
Bombay, India (1911)	980,000
Hamburg, Germany (1910)	931,000
BUDAPEST, Hungary (1910)	880,000
Glasgow, Scotland (1911)	785,000
WARSAW, Poland (1909)	781,000
Liverpool, England (1911)	748,000
Naples, Italy (1911)	723,000
Manchester, England (1911)	716,000
St. Louis, U.S.A. (1910)	687,000
Boston, U.S.A. (1910)	671,000
CAIRO, Egypt (1907)	654,000
SYDNEY, New South Wales (1911)	641,000
BANGKOK, Siam (1909)	630,000
Milan, Italy (1911)	599,000
MADRID, Spain (1910)	598,000
Munich, Bavaria (1910)	596,000
MELBOURNE, Victoria (1911)	594,000
Leipsic, Saxony (1910)	590,000
ALGIERS, Algeria (1906)	590,000
Barcelona, Spain (1910)	587,000
Amsterdam, Netherlands (1909)	568,000
Cleveland, U.S.A. (1910)	561,000
COPENHAGEN, Denmark (1911)	559,000
Baltimore, U.S.A. (1910)	558,000
Marseilles, France (1911)	551,000
DRESDEN, Saxony (1910)	548,000
ROME, Italy (1911)	539,000
Pittsburgh, U.S.A. (1910)	534,000
Birmingham, England (1911)	526,000
Lyons, France (1911)	524,000
Madras, India (1911)	520,000
Cologne, Prussia (1910)	517,000
Breslau, Prussia (1910)	512,000
Hyderabad, India (1911)	500,000

Estimated Populations.

Canton (China)	1,250,000
PEKING (China)	1,000,000
CONSTANTINOPLE (Turkey)	1,000,000
Hankow (China)	900,000
Tientsin (China)	850,000
Shanghai (China)	700,000
Montreal (Canada)	650,000
Fuchow (China)	650,000
Chungking (China)	600,000
Suchow (China)	500,000

OCEAN AREAS AND DEPTHS.

The greatest known Ocean Depth (in the Pacific, off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas); but the mean depth of the Ocean floor exceeds 12,000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each:—

Name.	Area of Basin (sq. miles).	Greatest Depth (feet).
Pacific	63,986,000	Off Mindanao, 32,089
Atlantic	31,530,000	Porto Rico Trench, 31,366
Indian	28,350,000	Sunda Trench, 22,968
Arctic	5,541,600	North Polar, 13,200
Malay	3,137,000	Kei Trench, 21,342
Central American	1,770,170	Caribbean, 20,568
Mediterranean	1,145,000	Pola Deep, 12,275
Behring	878,000	Buldir Trough, 13,422
Okhotsk	582,000	Kurile Trough, 10,554
East China	480,000	about 10,500
Hudson Bay	472,000	about 1,500
Japan	405,000	about 10,200
Andaman	305,000	about 11,000
North Sea	221,000	Skaggarak, 1,993
Red Sea	178,000	20° N., 7,254
Baltic	158,000	about 12,000

THE HIGHEST MOUNTAINS.

Name.	Range.	Height in Feet.
Everest	Himalayas	29,002
Godwin-Austen (K 2)	"	28,250
Kanchanganga I.	"	28,145
" II.	"	27,803
Makalu	"	27,790
Tengri Khan	Thian Shan	24,000
Chumulhari	Himalayas	23,944
Aconagua	Andes	22,868
*Sahana	Bolivia	22,349
Illimpa (Sorata)	Andes	21,490
Illimani	"	21,031
Chimborazo	"	20,498
Lulliallaco	"	20,243
Ruvenzori	Uganda	20,000
*Cotopaxi	Andes	19,612
Kilima Njaro	German E. Africa	19,603
Mount Logan	Rockies	19,539
Licancaur	Andes	19,521
*Mount Elias	Rockies	19,500
Elburg	Caucasus	18,526
Denavend	"	18,464
Tolima	Cordilleras	18,320
El Potra	Andes	18,045
Charles Louis	New Guinea	18,000
*Popocatepetl	Mexico	17,540
Maipo	Andes	17,421
Citlatpetl	Mexico	17,360
*Sangay	Ecuador	17,124
Koshitan Tau	Caucasus	17,095
Ararat	Armenia	16,916
Kazbek	Caucasus	16,546
Mont Blanc	Alps	15,781

* *Volcanoes*. In addition to those marked, Vesuvius, Etna and Stromboli in Europe, Erebus and Terror in the Antarctic, Hecla and Skaptar Jokul in Iceland, Mauna Loa, Kea and Hualalai in Hawaii, Tomboro in Japan, and Le Souffrier and La Pelée in the West Indies.

THE LARGEST ISLANDS.

Name of Island.	Ocean.	Area in Sq. Miles.
Greenland (Danish)	Arctic	827,300
New Guinea (Br.-Germ.-Neth.)	Pacific	330,000
Borneo (Anglo-Netherlands)	"	280,000
Patlin Land (British)	Arctic	236,000
Madagascar (French)	Indian	228,000
Sumatra (Netherlands)	"	160,000
Great Britain	Atlantic	88,603
Honshiu (Japan)	Pacific	87,500
Celèbes (Netherlands)	Indian	72,000
Prince Albert, &c. (British)	Arctic	60,000
South Island, N.Z. (British)	Pacific	58,500
Java (Netherlands)	Indian	48,400
North Island, N.Z. (British)	Pacific	44,500
Cuba (Independent)	Atlantic	44,000
Luzon (U.S.A.)	Pacific	41,000
Newfoundland (British)	Atlantic	40,200
Iceland (Danish)	"	40,000
Ellesmere (British)	Arctic	40,000

Susquehanna	United States	1 520
Brooklyn	United States	1 345

SHIPPING OF THE WORLD.

In 1913 the various nations of the world possessed 23,897 ocean-going steam vessels of over 43,000,000 gross tons; and 6,694 sailing vessels of 3,891,000 net tons. More than one-half of the vessels fly the British flag, the next largest owners being the United States, Germany, Norway, Sweden, France, Russia and Italy. An article upon the *Mercantile Fleets of the World* occupies some 20 pages of the Supplement (see Table of Contents, p. 569).

THE GREATEST SEAPORTS.

	Entered tons.	Cleared tons.
New York (1912)	13,673,765	13,549,138
Antwerp (1911)	13,233,677	13,272,665
Hamburg (1911)	11,830,949	11,945,239
Hong Kong (1911)	11,138,527	11,142,117
Rotterdam (1911)	10,624,499	10,609,814

Sweden	16,770	U.S., 15,571.
Switzerland	4,285	U.S., 3,969.

The Balance of Power.—Europe.—The "Balance of Power" in Europe of the eighteenth century is now maintained by the *Triple Alliance* (Germany, Austria-Hungary, and Italy), formed at the close of the Franco-Prussian War, and the *Triple Entente* (Russia, France, and Great Britain), dating from the early years of the twentieth century. In October, 1912, a new political force appeared in the *Balkan League* (Bulgaria, Servia, Montenegro, and Greece), which carried on a determined war with the Ottoman Empire in 1912-1913, at the conclusion of which the Allies quarrelled amongst themselves over the division of the spoils of the campaign.

America.—At the beginning of the nineteenth century the Spanish colonies in Central and South America asserted their independence. Spain received the assistance of France in her efforts to recover the revolted provinces, and the United Kingdom intervened in favour of the young republics. On 2 December, 1823, the President of the United States sent to Congress a message containing the following words, which have since become famous as the *Monroe Doctrine*:—"With the Governments who have declared their independence and maintained it, and whose independence we have on great considerations and on just principles acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European Power, in any other light than as the manifestation of an unfriendly disposition towards the United States." The Monroe Doctrine has been extended by the U.S. to include many matters not originally contemplated by the message, and it was invoked on 17 December, 1895, during a dispute between the United Kingdom and Venezuela. The Doctrine has never been acknowledged by the United Kingdom.

The Cause of Peace.—The annual expenditure of the nations of Europe on warlike preparations amounts to some hundreds of millions of pounds. But the influence of finance tends to preserve peace, and the individual efforts of philanthropists are encouraged to that end; while facilities are afforded for the peaceful settlement of disputes. In many countries there are Peace Societies, and in the United Kingdom and the United States the religion of the Society of Friends discountenances warfare upon whatever pretext. Individuals and societies are encouraged in their efforts to secure the peace of the world under the provisions of the will of the inventor of dynamite; and great millionaires, such as Andrew Carnegie, make frequent donations for the advancement of the world's peace.

Carnegie Peace Fund.—In 1910 Andrew Carnegie placed in the hands of trustees the sum of \$10,000,000 in 5 per cent. bonds, the income therefrom to be used to hasten the abolition of international war and the establishment of universal peace. The President of the Board of Trustees is Senator Elihu Root, the Secretary being James B. Scott, Solicitor in International Arbitrations, State Department, Washington, D.C.

International Arbitration.—On 24 August, 1898, the Tsar of Russia addressed a rescript to the nations inviting international discussion of the means of assuring a durable peace for all peoples of the world. The outcome of the rescript was

the *First Peace Conference* at the Hague in 1899 (18 May to 29 July), when twenty-six nations were represented. On 29 July, 1899, a *Peace Convention* was signed on behalf of sixteen of the assembled Powers. This Convention created the *Hague Tribunal* by causing each Power to nominate for six years representative members of a permanent Court of Arbitration, the main duties of which are to remind prospective belligerents of the existence of a peaceful method of settling their differences, and to decide whatever questions are submitted for its consideration. The *Second Peace Conference*, attended by representatives of forty-four nations, met at the Hague in 1907 (15 June to 18 October). At this meeting certain questions of International Law (or the Law of War) were codified. In 1908-1909 a *Conference of Maritime Powers* was held in London, at which the much-discussed *Declaration of London* (26 Feb., 1909), with its modification of the law of contraband and rights of seizure and search, was adopted by the delegates for submission to their respective Governments. In the British Legislature the House of Lords rejected this measure when submitted to them by the House of Commons. A *Third Peace Conference* will be held at the Hague in 1917.

THE HAGUE TRIBUNAL.

The *Permanent Court of Arbitration* of the Hague consists of representatives nominated by the Governments of 44 Nations (not more than four representatives from each); and in the event of the Court being called upon to hear a suit, it is necessary for the contending parties (a) to agree upon the subject-matter of dispute, (b) to appoint arbitrators and, if necessary, an umpire, (c) to submit the case through counsel or agents. English and French are the languages used at the Court. The Court meets at the *Palace of Peace* at the Hague, opened in 1913, the building having been erected mainly at the expense of Andrew Carnegie, and each of the nations interested having contributed to its embellishment.

Decisions of the Court.—1902, U.S. v. Mexico (Piou Funds); 1904, Creditor Nations v. Venezuela (Preferential Claims); 1905, United Kingdom, France and Germany v. Japan (Perpetual Leases); 1909, Germany v. France (Casablanca deserts); 1909, United Kingdom v. France (Muscat dhows); 1909, Norway v. Sweden (Maritime Boundary); 1910, U.S. v. United Kingdom (North Atlantic Fisheries); 1910, U.S. v. Venezuela (Orinoco S.S. Company); 1911, France v. U.K. (Savarkar incident); 1912, Italy v. Peru (Canevaro claim); 1913, Russia v. Turkey (arrears of interest); 1913, France v. Italy (seizure of s.s. *Carthage* and *Manouba*). *Cases pending*: Japan v. Russia (Okhotsk cod fisheries); Chile v. Bolivia (Toco nitrate regions).

British Delegates.—Rt. Hon. Sir Charles Fitzpatrick, G.C.M.G.; Rt. Hon. the Earl of Desart, K.C.B.; Rt. Hon. James Bryce, O.M.

American Delegates.—Hons. J. W. Griggs; G. Gray; Oscar S. Straus; and Elihu Root.

Officers of the Court.—Baron Michiels van Verduynen (Secretary-General); Jonkheer W. Roell (First Secretary); the Netherlands Minister of Foreign Affairs (President of the Administrative Council).

* SPECIAL TRADE includes Imports retained for Home Consumption and Exports of Domestic Produce or Manufacture, and excludes Imports that are re-exported.

† GENERAL TRADE includes the total value of Imports and the total value of Exports, and the combined total under these two headings is given where the value of the Special Trade cannot be definitely ascertained.

Merchant Shipping Owned in each Country.—(Extracted from "Lloyd's Register Book," 1913-1914.)

* Lloyd's Register Book does not include vessels trading on the Caspian Sea nor wooden vessels trading on the Great Lakes of North America.
 † In the absence of satisfactory information the records of numerous small sailing vessels (belonging chiefly to Greece, Turkey, Southern Russia, and the Netherlands' East Indies) have been omitted from the Register Book.
 ‡ Japanese sailing vessels are not recorded in Lloyd's Register Book.

The Nobel Prizes.

THE Nobel Prizes are awarded each year from the income of a fund bequeathed to trustees for distribution to those who have contributed most largely to the common good, and is divided into five shares, which are devoted to workers in the domains of (a) Physics, (b) Chemistry, (c) Medicine or Physiology, (d) Literature, and (e) the Preservation of Peace. The testator was the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. The first awards were distributed on the fifth anniversary of Nobel's death, Dec. 10, 1901. The awarding

authorities are the Swedish Academy of Science—(a) Physics, (b) Chemistry; the Stockholm Faculty of Medicine—(c) Medicine or Physiology; the Swedish Academy of Literature—(d) Literature; and a committee of five persons elected by the Norwegian Storting—(e) Peace. The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named. The Swedish Government appoints a President of the Board of Directors. Particulars concerning conditions, &c., can be obtained from the Board of Directors of the Nobel Institute ("Nobelstiftelsens Styrelse"), Stockholm, Sweden.

LIST OF AWARDS (Value about £8,000 each).

YEAR.	(a) PHYSICS.	(b) CHEMISTRY.	(c) MEDICINE OR PHYSIOLOGY.	(d) LITERATURE.	(e) PEACE.
1901	W. C. Röntgen	J. H. van't Hoff	E. A. von Behring	{ R. F. A. Sully-Prudhomme }	H. Dunant.
1902	{ H. A. Lorentz } { P. Zeeman }	E. Fischer	Sir R. Ross, K.C.B.	T. Mommsen	{ F. Passy. E. Ducommun. }
1903	{ H. A. Becquerel } { M. & Mme. Curie }	S. A. Arrhenius	N. R. Finsen	B. Björnson	A. Gobat.
1904	Lord Rayleigh	Sir W. Ramsay	V. Pavlow	{ F. Mistral J. Echegaray }	Sir W. R. Crenier.
1905	P. Lenard	A. von Baeyer	R. Koch	H. Sienkiewicz	Inst. of Int. Law.
1906	{ Prof. J. J. Thomson }	H. Moissan	{ Ramon y Cajal } { Prof. Golgi }	G. Carducci	Bss. von Suttner.
1907	{ Prof. A. A. Michelson }	E. Buchner	A. Laveran	R. Kipling	T. Roosevelt.
1908	G. Lippman	E. Rutherford	{ P. Ehrlich } { E. Metchnikoff }	R. Eucken	{ E. T. Moneta. L. Renault. }

The Sovereigns of Ireland from A.D. 4 to 1801.

THE line (or rather lines) of native sovereigns is a very long one; some Irish historians have traced the succession to about the period of the Flood, "before which time there were many princes," but, unfortunately, the records have not been preserved. According to Keating, the first sovereigns after the Milesian Conquest, of whom there is any "absolute certainty," were Heber and Heremon, Milesian princes from Galicia in Spain,

who conquered Ireland, and reigned jointly from the year 1300 B.C. till 1291, when Heremon alone ruled. Of their successors, who reigned from the year 1285 B.C. to the Christian Era, about 160 in number, only fifteen died comfortably in their beds; four died of the plague or some malignant distemper, the rest being assassinated, killed in battle, or dying other violent deaths.

The following is an "authentic list" of—

IRISH SOVEREIGNS AFTER THE BIRTH OF CHRIST.

	A.D.
Fearaidhach-Fionfacht—"a most just and A.D. good prince"; slain by his successor.....	515
Fiachadh-Fion—slain by his successor.....	528
Fiachadh-Fionohudh—"murdered by the Irish plebeians of Connaught"	550
Cairbre-Cincait—murdered in a conspiracy... ..	551
Elim—slain in battle	554
Tuathal-Teachtmar—slain by his successor... ..	557
Mal, or Mail—slain by his successor	558
Feidhlimhidh—"an excellent justiciar"; died a natural death	587
Cathore Mor, or the Great—had thirty sons	591
Conn Ceadhadhach, called the Hero of the Hundred Battles—slain	618
Conaire—killed	622
Art-Aonfhir, the Melancholy—slain in battle	635
Lughaidh, surnamed Mac Conn—thrust through the eye with a spear in a conspiracy	648
Feargus, surnamed Black-teeth—murdered at the instigation of his successor	661
Cormac-Ulfhada—"a Prince of most excellent wisdom, and kept the most splendid court that ever was in Ireland"; choked by the bone of a fish at supper	668
Eochaidh-Gunait—killed	674
Cairbre-Liffeachair—slain in battle	678
Fiachadh—succeeded his father; slain in battle by his three nephews	685
Cairioll or Colla-Uais—dethroned	693
Muirreadhach-Tireach—slain by successor... ..	702
Caolbhach—slain by his successor	709
Eochaidh-Moidhmeodhain—natural death... ..	719
Criomthan—poisoned by his sister	724
Niall—surnamed of the nine hostages; killed in France, on the banks of the Loire	731
Dathy—killed by a thunderbolt	740
Laoghaire—killed by a thunderbolt	782
Oilioll-Molt—slain in battle	786
Lughaidh—also killed by a thunderbolt	815
Murtough—died naturally	837
Tuathal-Maolgarbh—assassinated	851
Diarmuid—fell by the sword of Hugh Dubh Feargus, in conjunction with his brother Daniel; manner of their deaths unknown	866

Welsh Sovereigns and Princes.

WALES was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I., and was born in Carnarvon town on April 25, 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince, in fulfilment of a promise that they should have a Prince who "could not speak a word of English" and should be native born. This son, who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13, 1911.

Franklin Pierce	1853	Woodrow Wilson	1913

The Family of King George III.

GEORGE III., King of the United Kingdom of Great Britain and Ireland, was the eldest son of Frederick, Prince of Wales (eldest son of George II.), and of Princess Augusta (youngest daughter of Frederick, Duke of Saxe-Coburg-Gotha). His Majesty was born at Norfolk House, St. James's Square, June 4, 1738; succeeded to the Throne Oct. 25, 1760; married Princess Charlotte (daughter of Charles, Duke of Mecklenberg-Strelitz); and was crowned with her on Sept. 22, 1761. Early in his reign he showed symptoms of insanity, and after recovering from two serious attacks (1788 and 1804) his mind entirely gave way; many of his latter years were consequently passed in seclusion, and the government was carried on, from Feb. 5, 1811, until his death, by his eldest son George, under the title of *Prince Regent*. His Majesty died at Windsor, Jan. 29, 1820. Their Majesties had issue:—

1. George Augustus Frederick, *Prince of Wales*, born Aug. 12, 1762, married Princess Caroline (daughter of Charles, Duke of Brunswick-Wolfenbützel), succeeded to the Throne as GEORGE IV., Jan. 29, 1820, and died without surviving issue at Windsor, June 26, 1830.

2. Frederick, *Duke of York and Albany*, born Aug. 16, 1763, married Princess Frederica (daughter of King Frederick William II. of Prussia), was for many years Commander-in-Chief of the Army, and died without issue Jan. 5, 1827.

3. William, *Duke of Clarence*, born Aug. 21, 1765; was Lord High Admiral of England; married July 11, 1818, Adelaide, daughter of George, Duke of Saxe-Meiningen, by whom he had two daughters, who predeceased him; succeeded to the Throne as WILLIAM IV., June 26, 1830, and died June 20, 1837.

4. Charlotte, *Princess Royal*, born Sept. 29, 1766, married Frederick, King of Württemberg, and died without issue.

5. Edward, *Duke of Kent*, born Nov. 2, 1767, married Princess Victoria (daughter of Francis, Duke of Saxe-Coburg, and widow of Charles, Prince of Leiningen), died Jan. 23, 1820. Their Royal Highnesses had issue a daughter, Princess Victoria, born May 24, 1819, succeeded to the Throne as QUEEN VICTORIA, June 20, 1837.

6. Augusta, born Nov. 8, 1768, died unmarried Sept. 22, 1840.

7. Elizabeth, born May 22, 1770, married Frederick, Landgrave of Hesse, and died without issue Jan. 10, 1840.

8. Ernest, *Duke of Cumberland*, born June 5, 1771, married Frederica (daughter of Frederick V., Grand Duke of Mecklenberg-Strelitz), succeeded as KING of HANOVER June 20, 1837 (on death of William IV., owing to the exclusion of Queen Victoria by the provisions of the Salic Law), died Nov. 28, 1851. Their Majesties had issue:—

George, born May 27, 1819, married Princess Alexandrina Mary (daughter of the Duke of Saxe-Altenburg), succeeded as KING of HANOVER Nov. 18, 1851. In 1866 the monarchy was extinguished by

the King of Prussia. King George died June 12, 1820, leaving issue:—

(i) Ernest, *Duke of Cumberland*, K.G., G.C.H., G.C.V.O., born Sept. 21, 1843, married Princess Thyra of Denmark, and has surviving issue (a) Princess Marie, born Oct. 11, 1879, married Prince Maximilian of Baden (and has issue Princess Marie and Prince Berthold of Baden); (b) Alexandra, born Sept. 29, 1882, married Frederick Francis II., *Grand Duke of Mecklenberg-Schwerin* (and has issue a son, Prince Frederick Franz Michel); (c) Olga, born July 11, 1884; (d) Ernest Augustus, *reigning Duke of Brunswick*, born Nov. 17, 1887, married (1913) Princess Victoria Louise of Prussia.

(ii) Frederica, born Jan. 9, 1848, married *Baron von Pavel Rammingen*, K.C.B., K.C.V.O.

(iii) Mary, born Dec. 3, 1849, died June 4, 1904.

9. Augustus, *Duke of Sussex*, born Jan. 27, 1773, died without succession April 24, 1843.

10. Adolphus, *Duke of Cambridge*, born Feb. 24, 1774, married Princess Augusta (daughter of Frederick, Landgrave of Hesse), died July 8, 1850, leaving issue:—

(i) George, *Duke of Cambridge*, born March 26, 1819, Field-Marshal and Commander-in-Chief of the Army, died without succession March 17, 1904.

(ii) Augusta, born July 19, 1822, married Frederick William, *Grand Duke of Mecklenberg-Strelitz*, and has issue (a) Adolphus Frederick, K.G., G.C.V.O., *Reigning Grand Duke*, born July 22, 1848, married Elizabeth, daughter of the *Reigning Duke of Anhalt* (and has issue Duchess Marie of M.-S., *Princess Militza of Montenegro*, Hered. *Grand Duke Adolf Frederick*, and the late Duke Charles Borwin).

(iii) Mary Adelaide, born Nov. 27, 1833, married Francis, *Duke of Teck*, died Oct. 27, 1897, her issue being (a) Queen Mary, *Q.C.*; (b) H.H. Adolphus, *Duke of Teck*, G.C.B., G.C.V.O., G.C.E., born Aug. 13, 1868, married Lady Margaret Grosvenor, and has issue: (c) Francis, born Jan. 7, 1870, died Oct. 22, 1910; (d) Prince Alexander of Teck, G.C.M., G.C.V.O., *p.s.o.*, born April 14, 1874, married Princess Alice of Albany (see Queen Victoria's Family).

11. Mary, born April 25, 1776, married William Frederick, *Duke of Gloucester*, died without issue April 30, 1857.

12. Sophia, born Nov. 3, 1777, died unmarried May 27, 1848.

13. Octavius, born Feb. 23, 1779, died May 3, 1783.

14. Alfred, born Sept. 22, 1780, died Aug. 26, 1782.

15. Amelia, born Aug. 7, 1783, died unmarried Nov. 2, 1810.

VICTORIA, the only daughter of the Duke of Kent, son of George III., was born May 24, 1819; succeeded to the Throne June 20, 1837; crowned June 28, 1838; married Feb. 10, 1840, Albert, Duke of Saxony, Prince of Coburg and Gotha, PRINCE CONSORT (born Aug. 26, 1819, died Dec. 14, 1861); died Jan. 22, 1901. Her Majesty had issue:—

1. H.I.M. THE EMPRESS FREDERIC.

H.R.H. Princess Victoria (*Princess Royal*), born Nov. 21, 1840; married Jan. 25, 1858, Frederic, Crown Prince of Prussia, afterwards German Emperor (born Oct. 18, 1831, died June 15, 1888). Her Imperial Majesty the EMPRESS FREDERIC died Aug. 5, 1901. Issue:—

(i) William, born Jan. 27, 1859, married Feb. 27, 1881, Princess Augusta of Schleswig-Holstein, succeeded to the throne as GERMAN EMPEROR, June 15, 1888. Their Majesties have issue:—

(a) William, *Crown Prince*, K.G., born May 6, 1882, married the Duchess Cécile of Mecklenburg-Schwerin (and has issue the Princes Wilhelm, Ludwig, Hubertus, and Friedrich);

(b) Eitel-Friedrich, born July 7, 1883, married Duchess Sophie of Oldenburg;

(c) Adalbert, born July 14, 1884;

(d) Augustus William, born Jan. 29, 1887, married Princess Alexandra of Schleswig-Holstein (and has issue, Alexander, born Dec. 26, 1912);

(e) Oscar, born July 27, 1888;

(f) Joachim, born Dec. 17, 1890;

(g) Victoria Louisa, born Sept. 13, 1892, married (1913) Prince Ernest Augustus, reigning Duke of Brunswick (*see* Cumberland, p. 117).

Princess Royal, born Feb. 20, 1867, married July 27, 1889, to the late Duke of Fife. Issue:—

(i.) H.H. Princess Alexandra (Duchess of Fife), born May 17, 1891; married Oct. 15, 1913, to H.R.H. Prince Arthur of Connaught, *q.v.*

(ii.) H.H. Princess Maud, born April 3, 1893.

4. H.R.H. Princess VICTORIA Alexandra Olga Mary, born July 6, 1868.

5. H.R.H. Princess MAUD Charlotte Mary Victoria (H.M. Queen of Norway), born Nov. 26, 1869, married July 22, 1896, to Haakon VII., KING OF NORWAY. Issue:—

H.R.H. Olav, Crown Prince of Norway, born July 2, 1903.

6. H.R.H. Prince ALEXANDER John Charles Albert, born April 6, died April 7, 1871.

ANNUITIES TO THE ROYAL FAMILY.

The annuities payable to Their Majesties and to the members of the Royal Family are known as the Civil List, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII. amounted to £470,000, in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £106,000. The Select Committee appointed on June 14, 1910, reported on July 7, and made the following recommendations, which were adopted by the House of Commons:—

Their Majesties' Privy Purse	£110,000	Queen Alexandra	£70,000
Salaries of Household	125,800	Princess Christian of Schleswig-Holstein	6,000
Expenses of Household	193,000	Princess Louise (Duchess of Argyll)	6,000
Works	20,000	Duke of Connaught	25,000
Royal Bounty	13,200	Duchess of Edinburgh	6,000
Unappropriated	8,000	Duchess of Albany	6,000
	<u>£470,000</u>	Princess Beatrice (Henry of Battenberg)	6,000
		Duchess of Mecklenburg-Strelitz	3,000
		King Edward VII.'s Daughters	18,000

THE CROWN LANDS.

The Land Revenues of the Crown in the United Kingdom have been collected on the public account since 1760, when George III. surrendered them in return for a fixed annual payment or Civil List. At the time of the surrender the gross revenues amounted to about £89,000, and the net return to about £11,000.

In the year ended 31 March, 1912, the total Receipts by the Commissioners were £703,291, of which amount £589,236 was derived from Crown Rents, and £39,262 from the Mines. The Expenditure was £173,778, of which £111,611 represented the expenses of the Land Revenue, and £62,167 the Woods and Forests. The sum of £530,000 was paid to the Exchequer in 1911-1912, being a net sum from which no deductions have to be made for administration.

THE DUCHY OF LANCASTER.

Lancaster was erected into a Palatine Duchy by Edward III. for his son John of Gaunt in 1359, but in 1399 it became merged in the Crown through the accession of his son as Henry IV.

The Revenue of the Duchy of Lancaster was £29,000 in 1847, and amounted to £102,227 in the year ended 31 December, 1912. The contributory items are Rents and Profits of

Courts, £61,569; Royalties and Dues, £29,721. Expenditure: £9,215, Outlay for the benefit of the Estate; £7,289, deducted under various Acts of Parliament; £4,465, Allowances, Donations, and Charities; £2,000, Salary of the Chancellor of the Duchy; and £6,614, Expenses of Management. The sum of £64,000 was paid (for His Majesty's use) to the Keeper of His Majesty's Privy Purse.

THE DUCHY OF CORNWALL.

Cornwall was created a Duchy by Edward III. for the support of his eldest son (afterwards created Prince of Wales), and the eldest son of the Sovereign has since that time been born Duke of Cornwall.

The Revenue of the Duchy of Cornwall in the year ended December 31, 1912, was £156,726, and was derived principally from Rents and Profits of Courts, £110,788; Annuity in lieu of Tin Coinage Duties, £16,217; and Dividends on Stock, £11,501. The Payments include £22,987, Outlay for the benefit of the Estate; £20,622, Deductions under various Acts; £4,205, Allowances, Donations, and Charities; and £10,116, Expenses of Management. The sum of £181,350 was paid on account of His Royal Highness the Prince of Wales.

His Most Excellent Majesty **George the Fifth**, by the Grace of God King of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, Defender of the Faith, Emperor of India; only surviving son of His late Majesty King Edward VII. and of Her Majesty Queen Alexandra; *born at Marlborough House, June 3, 1865; married July 6, 1893, Her Serene Highness Princess Victoria Mary Augusta Louise Olga Pauline Claudine Agnes, born May 26, 1867 (QUEEN MARY), only daughter of Her Royal Highness the late Duchess and His Highness the late Duke of Teck; succeeded to the Throne May 6, 1910; crowned at Westminster Abbey, June 22, 1911.* Their Majesties have issue:—

1. H.R.H. EDWARD Albert Christian George Andrew Patrick David, PRINCE OF WALES and Earl of Chester, Duke of Cornwall (Duke of Rothesay, Prince of Saxe-Coburg and Gotha and Duke of Saxony, Earl of Carrick, Baron of Renfrew, Lord of the Isles and Great Steward of Scotland), K.G., a Lieutenant, R.N., *born June 23, 1894.*
2. H.R.H. ALBERT Frederick Arthur George, a Midshipman, R.N., *born Dec. 14, 1895.*
3. H.R.H. Victoria Alexandra Alice MARY, *born April 25, 1897.*
4. H.R.H. HENRY William Frederick Albert, *born March 31, 1900.*
5. H.R.H. GEORGE Edward Alexander Edmund, *born Dec. 20, 1902.*
6. H.R.H. JOHN Charles Francis, *born July 12, 1905.*

Laryngologist, Milsom Rees, C.V.O., F.R.C.S.Ed.
Bacteriologist, H. R. Spitta, M.D.
Clerks, T. G. Watson; R. H. Short.

HOUSEHOLD OF H.M. THE QUEEN OF NORWAY
(Princess Maud of Great Britain and Ireland).
Comptroller and Private Secretary, Col. Sir Henry
Knollys, K.C.V.O.

IN a broad sense this heading is commonly taken as identical with the one that follows; but there are close upon 130 holders of titles of long-standing nobility who are not members of the Upper House of Parliament, their peerages being those of Scotland or Ireland only. But, as further explained below, there are about an equal number of Peers of those kingdoms who possess additional titles which constitute them members of the Lords, these titles being in a majority of instances, though very far from all, inferior to those by which they are generally known. The full details as to each are given under his leading title, and a reference is in every case supplied under any other that he may hold, so that the table of equivalent titles formerly given in this work is no longer needed: a double index will be found in "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE."

THE HOUSE OF LORDS,

the *Magnam Concilium* of the early chroniclers, consists of the Spiritual Lords of England (the 2 Archbishops and 24 of the Bishops), the Temporal Peers of England, Great Britain, and the United Kingdom, and of Representative Peers of Scotland and Ireland, together with such Scottish and Irish Peers as have also Imperial titles. No Peer can take his seat if he be under age, of unsound mind, or bankrupt. The full Assembly would consist of 3 Princes of the Blood Royal, 2 Archbishops, 21 Dukes, 25 Marquesses, 122 Earls, 45 Viscounts, 24 Bishops, 353 Barons, and 16 Scottish and 28 Irish Representative Peers: total 638. See WHITAKER'S PEERAGE for complete table, showing numbers of Life Peers, Minors, &c. There are also 16 Ladies who are Peeresses in their own right, whose titles and names, along with those of Scotland, are given below at page 137. Female succession may occur in the Imperial Peerage in any Barony of England which was conferred by writ of summons; but it is subject to the rule of *abeyance* whenever there are more than one daughter, sister, &c., eligible to succeed. There are also a few cases in which "special remainders" have been granted to female relatives in the absence of males. We use the term "Imperial" as including the three series of Peers of "England" (up to June 20, 1707), "Great Britain" (thence till close of 1800), and "United Kingdom" (1801 onward).

SCOTTISH AND IRISH PEERS.

There are in all 86 Scottish Peers and 170 Irish, but of the total 256 there are 134 possessing Imperial titles and 122 without them. Of the 86 Scottish, 51 have Imperial titles and 16 are elected or re-elected every Parliament to sit in the Lords and similarly of the 170 Irish 83 hold Imperial titles, and 28 are elected for life. Of the Imperial titles of the two kingdoms there are 77 which are inferior to the native ones, 29 are superior, 14 are identical in rank but differing in designation, and 14 are absolutely the same. Of the 4 Scottish Peeresses cited on page 135, that of Melfort is subject to a degree of doubt, so that the lady does not assume it. There are other lines in the Scottish Peerage which are open to female succession, and this is not subject to *abeyance* as in England. In the Irish Peerage, on the other hand, the only titles open to female succession are the Massereene Viscounty and the La Poer Barony, the latter now held by the Marquess of Waterford. It will be observed that Ireland possesses a great advantage over Scotland in the Lords as it does in the Commons, its native Peers who hold Imperial titles numbering, as just stated, 83 as against 51 of Scotland, and its elected Representative Peers 28 as against 16. An Irish Peer who holds no Imperial title has also the special privilege of being able to seek election to the Commons for any constituency not in Ireland itself.

Contractions.—S. or I. appended to the date of creation denotes a *Scottish* or *Irish* title; the further addition of a * implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as *Engl.*, *Brit.*, or *U.K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the Imperial creation. A † appended to S. or I. implies that the Peer is an elected Representative to the House of Lords. For the mark † see heading to Marquesses; b. signifies born; s., succeeded; m., married; w., widower or widow; div., divorced; M., minor.

COMPLETE LIST OF THE PEERS.

PRINCES OF THE BLOOD ROYAL (3).—*Style*, His Royal Highness the Duke of ——. *Addressed as*, Sir, or more formally, May it please your Royal Highness. *Eldest Son or Heir*.

- 1910 Edward Albert Christian George Andrew Patrick David, Prince of Wales, Duke of Cornwall (1337) (Scott. Duke, *Rothsary*), E.G., b. 1894, s. 1910, M. (None)

Knights Grand Cross of St. Michael and St. George.
Knights Grand Commanders of the Indian Empire.
Knights Grand Cross of the Royal Victorian Order.
Knights Commanders of the above Orders.
Knights Bachelors.
Commanders of the Royal Victorian Order.
Judges of County Courts and Judges of the City of London Court.
Serjeants at law.
Masters in Lunacy.
Companions of the Bath, Star of India, St. Michael and St. George, Indian Empire.
Members 4th Class of the Royal Victorian Order.
Companions of the Distinguished Service Order.
Companions of the Imperial Service Order.

Eldest Sons of younger Sons of Peers.
Baronets' eldest Sons.
Eldest Sons of Knights in order of their Fathers.
Members 5th Class of the Royal Victorian Order.
Younger Sons of the younger Sons of Peers.
Baronets' younger Sons.
Younger Sons of Knights in the same order as their Fathers.
Naval, Military, and other Esquires by Office.
Women take the same rank as their husbands or as their eldest brothers; but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedence as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife.*

There are three Orders confined to Ladies: The Order of Victoria and Albert, the Crown of India, and the Royal Red Cross. But members are entitled to no special precedence.

LOCAL PRECEDENCY. — No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff. In London and other Corporations, the Mayor stands first, after him the Aldermen, Sheriff, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

* For fuller tables (and for Scottish and Irish Precedency) see Introduction to "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE," a companion volume, price 5s. net.

England, Great Britain, U. K.,
and 58 Ireland (marked I).

Baronets.

(Exclusive of such as are Peers.)

Scotland or Nova
Scotia (87, marked S).

Home Office, S.W.
Asst. do., R. F. Reynard, I.S.O.

The Order of Merit—O.M.

INSTITUTED 26th June, 1902.

Membership is of two kinds, Military and Civil, the former having crossed swords, and the latter oak leaves, upon the badge. Membership of this Order confers no precedence, and is designated by the suffix O.M., which is authorised to follow the first class of the Order of the Bath and to precede the letters designating membership of the inferior classes of the Bath and of the remaining Orders of Knighthood.

MILITARY MEMBERS.

Field-Marshal Earl Roberts of Kandahar, K.C., K.G., K.P.
Field-Marshal Viscount Kitchener, K.P.
Admiral of the Fleet Rt. Hon. Sir Edward Hobart Seymour, G.C.B.
Admiral of the Fleet Lord Fisher, G.C.B.
Field-Marshal Prince Yamagata.
Field-Marshal Prince Oyama.
Admiral Count Togo.
Admiral of the Fleet Sir A. Knyvet Wilson, K.C., G.C.B.

CIVIL MEMBERS.

Viscount Morley.
Lord Rayleigh.
Earl of Cromer.
Rt. Hon. James Bryce.
Professor Henry Jackson.
Sir William Crookes.
Thomas Hardy.
Rt. Hon. Sir George Otto Trevelyan, Bart.
Sir Edward Elgar.
Sir Joseph John Thomson.
Secretary and Registrar, Col. Hon. Sir Henry Charles Legge, K.C.V.O.

THE KNIGHTS BACHELOR do not constitute a Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I. in the 17th century, lapsed, and in 1908 a voluntary association under the title of "The Society of Knights Bachelor" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1257 and obtaining the uniform registration of every created Knight. An annual Knightage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are:—*President*, Sir Henry Pellatt, Kt., C.V.O.; *Hon. Registrar*, Sir William Bull, Kt., M.P.; *Hon. Secretary*, Willoughby Bullock; *Registry and Library*, 8, Clifford's Inn, Temple Bar, E.C.

(EXCLUSIVE OF THOSE HOLDING HIGHER RANK AS PEERS OR BARONETS, &c.)

For *Knights Bachelor*, see pp. 154-157.

The House of Commons.

THE second Parliament of King George V. was elected in December, 1910, and met on January 31, 1911. The General Election had returned 398 Ministerialists (272 Liberals; 42 Labour Members; 84 Nationalists) and 272 Opposition (Conservatives and Unionists), distributed as shown in the following table:—

	DISTRIBUTION OF MEMBERS.				PARTY STRENGTH (Dec., 1910).		
	Counties.	Boroughs.	Universities.	Total Members.	Ministerial.	Opposition.	Majority.
England	234	226	5	465	226	239	13 <i>Opp.</i>
Wales	19	11	—	30	27	3	24 <i>Min.</i>
Scotland	39	31	2	72	61	11	50 <i>Min.</i>
Ireland	85	16	2	103	84	19	65 <i>Min.</i>
United Kingdom	377	284	9	670	398	272	126 <i>Min.</i>

POLITICAL PARTIES AND ORGANISATIONS.

LIBERAL.—The *Leader* in the *House of Lords* is the Marquess of Crewe, K.G., and the *Chief Whip* in that House is Lord Colebrooke, other Whips being Lord Herschell, Lord Saye and Sele, and the Earl of Craven. In the *House of Commons* the *Leader* is the Prime Minister, and the *Chief Ministerial Whip* (Parliamentary Secretary to the Treasury) is Percy H. Illingworth. Other Whips, J. W. Gulland (for Scotland), with W. W. Bann, Hon. Geoffrey Howard, W. Jones (for Wales), Capt. Hon. F. E. Guest, and Henry Webb. The *Liberal Central Association*, 21, Abingdon Street, Westminster, S.W., is the official organisation and headquarters of the Liberal Party. Hon. Sec., Sir Robert Hudson; Treasurer, Sir Jesse Herbert. The *National Liberal Federation*, 42, Parliament Street, Westminster, S.W., is a union of Liberal Associations in England and Wales. The *Liberal Publication Department*, 42, Parliament Street, under the combined auspices of the two above bodies, issues periodical literature and political magazines. *Home Counties Liberal Federation*, 42, Parliament Street, S.W.; the *London Liberal Federation*, 41, Parliament Street, S.W.; *Devon and Cornwall Liberal Federation*, Clarence Chambers, Tavistock Road, Plymouth; *Eastern Counties Liberal Federation*, Cumbergate, Peterborough; *Lancashire, Cheshire, and North-Western Liberal Federation*, 37, Cross Street, Manchester; *Midland Liberal Federation*, Newton Chambers, Cannon Street, Birmingham; *Northern Liberal Federation*, Pilgrim House, Pilgrim Street, Newcastle-on-Tyne; *Western Counties Liberal Federation*, 2, Bristol Bridge, Bristol; *Yorkshire Liberal Federation*, 38, Boar Lane, Leeds. Among other organisations, the *National Reform Union*, 50, Haworth's Buildings, Cross Street, Manchester, founded in 1864 for the advocacy of electoral reform and opposition to Protection, aims at inculcating Liberal principles by means of lectures and the distribution of literature; the *Eighty Club*, 3, Hare Court, Temple, E.C., was founded in 1880, and works on similar lines; *League of Young Liberals*, Dacre House, Victoria Street, S.W.; *Liberal Social Council*, 92, Victoria Street, S.W.; the *Women's Liberal Federation*, 72, Victoria Street, S.W.; and the *Women's National Liberal Association*, 138, Palace Chambers, Westminster, S.W. The *Scottish Liberal Association* is at 7, West George Street, Glasgow, and at 95, Princes Street,

Edinburgh; the *Scottish Women's Liberal Association* is at the Glasgow office. The *Welsh National Liberal Council* is at 35, Charles Street, Cardiff.

UNIONIST.—The chief Unionist organisation is the *National Unionist Association of Conservative and Liberal Unionist Organisations*, St. Stephen's Chambers, Westminster, S.W. The officers are as follows:—*President*, Rt. Hon. Sir A. E. Fellowes, K.C.V.O.; *Chairman of the Council*, 1913, A. T. Salvidge; *Chairman of the Party Organisation and Executive Committee*, A. D. Steel-Maitland, M.P.; *Vice-Chairmen of the Executive Committee*, Rt. Hon. Sir S. Crossley, Bt., K.C.V.O., Sir William J. Crump, and A. T. Salvidge; *Principal Agent*, John Boraston; *Deputy Principal Agent*, William Jenkins; *Secretary*, Thomas Cox. The *Parliamentary Whips* are, in the *House of Lords*—The Duke of Devonshire, Viscount Churchill, Lord Duhmore and Lord Hindlip; and in the *House of Commons*—Lord Edmund Talbot, M.V.O. (*Chief Whip*), W. C. Bridgeman, B. M. Eyres-Monsell, Major J. Gilmour, Major H. G. Henderson, H. Pike Pease, R. A. Sanders, Major Hon. G. F. Stanley. *Provincial Whips*, Rt. Hon. W. Hayes Fisher (*Metropolitan*), Almeric H. Paget (*Home and Eastern Counties*), and Sir George Younger, Bt. (*Scotland*).

The *National Unionist Association of Conservative and Liberal Unionist Organisations* is a federation of Conservative and Liberal Unionist Associations and Clubs in England and Wales. As constituted at present it consists of 35 Provincial Divisions, a Council of about 300 members, which meets quarterly, and a Conference, which meets annually. It also has Committees, which have the duties of strengthening, stimulating and creating electioneering organisation in the constituencies, publishing and distributing the whole of the Party literature for the education of the electorate, and providing and controlling the staff of speakers and lecturers. The *Scottish Unionist Association* is at 2, Frederick Street, Edinburgh. *National Conservative League*, 9, Broughton Road, Thornton Heath, Surrey. The *Primrose League*, 64, Victoria Street, S.W., founded in 1883, is an educating body, and aims at the Maintenance of Religion, of the Constitution, and of the Unity of the British Empire: *Grand Master*, Earl Curzon of Kedleston, G.C.S.I., G.C.I.E.; *Chancellor*, Rt. Hon. W. H. Long, M.P.; *Vice-Chancellor*, G. Arbuthnot; *President Ladies' Council*, Miss

Balfour; Registrar, F. Willis; Clerk of the Council, R. Bennett; Organising Sec., M. Crowe. *Junior Imperial League*, St. Stephen's Chambers, S.W.; Sec., H. H. Cannell. *The United Club*, Mitre Court Chambers, Temple, E.C., supplies speakers for the Unionist cause. *Union Defence League*, 25, Victoria Street, S.W.

LABOUR.—The Labour Party in Parliament is composed of 39 members. Chairman, J. Ramsay MacDonald; Vice-Chairman, James Parker; Secretary, Charles Duncan; Whips, G. H. Roberts, J. Pointer, and F. W. Goldstone. The organisation outside the House of Commons has offices at 28, Victoria Street, Westminster, S.W. Secretary, Arthur Henderson; National Agent, Arthur Peters. The Party is financed by contributions of 1d. per member per year from affiliated Trade Unions and Socialist organisations, &c. An Executive Committee conducts questions of elections, &c., endorses candidates selected by affiliated bodies, and contributes 25 per cent. of the Returning Officers' charges in all elections held under Party auspices. The *National Women's Labour League* is an organisation of women of Labour sympathies, and works in co-operation with the Labour Party. Secretary, Dr. Marion Phillips, 3, Lincoln's Inn Fields, London, W.C.

SOCIALISTS.—*British Socialist Party*, Chandos Hall, 21A, Maiden Lane, Charing Cross, W.C. Secretary, Albert Inkpin. *Independent Labour Party*, St. Bride's House, Salisbury Square, E.C.; Gen. Sec., Francis Johnson. *The Fabian Society*, 3, Clement's Inn, Strand, W.C., preaches an intellectual Socialism to the middle classes. *The Anti-Socialist Union of Great Britain*, 58, Victoria Street, S.W., is a central organisation to oppose Socialism.

IRISH PARTIES.—The *United Irish League* represents the Nationalist Party, and the Nationalist Whips are Capt. A. J. C. Donelan, Pat O'Brien, E. Haviland Burke, and J. P. Boland. *The All for Ireland League*, founded by W. O'Brien, M.P., aims at regaining a national parliament for Ireland with the universal consent of the English people, by bringing about a Conference of all political parties, British and Irish. The Irish Unionist Party is represented by the *Irish Unionist Alliance*, 109, Grafton Street, Dublin (Sec., R. J. Herbert Shaw), and by the *Ulster Unionist Council*, Old Town Hall, Belfast (Sec., R. Dawson Bates). *Irish Unionist Whip*, Sir J. B. Lonsdale, Bt., M.P.

FREE TRADE.—The *Free Trade Union*, 25, Victoria Street, S.W., was founded to resist a reactionary tariff policy and to safeguard the free import of food and raw material.

TARIFF REFORM.—The *Tariff Reform League*, 7, Victoria Street, Westminster, S.W., was founded in 1903, in furtherance of Mr. Chamberlain's proposals for the reform of the Fiscal System of the United Kingdom. Sec., T. W. A. Bagley.

WOMEN'S SUFFRAGE.—The principal organisations for putting forward the claims of women to the Parliamentary franchise are the *National Union of Women's Suffrage Societies*, 14, Great Smith Street, Westminster, S.W., with over 450 affiliated societies and 35,000 members; the *London Society for Women's Suffrage*, 58, Victoria Street, S.W., is a society in the above Union, and has over 4,000 members; the *Women's Social and Political Union*, Lincoln's Inn House, Kingsway, W.C.; the *Women's Freedom League*, 1, Robert Street, Adelphi, W.C. (Pres., Miss Despard; Sec., Miss F. A. Underwood), which aims at securing

for women a Parliamentary vote as it is or may be granted to men; the *Lancashire and Cheshire Women's Textile Workers' Representation Committee*, 5, John Dalton Street, Manchester; and the *Women's Co-operative Guild*, 28, Church Row, Hampstead, N.W. The *Conservative and Unionist Women's Franchise Association*, 48, Dover Street, W. (Pres., The Countess of Selborne), aims at a qualified suffrage for women, and opposes universal suffrage of either sex. The offices of the *Women's Local Government Society* are 19, Tothill Street, S.W. The *National League for Opposing Women Suffrage*, 515, Caxton House, Tothill Street, Westminster, S.W. (Presidents, Earl Curzon of Kedleston, Lord Weardale), seeks to prevent the Parliamentary enfranchisement of women.

ELECTORAL REFORM.—*Proportional Representation Society*, Sec., J. H. Humphreys, 179 St. Stephen's House, Westminster, S.W.

PARTY LEADERS.

Government.

Prime Minister (Leader of the House of Commons), Rt. Hon. H. H. Asquith, K.C. (*Liberal*), born 12 Sept. 1852.

Labour Leader, J. Ramsay MacDonald, born 1866.

Irish Nationalist, John Edward Redmond, born 1851.

Leader in the House of Lords, The Marquess of Crewe, K.G. (*Liberal*), born 24 Dec. 1838.

Opposition.

Leader in the House of Commons, Rt. Hon. Andrew Bonar Law (*Unionist*), born 16 Sept. 1858.

Leader in the House of Lords, The Marquess of Lansdowne, K.G. (*Unionist*), born 14 Jan. 1845.

Independent Nationalist.

Leader in the House of Commons, William O'Brien, born 2 Oct. 1852.

PARTY STRENGTH, 1 Nov. 1913.

Since the General Election of December, 1910, twelve seats have been lost by the Government: Exeter, Cheltenham, Oldham, South Somerset, North Ayrshire, South Manchester, Crewe, North-West Manchester, Midlothian, Bow and Bromley, Newmarket, and Reading, while Londonderry has been gained. The strength of the various parties at the close of the General Election was: Liberals 272, Labour 42, Nationalists 76, Independent Nationalists 8—Government total, 398; Unionists, 272; majority, 126. The Government majority on Nov. 1, 1913, was 104, made up as follows:—

BALANCE OF PARTIES, 13 Nov. 1913.

Liberals	264
Labour	39
Nationalists	76
Independent Nationalists	8
Unionists	283
Total House of Commons.....	670

On Nov. 22, 1913, there were vacancies at Wick (L) and South Lanark (L).

RESIGNATION OF MEMBERS OF PARLIAMENT.—No member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the Chiltern Hundreds, or of the Manor of Poyning, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant and a writ issued.

SESSION 1912.

HOME RULE.—Immediately the House of Commons reassembled on Oct. 7, a resolution laying down the time to be spent on the Home Rule Bill was adopted, after the defeat of an Opposition Amendment by 323 to 232, and on Oct. 15 the Committee stage was resumed, Clause 2 being proceeded with, and, with the aid of the "guillotine," passed on Oct. 22. Progress subsequently became more speedy. On Oct. 31, an amendment providing that, after the first nomination, senators should be elected by provinces by a proportional representation method was agreed to without a division, but a proposal to apply the same principle to the Irish House of Commons, moved on Clause 9 on Nov. 9, was defeated, and another to reduce the membership of that Chamber from 164 to 103 was rejected. A remarkable situation arose on Nov. 11, when the House considered on report the financial resolution relating to the Bill. Sir Frederick Banbury moved a resolution providing that the total payment out of the Consolidated Fund to the Irish Exchequer should not exceed 2½ millions each year. After a brief debate, the House divided, and the Government was defeated by a majority of 21, the figures being 227 to 206, the House at once adjourning. Two days later the Prime Minister moved that the previous decision be rescinded. Mr. Bonar Law protested, and moved the adjournment of the debate, but this was rejected by 327 against 218. A member was ordered to withdraw for calling the Prime Minister a "traitor," and eventually the sitting was suspended owing to the Opposition refusing to listen to the Attorney-General. When proceedings were resumed an hour later, the disorder was so serious that the House was adjourned, amid scenes of great excitement. The Speaker on Nov. 14 recommended further consideration of the situation; the suggestion was accepted; and on Nov. 18 the Prime Minister announced a new plan, the financial resolution being negatived without a division on his motion, in order to set up again a committee on the finance of the Bill. The ensuing two days were devoted to this business, and the ordinary Committee stage was taken up again on Nov. 21. Clause 15 was amended by the Government to withhold from Ireland the right to reduce customs, while the provision that the Irish Parliament should be summoned to meet in Sept., 1913, was struck out, an interval of eight months between the date of the Royal Assent and the summoning being provided for. The Committee stage was concluded on Dec. 12, and after a brief Christmas recess the report stage opened. Sir Edward Carson, on Jan. 1, moved an amendment to exclude Ulster from the operation of the measure, but Mr. Asquith, while recognising that the opposition of some parts of Ulster was one of the gravest factors in the situation, declared that the claim of a relatively small minority to frustrate the aspirations of the great mass of the Irish people was one that no democratic government would allow. The amendment was defeated by 294 against 197. On Clause 9, an amendment moved by Sir A. Mond, providing that in any constituency returning three or more members the election should be held on the principle of proportional representation, and that every elector should have one transferable vote, was accepted. The report stage was completed on Jan. 13.

Two days later, upon the third reading motion, Mr. Balfour moved the rejection, warning the Government not to postpone the enlightenment of the people too long, in case there should be a calamity of a magnitude impossible to measure. If that came and blood were shed, declared Mr. Balfour, the real assassins would be those who had never had the courage to face the situation. Mr. Asquith, in reply, said the Government would be glad to meet any claim of the north-eastern counties which was founded on justice, or even apprehension, if it could be met without doing injustice to Ireland as a whole. But, he added, a minority was not entitled to thwart and defeat the demands of the great majority of their countrymen. Mr. Bonar Law, winding up the debate, said the Unionists of Ulster would resist the present Bill, and, he contended, they would be supported by the overwhelming majority of the people of England and Scotland. On Jan. 16—the fifty-second day devoted to the measure—Mr. Balfour's motion was defeated by 368 to 258, and the third reading was carried by 367 to 257. The Bill was on the same evening formally read a first time in the House of Lords. The final proceedings commenced on Jan. 27, when the Peers started a four days' debate upon the second reading, which was moved by the Marquis of Crewe. The rejection was moved by the Duke of Devonshire, who urged that the Bill could not possibly bring about a solution of the question, and seconded by Lord Zetland, a former Lord Lieutenant of Ireland. On the final day, Lord Lansdowne said no amendments which the Opposition could offer could convert the Bill into a measure which, as free agents, they could consent to place upon the Statute Book. On Jan. 30 the Bill disappeared for the Session, the motion for its rejection being carried by 326 against 69.

WELSH DISESTABLISHMENT.—The second great measure of the Session, which had obtained its second reading before the recess, was also the subject of a time-table resolution, which was carried on Nov. 29. Upon Clause 4, Mr. France, a Liberal, on Dec. 13, moved, and Mr. Gladstone seconded, an amendment to preserve for the Church all the endowments which it was proposed to take from her, with the exception of tithes. The proposal was defeated by 265 to 215, and the clause carried by a majority of 67. Upon the eighth clause, on Dec. 18, Mr. McKenna accepted amendments securing for the Church all property representing grants out of the Queen Anne's Bounty and the Royal Bounty Funds, despite protests from the Welsh Liberals. The Committee stage was concluded on Jan. 28, and on Feb. 3, on the report stage, a new clause, moved by Mr. McKenna, containing the Government's commutation scheme on a 3½ per cent. basis, was agreed to. Amid cheers from the Welsh Liberal members, the Bill was read a third time on Feb. 5, after the defeat, by 347 to 240, of an amendment for the rejection moved by Mr. Alfred Lyttelton. The first reading was accorded by the House of Lords on the same evening, and on Feb. 11 the Peers commenced a three days' debate upon the second reading, which was moved by Earl Beauchamp. Lord Kenyon met the Bill with a motion for its rejection, which was seconded by the Bishop of St. Asaph, and carried by 252 against 51 on Feb. 13.

ELECTORAL REFORM.—The Franchise and Registration Bill, which had also received its

second reading prior to the recess, was abandoned from a different cause. The customary time-table resolution was carried on *Jan. 23*, and the Committee stage opened on the following day, when, on behalf of Sir Edward Grey, Mr. Lyttelton moved the first of three woman suffrage amendments tabled, the proposal being to leave out the word "male." When the debate should have been resumed on *Jan. 27*, the Speaker, questioned by Mr. Asquith as the result of a suggestion previously mentioned by Mr. Bonar Law, said that if any of the amendments for the introduction of woman suffrage were carried, the Bill would in effect become a new measure, which ought to be withdrawn. The adoption of any one of the amendments would, he said, add materially to the electorate and introduce a new class of elector, a change which was not contemplated when leave to introduce the Bill was given and not assented to on its second reading. Declaring that the ruling had not been expected by the Government, Mr. Asquith said the Bill would at once be withdrawn. While they would not introduce a Bill for the enfranchisement of women, the Government would in the following Session give an adequate share of time to a private member's bill.

THE OSBORNE JUDGMENT.—With the collapse of the Franchise Bill, the House of Commons, on *Jan. 27, 1913*, considered the Trade Unions (No. 2) Bill, which had been introduced by the Government to deal with the situation created by the Osborne Judgment, and which had been dealt with by a Standing Committee. The measure was read a third time on *Jan. 31* without a division. During the debate, Mr. Bonar Law denied that the Unionist Party were hostile to trade unions, but said their position was that a member ought not to be compelled to contribute to the political funds of a union, a view which had been adopted in the Bill. On the motion of the Lord Chancellor, the House of Lords agreed to the second reading on *Feb. 5*, but one or two amendments were made by the Peers. These the Commons disagreed with generally, and the Peers not insisting upon the alterations objected to, the Royal Assent was given to the Bill.

THE WHITE SLAVE TRAFFIC.—The Criminal Law Amendment Bill, designed to strengthen the law against those engaged in the White Slave Traffic, which had been introduced by Mr. Arthur Lee and adopted by the Government, was passed during the autumn sitting, and came into force on the day upon which it received the Royal Assent—*Dec. 13*. The measure had been dealt with by a Standing Committee, and by the time it was considered on report by the Commons, on *Nov. 1*, a strong movement insisting upon its passage had been organised in the country. The Bill gave a constable power to take into custody without a warrant any person suspected of committing or attempting to commit procuration, and enabled the Court to sentence a prisoner to be flogged on the first conviction. The latter principle was added to the Bill on report by *136* to *132*, but was deleted subsequently by *188* to *164*. However, when the House of Lords dealt with the measure, an amendment was carried by *88* to *11* refusing to limit flogging to the second or subsequent offence, and the Commons finally agreed to this course.

RAILWAY RATES.—To carry out the pledge given by the Government to the companies

during the negotiations for the settlement of the railway strike in *1911*, Mr. Sydney Buxton, on *Jan. 30, 1913*, moved the second reading of the Railways (No. 2) Bill, enabling the companies to raise their rates in order to meet the increased burden thrown upon them by improving labour conditions. Despite criticisms, the second reading was carried by *229* to *52*. On the report stage, on *Feb. 13*, an amendment was accepted limiting the duration of the Bill to 5 years, and the third reading was carried by *135* to *31*, the Labour Party voting against the measure. When the Peers went into Committee on the Bill on *Feb. 19*, the limitation clause was negatived, and on *March 6*, in the Commons, the Prime Minister moved that the deletion of the clause should be agreed to, so that, as he explained, it should not be believed that the Government had failed to carry out their promise to the companies to the letter as well as in the spirit. The proposal was agreed to by *154* to *45*, and on *March 7* the measure received the Royal Assent.

SCOTLAND.—After having been dealt with by a Standing Committee, the Temperance (Scotland) Bill, conferring on the electors control over the liquor traffic by giving them the right to pass resolutions providing for the limiting or prohibition of licences, was considered by the Commons on the report stage on *Oct. 8*, and on the following day, after being amended as regards clubs and theatres, was read a third time by *261* to *104*. The Lords gave the Bill a second reading on *Nov. 6*, and on *Nov. 25* commenced the Committee stage, which was concluded on the *27th*, after the adoption of amendments giving an option in favour of "disinterested management," and making a two-thirds majority necessary to pass a no-licence resolution instead of a three-fifths majority. The Commons struck out several of these alterations, and on *Jan. 14* the Peers again considered the Bill. On the motion of Lord Lytton, it was provided that the Bill should come into operation ten years from *June 1, 1912*, and several amendments were carried against the Government. The Commons on *Feb. 6* rejected the Lords' amendment, postponing the operation of the Bill and the "disinterested management" proposals, but on *Feb. 17* the Lords insisted on the time-limit by *49* to *32*, and the Government subsequently announced that no further action would be taken, the Bill thus failing to pass.

SESSION 1913.

THE KING'S SPEECH.—After a recess of only two days, a Session which, although not entirely unproductive, was mainly devoted to Bills under the Parliament Act, was opened by the King in state on *March 10*. His Majesty's speech referred to the sustained prosperity of the country, and said the attention of Parliament would again be called to the measures in regard to which there had been disagreement between the two Houses, further legislation being restricted within narrow limits. In the Lords, the Address in reply, moved by Lord Aberconway and seconded by Lord Ashton of Hyde, was agreed to, after a debate in which Lord Crewe said the Government were giving the fullest possible consideration to the question of constitutional reform, so that they might set before the country a reasonable reform of the Constitution, making the Second Chamber a permanent element of the Legislature. In the Commons, Mr. Godfrey Collins

moved and Mr. Francis McLaren, the youngest Liberal member, and a son of Lord Aberconway, seconded the Address. Mr. Asquith, replying to Mr. Bonar Law, denied that redistribution was deferred for party reasons, and expressed the view that during the lifetime of the present Parliament it might be possible for the two parties to come to an agreement upon the subject. On *March 11*, the House rejected by *224* against *123* an amendment moved by Mr. Hayes Fisher, regretting that the Government had not announced any measures to aid local expenditure upon national services. An amendment condemning the methods of valuation of urban and agricultural land under the Finance Act was defeated by *191* to *100*. Mr. Walter Long moved the Opposition amendment, declaring that it would be improper to proceed further with the Home Rule Bill and the Welsh Church Bill while the constitution of Parliament was still incomplete and without reference to the electors. Mr. Asquith, in his response, expressed a hope that the day would soon come when he should submit a plan for the reconstruction of the Second Chamber; and Mr. Herbert Samuel said this would be done within the lifetime of the present Parliament, a Second Chamber with no vestige of the hereditary principle being created. In no circumstances, he added, would the veto be restored. The amendment was rejected by *262* to *169*. After the defeat of an amendment by Mr. Philip Snowden, regretting the absence of legislation for establishing a minimum living wage, and for nationalising land, railways, mines and "other monopolies," the Address was agreed to on *March 13*.

HOME RULE FOR IRELAND.—With the other measures to which the Parliament Act was applied (the Welsh Church Disestablishment Bill and the Scottish Temperance Bill), the Home Rule Bill was presented and read a first time in the House of Commons on *May 7*. Moving the second reading on *June 9*, the Prime Minister expressed the view that the Bill represented the considered judgment of the House of Commons, and said he would welcome any suggestions towards strengthening any of the safeguards which might be inadequate. Mr. Balfour moved the rejection, declaring his belief that the country was on the verge of a great national tragedy. Sir Edward Carson said that Ulster had behind her, in her armed resistance, the whole force of the Unionist Party; while Mr. Redmond urged that the passing into law of the Bill would mean the opening of a new era of Irish content and Imperial unity. The motion for rejection was defeated by *368* to *270*, and the Bill was read a second time. On *June 23*, the House agreed to a time table abolishing the Committee stage upon the Parliament Act Bills—after the rejection of an Opposition amendment—and on the *30th* an instruction by Mr. J. F. Hope to divide the measure into two parts was beaten by *264* to *136*. The House thereupon went into Committee, and in accordance with the guillotine motion the Chairman at once put the question that the Bill be reported without amendments. This was carried by *270* to *143*. The third reading was agreed to on *July 7* without a division, after the defeat by *352* against *243* of a motion for rejection brought forward by Mr. Bonar Law. On *July 14*, the House of Lords commenced a two days' discussion on the second

reading, which was moved by Lord Crewe. In reply, Lord Lansdowne moved that the House declined to proceed with the consideration of the Bill until it had been submitted to the judgment of the country. The Opposition, he said, suggested that before the Bill became law automatically it should be referred to the country, either by means of a General Election or the Referendum. Winding up the debate, Lord Curzon, on *July 15*, said he was authorised by Lord Lansdowne to say that in the event of a General Election indicating substantial approval of the Bill he would be prepared to advise the House to go into Committee and endeavour to remove its blemishes and undesirable features, and would ask all parties to join in order to shape it into a practical and palatable measure. Lord Lansdowne's motion was carried by *302* to *64*, and the Bill "expired" for the second time within a few months.

WELSH DISESTABLISHMENT.—A similar fate met the Welsh Disestablishment Bill. Formally presented on *May 7*, a motion for its rejection introduced by Lord Hugh Cecil was defeated by *357* to *258* on the second reading on *June 17*, after a debate extending over two days, and the second reading was carried without a division. An instruction to divide the Bill into two parts was rejected by *306* to *199* on *July 1*, and the Bill was reported without amendment by *309* against *204*, under the guillotine resolution. On the third reading, on *July 8*, the rejection was moved by Mr. Bridgeman, and beaten by *347* to *244*, the third reading being carried. The House of Lords devoted two days to the second reading, and on *July 22*, after an intimation by Lord Lansdowne that no compromise was possible, a motion introduced by Lord Salisbury, similar to that with which the Home Rule Bill was met, was carried by *242* to *48*.

TEMPERANCE (SCOTLAND) BILL.—The third measure brought forward under the provisions of the Parliament Act, the Temperance (Scotland) Bill, met with more success. The Bill speedily passed through the House of Commons, the only point of interest being that the new suggestion stage allowed by the Parliament Act was brought into use, though without effect. Mr. Barnes, on *July 9*, after the Bill had been ordered for third reading, moved a suggestion imposing on licence-holders the obligation of insuring against loss through the withdrawal of their licences. Mr. McKinnon Wood resisted the proposal, and it was rejected. The third reading was then carried, after the defeat of an amendment by *284* to *166*. The House of Lords gave the Bill a second reading, and on *July 29*, as the result of negotiations, it passed through Committee in an amended form. The alterations included a postponement of the date upon which the measure will come into operation, from *1917* until *1920*, and elaborate provisions regarding the necessary proportion of voters upon the question of local option. The amendments were accepted by the Commons, and the Bill received the Royal Assent on the day Parliament was prorogued, *Aug. 15*.

THE MARCONI CONTRACT.—Despite the importance of several items in the legislative programme, Parliamentary proceedings for a considerable portion of the Session were overshadowed by the deliberations of the Select Committee on the Marconi Agreement. In

addition to investigating the technical part of the question, the Committee considered the action of Sir Rufus Isaacs, Mr. Lloyd George, and Lord Murray of Elibank in purchasing shares in the American Marconi Company. By a party vote the Committee adopted a report submitted by Mr. Falconer, finding that all the Ministers concerned had acted throughout in the sincere belief that there was nothing in their action which would in any way conflict with their duty as Ministers of the Crown. The report found that the charges made against Ministers were absolutely untrue. A two days' debate on the subject was opened on June 18, when Mr. Cave moved, and Lord Helmsley seconded, a motion regretting the transactions of the Attorney-General and the Chancellor of the Exchequer, and the want of frankness displayed by them to the House. In a dignified speech, Sir Rufus Isaacs agreed that his failure to inform the House in the previous October of his transactions was a mistaken course, and said that, while thinking the transactions correct, if all the subsequent events could have been revealed to him he would not have entered into them. Mr. Lloyd George associated himself with the Attorney-General's remarks regarding the delay in placing all the facts before the House. He was conscious that he had done nothing which was a stain upon the honour of a Minister of the Crown; he might have acted thoughtlessly, carelessly, misguidedly, but he acted innocently, openly, and honestly. Mr. Lloyd George and Sir Rufus Isaacs then left the Chamber amid the cheers of Ministerialists. Mr. Buckmaster followed with an amendment to Mr. Cave's motion, declaring that the House accepted the statements of the Ministers, and placed on record its reprobation of false charges of the gravest description, which had been proved to be wholly devoid of foundation. On the second day Mr. Asquith described the terms of the Opposition motion as injurious in the highest degree. The Prime Minister said Ministers ought not to enter into any transaction whereby their private pecuniary interests might conceivably come into conflict with their public duty, while no Minister was justified in any circumstances in using official information given to him as a Minister for his own private profit or for that of his friends. He submitted that none of these rules had been consciously violated by the Ministers. Mr. Balfour said the Opposition agreed with the substance of the Buckmaster amendment, and asked whether the Government agreed with the substance of the motion. If so, complete unanimity could be obtained, but he wished the House to leave on record something which indicated its regret. An attempt was at once made to find a way in which this offer could be accepted. Sir Ryland Adkins moved a new amendment accepting the Ministers' expressions of regret, acquitting them of acting otherwise than in good faith, and reprobating the charges of corruption, Mr. Buckmaster's amendment being withdrawn. However, Mr. Bonar Law said he could not accept the new amendment, as the Opposition wished the House to express regret at the transactions. The amendment of Sir Ryland Adkins was carried by 346 to 268, and subsequently it was adopted as the substantive motion without a division. Later, Mr. Herbert Samuel intimated

that the Government did not intend to hold the Marconi Company to the contract, and a revised agreement was entered into, giving more favourable terms to the Government departments. This was ratified by the House of Commons on Aug. 8 by 210 to 138, after the rejection by 221 against 140 of an amendment moved by Lord Robert Cecil that, in the absence of a report by an independent body on the desirability of the agreement or on the terms of the proposed contract, the House ought to refuse its approval.

THE BUDGET.—Prior to the introduction of the Budget, a Bill legalising the collection of taxes agreed to in Committee of Ways and Means but awaiting the passage of the Finance Bill, was placed upon the Statute Book with little discussion. The feature of Mr. Lloyd George's fifth Budget statement on April 22 was the absence of new taxation. The previous year, said the Chancellor, had been the most prosperous that British trade had ever known. He estimated the expenditure for 1913-14 at £195,640,000. The receipts in 1912-13 amounted to £188,802,000, and upon that basis he had to find another £6,838,000, or £7,500,000, owing to a serious drop in the licence revenue. He expected to obtain £1,350,000, of which he was deprived last year owing to the coal strike and other causes, and he hoped to receive more from the new taxes imposed in 1909-10. Further, the Chancellor anticipated increased revenue due to good trade, remarking that there was much greater confidence and buoyancy in commerce, while unemployment had reached the lowest figure to which it had fallen of recent years. Upon his estimate of receipts there would be a deficiency of £815,000, but owing to the postponement of spendings last year, the expenditure this year was increased by one million, and he therefore proposed to utilise Exchequer balances to that amount to meet this deficit. Accordingly, he would have a total revenue of £195,825,000, leaving a margin for contingencies of £185,000. After announcing that a Revenue Bill amending the licensing and valuation provisions of the Act of 1909-10 would be introduced, Mr. Lloyd George concluded with the declaration that by the end of the year the Government would have reduced our national indebtedness by £102,000,000, and that the interest saved thereby would be £2,600,000 a year. The resolutions for the reimposition of duties were agreed to on subsequent days, and the Finance Bill was read a first time on May 7, as was the Revenue Bill. The second reading of the Finance Bill was obtained on June 11 by 268 against 171, after the defeat by a majority of 218 of a Labour Party amendment for the abolition of all taxes on food; and the Revenue Bill passed a similar stage on July 29. During the Committee Stage on the latter measure, the Chancellor intimated that the Government intended early in the next Session to introduce another Revenue Bill dealing with matters such as licensing and death duties. A deadlock occurred, however, upon the land values question, and on Aug. 12 the Government intimated that the Bill would not be proceeded with in view of the amendments tabled. The remaining stages of the Finance Bill were of little interest in either House, and the measure received the Royal Assent on Aug. 15.

PLURAL VOTING.—Mr. J. A. Pease, on April 8, introduced the Government's Plural Voting Bill as a first instalment of legislation dealing with

registration, redistribution, and the reconstitution of the House of Lords. The Government, he declared, intended to proceed with these reforms during the lifetime of the present Parliament. The Bill would not affect the right of any person to exercise his vote at any by-election so long as his name appeared upon the register, but before a general election a plural voter would have to select which of his votes he wished to register, penalties being provided for an infringement. After leave to bring in the measure had been given by 303 to 177, it was read a first time. The second reading stage was commenced on April 30, when Mr. F. E. Smith moved the Opposition amendment for the rejection of the Bill on the ground that it professed to remove only one of the anomalies in electoral law. The proposal had been introduced, he said, merely because the Government believed that it would give them a chance of rehabilitating their shattered fortunes. On May 1 the amendment was rejected by 314 against 227, and the Bill obtained its second reading. The Committee Stage was commenced on July 1, and was concluded on July 9; the report stage was taken on the following day, and the Bill was read a third time on July 14, after the defeat of a motion for rejection by Mr. Pretyma by 293 to 222. Lord Crewe moved the second reading in the House of Lords on July 24, but by 166 to 42 the House adopted a motion introduced by Viscount Peel declaring that their lordships were not prepared to accept a Bill which dealt only with the question of plural voting and which made no attempt to remove the serious imperfections of the present electoral law. A measure to extend the hours of polling until 10 p.m. in constituencies that desired it was passed during the Session.

WOMAN SUFFRAGE.—Before dealing with the annual Bill to extend the suffrage to women, a measure introduced by the Home Secretary—the Prisoners' (Temporary Discharge for Ill-Health) Bill—giving those responsible for the administration of the law power to release on licence persons who adopted the "hunger-strike," without remitting the sentences, and rendering them liable to rearrest if the conditions of the licence were not observed, was passed by Parliament and came into operation. On May 5 the debate was opened on the second reading of Mr. Dickinson's Woman Suffrage Bill, prepared by a committee of supporters of the movement, and intended to enfranchise not only widows and spinsters having a household qualification, but the wives of men having this qualification. Mr. Dickinson moved and Lord Henry Cavendish Bentinck seconded the motion for second reading, while Mr. Arnold Ward moved and Mr. Beck seconded the rejection. Speaking for himself only, the Prime Minister said the measure had not been approved by the existing electorate, and asked the House to think twice and thrice before it took a step unprecedented in its extent without a full and free conviction that it had behind it the deliberate and considered sanction of the community. Supporting the Bill, Sir Edward Grey strongly condemned militancy, while Mr. Walter Long, opposing the measure, said it was a disgrace to the country that the Prime Minister should have been exposed to such treatment as he had received. The second reading of the Bill was defeated by 266 to 219, a majority of 47, 55 Nationalists voting against the Bill.

NAVY.—Mr. Churchill made his annual statement on the Navy on March 26 in introducing the Navy Estimates, which, he said, showed a considerable decrease, the total being £46,300,000, which might have to be supplemented. Increases, he declared, were certain unless the period of acute rivalry came to an end, and, he asked, why should not all the countries in the world take a naval holiday for a year so far as naval construction was concerned. Britain would do her utmost to preserve her leadership in design, while her resources and powers of construction were unsurpassed, and, therefore, he said, his appeal was no appeal of weakness, but one addressed to all nations, and to no nation with more profound sincerity than the German Empire. As the German naval construction had increased, the British programme would also be increased, during the six years of the German Naval Law, by four capital ships, all of which had to be laid down this year. The total for the six years would be 25 against 14, and two ships would be added to this total for every vessel laid down by Germany, the Colonial ships being additional to the 60 per cent. standard. By the suggested naval holiday in 1914 or 1915, one of the most stupid and unnatural chapters in the whole history of European civilisation might, Mr. Churchill added, be brought to a close. Great Britain, however, could not afford to allow another naval power to approach her so nearly as to be able to deflect or restrict her political action by purely naval pressure. Later, on June 5, Mr. Churchill announced that owing to the rejection of the Canadian Naval Aid Bill the Government had determined to advance the construction of the three contract ships of the year's programme.

ARMY.—In his annual statement on the motion to go into Committee on the Army Estimates, on March 19, Colonel Seely declared that in the opinion of the Government and the Committee of Imperial Defence the danger of an overwhelming invasion was not one which we had reason to fear. A committee of the Defence Committee was to be appointed to reconsider the problem, Mr. Balfour being one of the members. While regretting the shortage in the Territorial Force, he said the Government intended to adhere to the voluntary system. The second reading of a Bill imposing on all British subjects over 18 years the obligation of serving in the Territorial Force for four years was moved by Mr. Sandys and seconded by Sir Charles Rose on April 11, but was "talked out." During a debate on the second reading of the Army Annual Bill in the House of Lords on April 21, Lord Haldane said the Government considered it essential to have for home defence a force of from 400,000 to 500,000, made up of 30,000 Territorials and the balance of Special Reserve and Regulars.

AMENDING THE INSURANCE ACT.—The Chancellor of the Exchequer, on June 24, introduced the National Insurance Act (Amendment) Bill to remedy some of the grievances under the original measure. The Bill gave statutory authority for additional grants for medical benefits, while the provision under which workers over 50 years of age received reduced benefits was altered so that all employed contributors up to 70 years of age would receive the full benefits, full medical benefits being given to all insured persons to the end of their lives. There would be a further contribution from the State

amounting to £207,000. The Bill was read a second time on *July 15*, and was sent to a Standing Committee after a proposal that it should be kept in the House had been defeated by 284 to 160. During the proceedings in Committee an amendment moved by Mr. G. Locker-Lampson that maternity benefit should in every case be the mother's benefit was added. This question again came before the House on the report stage, and on *Aug. 6* an amendment was moved on behalf of the Labour Party providing that when maternity benefit was payable in respect of the husband's insurance, the wife's receipt, or his receipt on her behalf, should be a sufficient discharge, and that when the money was paid to the husband he should pay it to the wife. The matter was left open, and the amendment was carried by 186 against 177, whereupon Lord Robert Cecil moved that the husband's receipt for the payment should only be valid when he had obtained the wife's authorisation to receive the money. This was carried by 186 to 165. The remaining stages were featureless, and the Bill received the Royal Assent on the day of the prorogation.

MENTAL DEFICIENCY.—A revised version of the Mental Deficiency Bill, which secured a second reading in the previous Session, was introduced, and in moving the second reading on *May 28*, Mr. McKenna said the Bill proposed that the control over mentally defective persons should be exercised by a Board, upon which at least two women should serve. Feeble-minded persons who were not now certificated could not be dealt with compulsorily under the Bill unless they were neglected, abandoned, or cruelly treated, committed habitual offences or proved to be habitual drunkards. Children could be dealt with compulsorily if incapable mentally or morally of benefiting by special schools, or if notified as requiring protection after leaving school. Half the cost of the duties imposed upon local authorities by the Bill would be borne by the State. The Home Secretary thought that at first 20,000 to 30,000 persons would come under the Bill. There was considerable opposition during the Committee stage from a group of members, but the measure was placed on the

Statute Book with few amendments. A similar measure for Scotland was also introduced by the Government, and received the Royal Assent.

EDUCATION.—Towards the close of the Session the Government's scheme for the development of education, to be dealt with seriously in 1914, was unfolded by Mr. J. A. Pease, in introducing (on *July 22*) a Bill to amend the law with respect to grants in aid of building, enlarging and improving elementary schools. The President said under next year's Bill the duty would be imposed on every county and county borough of providing a complete system of progressive education. The Board would co-ordinate the schemes of neighbouring authorities, and grouped authorities might delegate part of their powers to provincial committees. There would be extensive subventions from the State, the elementary grant being increased and the method of distribution changed, in addition to specific grants for higher education, based upon the area. The State would further assume responsibility for a definite share of all loan charges incurred for educational purposes. The voluntary schools would remain part of the educational fabric, but the grievances of Nonconformists—mainly but not exclusively in single-school areas—would be remedied. The Government, he declared, were laying the foundation of a national system which was worth some sacrifices, and deserving of the good will of all parties and creeds. After slight criticism, the Bill amending the law relating to grants was given a first reading, no further progress being made with the measure.

IRISH LAND PURCHASE.—On *July 21* Mr. Birrell introduced a Bill to amend the law relating to the occupation and ownership of land in Ireland, which was read a first time. The object was to lay the proposals before the country, and the measure was not proceeded with. By the Bill 60 millions would be raised to complete the work of land purchase, and another million for the construction of labourers' cottages. Mr. Redmond said the settlement of the land question was so important that he would be ready to do everything in his power to bring parties together with a view to passing an agreed Bill.

THE FRANCHISE IN 1913.

The following table shows the number of Electors in the three Kingdoms, classified according to their respective qualifications. It will be seen that about one sixth of the whole population, or about one third of the male population, are in possession of the franchise.

DIVISION.	ELECTORS FOR COUNTIES.			ELECTORS FOR BOROUGHES.			Univer- sity Electors.	Total Electors (1913).	Popula- tion, 1913.
	Owners.	Occupiers.	Lodgers.	Occupiers.	Lodgers.	Freemen, Free- holders, &c.

The Balance of Parties since 1837.

THE following table shows the Balance of Parties at the meeting of each Parliament since 1837, the Majority being that ascertained at the conclusion of the polling at the General Election. It will be seen that the 18 elections have returned 13 Liberal and 5 Conservative majorities, while the Liberal Party has been in power for 45 and the Conservative Party for 29 of the 74 years included in the table. The largest Liberal majority was 354 (1906), and the smallest 1 (1847); the largest Conservative majority was 152 (1895), and the smallest 46 (1880).

Premiers, Principal Secretaries,

Premiers and Secretaries of State.—The inability of George I. to understand the English language made his attendance at meetings of the Cabinet "useless and irksome, and allowed the appearance of a Prime Minister, for his example has been so consistently followed as to have become a settled custom." In 1905 the office of Prime Minister was officially recognised. The

first mention of a King's Secretary of State is under Henry III. In 1433, owing to press of work in France, two Secretaries were appointed, and until 1794 two seems to have been the normal number. From 1688 to 1782 one of the two dealt with matters pertaining to the Northern States of Europe, the other with matters pertaining to the Southern States, Home,

Irish, and Colonial business. In 1782 the former became Foreign and the latter Home Secretary, still retaining Irish and Colonial business. The Home Secretary was also responsible for the Secretary at War, who, though not a Secretary of State, directed the movements, payment, and civil control of the Army. In 1794 a Secretary of State for War was appointed to manage all military business, and in 1801 he was given the control of the Colonies. In 1854 the War Secretary was relieved of Colonial business, and a fourth Secretary of State was appointed for the Colonies. In 1858 the Secretary of State for India was appointed.

Attorney-General	John F. Moriarty	5,000
Solicitor-General	Jonathan Pim, K.C.	2,000

NOTE.—All the above Ministers hold office at the pleasure of the Sovereign and go out of office at a change of Government.

ADMIRALTY, Whitehall, S.W.

The management of all maritime affairs, the government of the Royal Navy, jurisdiction in maritime cases, and the appointment and commissioning of Naval Officers, was in early times the province of the "Lord High Admiral," the ninth Great Officer of State. The judicial functions of the office have long been vested in other hands, and the office itself has been "in commission" since 1708 (except for a short time in 1827, when the Duke of Clarence was Lord High Admiral), the duties being performed by "Commissioners for executing the Office of Lord High Admiral of the United Kingdom." These Commissioners, or "Lords of the Admiralty" as they are more generally called, consist of a Political "First Lord" (who, by virtue of the importance of his office, is a Cabinet Minister), a "First Sea Lord," "Second Sea Lord," "Third Sea Lord," "Fourth Sea Lord," now always selected from Officers of the Service, a Political "Civil Lord," and an additional "Civil Lord." There is also a "Parliamentary and Financial Secretary" and a non-political Permanent Secretary. The net amount provided in the Navy Estimates 1912-13, for administration, is £428,500.

(See NAVAL DEPARTMENT, pp. 235-337.)

AGRICULTURE AND FISHERIES, Board of,
4, 5, 6 & 8 Whitehall Place; 3 & 21 St. James's Square; 43 and 54 Parliament Street, S.W.; and Craven House, Northumberland Avenue, W.C.

The Board of Agriculture was established by the Act of 1889, when there were transferred to it the duties of the Privy Council in connection with Diseases of Animals, and the functions of the Land Commissioners for England. Technically, the membership of the Board is analogous to that of the Local Government "Board," and "Board" of Education, but in effect the establishment consists of a President, a Parliamentary Secretary, a Permanent Secretary, Assistant Secretaries, &c., and its main functions are to prevent the introduction or spread of certain diseases among animals, to control the transit of animals and the exportation of horses, to deal with insect and fungus pests, to collect and distribute information relating to agriculture, horticulture and forestry in Great Britain, to administer Grants for Agricultural Education and Research (including Forestry) in England and Wales, to collect and publish agricultural statistics, to administer the Fertilisers and Feeding Stuffs Act and the Sale of Food and Drugs Acts in Great Britain so far as the latter relate to agricultural produce, to control the redemption and re-apportionment of tithe rent charge and the regulation or enclosure of common land, to enfranchise copyhold land, to administer the Small Holdings and Allotments Acts and the Acts relating to the improvement of land by private owners, to administer the Acts relating to Sea, Salmon and Freshwater Fisheries as regards England and Wales, and to conduct the English share of the International Fisheries Investigations in the North Sea. The Board also publish a monthly "Journal," price 4d. By the Board of Agriculture and Fisheries Act of 1903 certain powers and duties formerly exercised by the Board of Trade with respect to fisheries were transferred to this Department, the designation of which was at the same time altered. The Board also control the Ordnance Survey of the U.K., which is the subject of a separate Vote. By an Order in Council of 28 March, 1903, the supervision of the Royal Botanic Gardens, Kew, was transferred to the Board. The cost of administration in the financial year 1913-14 was estimated at £309,532.

President, Rt. Hon. Walter Runciman, M.P.	£2,000
Private Sec., A. S. Gaye	£300
Do., A. D. Sanderson	£100
Do., Cecil Harmsworth, M.P.	£100

ARMS, COLLEGE OF, OR HERALDS' COLLEGE, Queen Victoria Street, E.C.

The Herald's College was incorporated and endowed by Richard III. in 1484, as a College of Arms, presided over by the Earl Marshal, the other members being the then Kings of Arms, and the six Heralds, to regulate the granting and the bearing of Coat Armour, in addition to the ordinary functions of the Heralds. Their first residence was in Pulteney's Inn until the present site was granted by Queen Mary in 1554, the house being rebuilt as it now stands after destruction in the Great Fire.

Earl Marshal, His Grace the Duke of Norfolk, K.G., G.C.V.O.

KINGS OF ARMS.

Garter, Sir Alfred Scott Scott-Gatty, K.C.V.O., F.S.A.

Earl Marshal's Sec., Gordon A. de Lisle Lee.
Registrar, Charles Harold Athill, M.V.O., F.S.A.

CHARITY COMMISSIONERS,

Ryder Street, St. James's, S.W.

The Charity Commission was appointed by Act of Parliament in 1853 "for the better administration of Charitable Trusts in England and Wales." In 1874 the powers previously exercised by the Endowed Schools Commissioners were temporarily transferred to the Charity Commission, and in 1879 the transfer was made permanent. The powers of the Commissioners over all endowments held for purely Educational purposes have now been transferred to the Board of Education in pursuance of Orders in Council made under the Board of Education Act, 1899.

Chief Commissioner, Charles Archer Cook, C.B. £1,500
Private Sec., A. E. McLaren £100
Commissioners, Arthur Francis Leach, £1,200; and Rt. Hon. C. P. Allen, M.P.unp.
Secretary, Henry W. T. Bowyear £1,000
Assistant Commissioners and Principal Clerks, H. P. Morris; J. F. Mills; G. C. Bower; H. Hodgkin; G. W. Wallace; A. C. Kay; A. K. Kennedy-Purvis; C. F. Ritchie £650 to £900
Accountant, Off. Trustees' Dept., E. Gilbert

Assist. do., C. T. Radcliffe £550 to £700
 1st Class Clerks, G. B. Bone; E. Macpherson; G. B. Rooke; H. D. S. Leake £450 to £600
 2nd Class Clerks, W. Endersby; A. E. McLaren; R. E. Ford; C. Hoop-Wallace; F. B. Jackson; W. F. Fox; H. F. Chettle £250 to £400

 Sec. and Registrar, L. C. H. Weekes £800 to £900
 Assist. Sec., T. Prior Lees £700 to £750
 Senior Clerks, G. G. Mennell and J. H. Brackenberry £500 to £700
 Director of Examinations, D. B. Mair £700 to £900

COLONIAL OFFICE, Downing Street, S.W.

The business of the Colonies was, until 1801, included in the functions of the Home Secretary, to be transferred in that year to the newly-created "Secretary for War." In 1854 the outbreak of the Russian War led to the appointment of a Secretary of State for the Colonies (to relieve the War Secretary of Colonial business). The Colonial Secretary possesses an advisory power of veto on legislation of the self-governing Colonies, and is responsible for the government of the remaining Dominions beyond the Seas in inverse proportion to the amount of self-government granted to them. The salaries, &c., of the Colonial Office are estimated at £560,285 for 1913-1914.

Principal Secretary of State for the Colonies, Rt. Hon. Lewis Harcourt, M.P. £5,000
Priv. Sec., F. G. A. Butler £300
Assist. do., H. F. Batterbee, £100; R. Furse, £150; F. W. S. Maclaren, M.P.; J. C. C. Davidson unp.

UNDER-SECRETARIES.

Permanent, Sir John Anderson, G.C.M.G., K.C.B. £2,000
Private Secretary, A. B. Keith, D.C.L. £150
Parliamentary, Rt. Hon. Lord Emmott, P.C. £1,500
Private Secretary, H. R. Cowell £150
Assistant Under-Secretary, Sir Hartmann Wolfgang Just, K.C.M.G., C.B. £1,500
 do. Sir George V. Fiddes, K.C.M.G., C.B. £1,500
Chancellor of the Order of St. Michael & St. George, The Duke of Argyll, K.G., P.C., K.T., G.C.M.G., G.C.V.O.
Chief Clerk, Chas. Alex. Harris, C.B., G.C.M.G., M.V.O. £1,150
Legal Adviser, John Shuckburgh Risley, C.B. £1,000
Principal Clerks, Geo. Wm. Johnson, C.M.G.; H. J. Read, C.M.G.; Charles Strachey; H. C. M. Lambert, C.B.; A. E. Collins, C.M.G.; W. D. Ellis; G. E. A. Grindle (allowances to two, £200 each) £850 to £1,000
Legal Assistant, C. B. L. Tennyson £750
 1st Class Clerks, J. F. N. Green; T. C. Macnaghten; E. H. Marsh, C.M.G.; C. T. Davis; F. G. A. Butler; A. Fiddian; E. R. Darnley; R. V. Vernon; W. C. Bottomley £600 to £800

* At the Customs Branch.

and Class Clerks. A. J. Harding; H. R. Cowell; R. H. Griffin; E. J. Harding; A. B. Keith, D.C.L.; H. F. Batterbee; J. R. W. Robinson; D. L. H. Baynes; A. C. C. Parkinson; J. E. W. Flood; O. G. R. Williams; R. A. Wiseman; C. W. Dixon; H. N. Tait; E. G. S. Mächting; J. A. Calder; H. F. Downie; A. Cooke; W. H. Croome. £200 to £500
Accountant. A. H. H. Engelbach, I.S.O. £600 to £700
Assist. Accountant. W. H. Eggett £300 to £450
Librarian. C. Atchley, C.M.G., I.S.O. £300 to £500

CROWN AGENTS FOR THE COLONIES,

Whitehall Gardens, S.W.

(*Stock Transfer Office*, 1 Tokenhouse Buildings, E.C.; *Shipping Office*, 13 Gt. St. Helen's, E.C.)

The Crown Agents for the Colonies are appointed by the Secretary of State for the Colonies, and act as business and financial agents in this country for the Governments of the Crown Colonies and Protectorates, some 50 in number. The self-governing Dominions have Agents of their own (see p. 485).

Crown Agents. Sir R. L. Antrobus, K.C.M.G., C.B., £1,800; Maj. M. A. Cameron, C.M.O., late R.E., £2,500 to £1,800; W. H. Mercer, C.M.G., £1,300 to £1,500
Secretary. P. H. Ezechiel £600 to £1,000
Chief Clerk and Chief Accountant. E. G. Antrobus £700 to £950

Accountant. N. E. O. Willis £500 to £700

Registrar for Inscribed Stocks. C. F. R. H. Urquhart £550 to £700

Chief Cashier. L. Adams, I.S.O. £550 to £700

Head of Engineering and Works Dept. Maj. J. F. Carmichael, late R.E. £700 to £1,000

Head of Engineering Inspection Dept. A. M. Heath, A.M.I.C.E. £700 to £1,000

Head of General Stores Dept. H. F. Smith £550 to £700

Head of Insurance & Checking Dept. W. E. James £550 to £700

Head of Appointments Dept. H. Martin £550 to £700

Head of Shipping Dept. T. H. Holt (and £300 personal allowance) £550 to £700

CUSTOMS AND EXCISE, BOARD OF, E.C.

Commissioners of Customs were first appointed in 1671 and housed by the King in London, the present "Long Room" replacing that built by Charles II. and rebuilt after destruction by fire in 1778 and 1824. In 1830 the Customs business of Ireland was transferred to London. The Excise Department was formerly under the Inland Revenue Department, and was amalgamated with the Customs Department on 1 April, 1909.

Chairman. Sir Laurence N. Guillemand, K.C.B. £2,000

Private Sec. E. B. Carpenter.

Assist. Secs., The Lord Basil Blackwood; G. Haw
each £600 to £800

DURHAM, COUNTY PALATINE OF.

It is uncertain when "Palatine" privileges were first
exercised in the County of Durham, as no formal creation
of the Palatinate by charter or deed appears to have
ever been made. From the founding of the See of
Lindisfarne, out of which the bishopric and palatinate
of Durham arose, the Bishops received large grants of
lands, with extensive immunities; and Guthred, king of
Northumbria, and Alfred the Great appear to have con-
firmed the grant to the See of the whole of the land
between the rivers Tyne and Wear. There is no evidence
of the exercise of palatine privileges by the Bishops prior
to the Norman Conquest, but it is probable that these
were acquired in the reign of the Conqueror, and they
were exercised by the Prelates until resumed by the
Crown in 1836. Palatine counties are understood to
have been erected for the defence of neighbouring king-
doms against the Welsh and Scots, and were in reality
self-contained kingdoms in alliance with their creator.
The ancient customs of the County Palatine of Durham
are in some measure retained, the administrative
authority being exercised on behalf of the Crown.

Chancellor, John Scott Fox, K.C.

Attorney-General, Edward Tindal Atkinson, K.C.

Solicitor-General, Herbert F. Manisty, K.C.

Registrar of Chancery Court, A. O. Smith.

Steward & Clerk of Halmotes, F. A. Manley.

EXCHEQUER AND AUDIT DEPARTMENT, Victoria Embankment, E.C.

The Comptroller and Auditor-General was appointed by Letters Patent under 29 & 30 Vict. c. 39 §3 (1866), in place of the Comptroller-General of the Exchequer and the Commissioners for Auditing the Public Accounts, whose duties were handed over to him. The main functions of the office are: (1) Exchequer.—To authorise issues from the Exchequer, not exceeding the amounts sanctioned by Parliament; to authorise borrowings in case of deficiency; to examine the daily Exchequer accounts of the Banks of England and Ireland, and the accounts of the Consolidated Fund. (2) Audit of Public Accounts.—To ascertain that money expended has been applied to the purpose for which the grant of Parliament was intended to provide; that the expenditure is supported by proof of payment, and generally to verify the correctness of the Accounts and to report to Parliament thereon. The net expenses of the Department were estimated at £68,265 in 1913-14.

Comptroller and Auditor-General, Sir Henry James Gibson, K.C.B. £2,000

Private Secretary, P. A. N. Nicholls £100

Andrews £350 to £500

There are also 148 Examiners £100 to £350

FOREIGN OFFICE, Downing Street, S.W.

(Office hours 11 to 6.)

The Secretaryship of State for Foreign Affairs was created in 1782, superseding the ancient Secretary for the Northern Department of Europe (as the Office had been called since 1688). He is assisted by two Under-Secretaries (one Parliamentary, the other Permanent), three Assistant Under-Secretaries, a Librarian, a Head of the Treaty Department, and a staff of Clerks. The chief functions, in addition to the formal duties, are receiving and answering communications from individuals or other Government Departments, from Diplomatic and Consular Agents of this country or others, and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £99,730 in 1913-14.

Principal Secretary of State for Foreign Affairs, Rt. Hon. Sir Edward Grey, Bart., K.G. M.P. £5,000

FRIENDLY SOCIETIES' REGISTRY.

Central Office, 28 Abingdon Street, S.W.

A Barrister was appointed in 1828 to certify the Rules of Savings Banks, and in 1829 to certify those of Friendly Societies. In 1845 he was constituted Registrar of Friendly Societies. By the Friendly Societies Act, 1875, the Central Office of the Registry of Friendly Societies was created, consisting of Chief Registrar and the Assistant Registrars for England. It exercises numerous and important functions under the Friendly Societies Act, the Industrial and Provident Societies Acts, the Building Societies Acts, the Trade Union Acts, the Workmen's Compensation Acts, the Scientific Societies Act, the Trustee Savings Banks and Post Office Savings Banks Acts, the Loan Societies Act, the Shop Clubs Act, the National Insurance Act, and a great

* Minor Staff Officers.

number of local and personal Acts. The Chief Registrar is also a member of the National Health Insurance Commissions for England, Scotland, Ireland, and Wales, and of the National Health Insurance Joint Committee.

Minor Staff Clerk, F. H. Minett.....£200 to £300

GENERAL REGISTER OFFICE,

Somerset House, W.C.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1522, but the Statutes concerning registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 88. The first Registrar-General was appointed in 1836, his work being enormously increased by the above Act of 1874, which made registration compulsory in England and Wales. The expenses of the Office for 1913-14 were estimated at £57,035 (including £3,094 for the Census Office).

Registrar-General, Bernard Mallet, C.B. £1,200
Private Sec., M. S. Birkett.

HOME OFFICE, Whitehall, S.W.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of the United Kingdom, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business, and until 1794 War business also. In 1801 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy. The administrative expenses of the Home Office were estimated at £267,613 in 1913-14.

Principal Secretary of State for Home Affairs, Rt. Hon. Reginald McKenna, M.P. £5,000

Private Secs., S. W. Harris, £150; Hon. H. R. C. Balfour.....£700

METEOROLOGICAL OFFICE,	
South Kensington, S.W.	
The Meteorological Office was established as a Department of the Board of Trade in 1854. Changes have been made from time to time in the management, and the control is now vested in a Director and Committee appointed by the Lords Commissioners of the Treasury. The work of the office includes the collection and discussion of meteorological observations from all oceans, the maintenance of a number of stations for daily telegraphic reports upon which forecasts and storm warnings are based, and other work incidental thereto. The Kew Observatory at Richmond and the Observatory at Eskdalemuir formerly in connexion with the National Physical Laboratory are now administered by this Office. The administrative expenses are met by Government grants, which amount to £20,000 annually.	
Director and Chairman of Committee, W. N. Shaw, LL.D., SC.D., F.R.S.

MINT, THE ROYAL, Tower Hill, E.

The Royal Mint, as now constituted, may be said to date from 1877, and the buildings from 1810, the latter being completed in that year at the cost of over £250,000. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such, and combined it with that of the Chancellor of the Exchequer. The first known Master (or Warden) of the Mint dates from Henry I., and the last Warden was Lord Maryborough (1814-23), the last Master being Professor Thomas Graham, who died in 1869. The estimated administrative expenses amount to £157,705 for 1913-1914.

Master and Worker, The Chancellor of the Exchequer.
Deputy Master and Engraver of H.M. Seals, Sir Thomas Henry Elliott, K.C.B. £1,750

Ottawa, Canada.

Deputy Master, J. Bonar, L.L.D. £900 to £1,100
Superintendent, A. H. W. Cleave £650 to £900

MUSEUM, THE BRITISH,

Bloomsbury, W.C.

The British Museum may be said to date from 1753, when Parliament granted the sum of £20,000 to purchase the collection of books, &c., of Sir Hans Sloane, the building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1857, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Acts. Rules, &c., affecting the public, dates and times of opening, &c., will be found among "Places of Interest." The administrative expenses of the British Museum were estimated at £202,508 (including Natural History Museum) in 1913-14, and were met by a vote under "Education, Science, and Art," Class IV. of the Civil Service Estimates.

Director and Principal Librarian, Sir Frederic George Kenyon, K.C.B., F.R.A., Litt.D. £1,500
Assistant Secretary, A. R. Dryhurst £600 to £700
Clerk in Charge of Accounts, C. P. Cooke £400 to £500
Assistant, 1st Class, E. B. Nicholson, B.A. £300 to £500
Minor Staff Officers, J. Knowles; J. F. Isaac £300 to £400

Keeper of Printed Books, Arthur W. Kaye Miller, M.A. £700 to £800
Assistant Keepers, George F. Barwick, B.A.; A. W. Pollard, M.A.; W. Barclay Squire, M.A., F.S.A. £500 to £650

Superintendent of Reading Room, G. F. Barwick, B.A.
Assistants, 1st Class, J. A. J. de Villiers; L. H. E. Taylor; Robert F. Sharp, B.A.; R. A. Streetfield, B.A.; F. D. Sladen, B.A.; H. Symons, B.A.; P. Wilson, M.A.; W. A. Marsden, B.A.; L. C. Wharton, B.A.; G. D. R. Tucker, M.A.; H. Thomas, Litt.D.; A. J. K. Esdaile, B.A. £300 to £500

Assistants, and Class, J. V. Scholderer, M.A.; F. W. Jekyll, B.A.; A. Forbes Johnson, B.A.; F. C. W. Hiley, M.A.; A. I. Ellis, M.A.; I. A. K. Burnett, M.A.; F. P. Sprent, B.A.; E. W. F. Lynam, B.A.; M. R. Dobie, B.A.; A. G. Macfarlane, B.A. £150 to £300

Keeper of Manuscripts and Egerton Librarian, J. P. Gilson, M.A. £700 to £800
Assistant Keeper of MSS., J. A. Herbert, B.A. £500 to £650

Assistants, 1st Class, A. Hughes-Hughes; D. T. Baird Wood, M.A.; H. Idris Bell, M.A. £300 to £500
Assistants, and Class, R. E. W. Flower, B.A.; A. C. Stewart, M.A.; G. T. Hales, B.A.; H. J. M. Milne, B.A.; E. G. Millar, B.A.; E. H. W. Meyerstein, B.A. £150 to £300

Keeper of Oriental Printed Books and MSS., Lionel D. Barnett, Litt.D. £700 to £800
Assistants, 1st Class, Rev. G. Margoliouth, M.A.; Lionel Giles, M.A.; Edward Edwards, M.A. £300 to £500

Assistant, and Class, A. S. Fulton, M.A. £150 to £300
Keeper of Prints and Drawings, Campbell Dodgson, M.A. £700 to £800
Assist. do. (in charge of the Sub-Dept. of Oriental Prints, &c.), R. Laurence Binyon, B.A. £500 to £650

Assistant, 1st Class, A. M. Hind, B.A. £300 to £500
Assistants, and Class, A. E. Popham, B.A.; A. D. Schloss, B.A. £150 to £300
Keeper of Egyptian and Assyrian Antiquities, Ernest A. Wallis Budge, Litt.D., F.S.A. £700 to £800

Assistant Keeper, L. W. King, M.A., F.S.A. £500 to £650
Assistant, 1st Class, H. R. H. Hall, M.A., F.S.A. £300 to £500

Assistant, and Class, A. W. A. Leeper, B.A. £150 to £300
Keeper of Greek and Roman Antiquities, Arthur H. Smith, M.A., F.S.A. £700 to £800
Assistant Keeper, H. B. Walters, M.A., F.S.A. £500 to £650

Assistants, and Class, E. J. Forsdyke, M.A.; F. N. Pryce, B.A. £150 to £300
Keeper of British and Medieval Antiquities and Ethnography, Sir Hercules Read, LL.D., F.S.A., F.R.A. £700 to £800

Assistant do., O. M. Dalton, M.A., F.S.A. £500 to £650
Assistants, 1st Class, R. L. Hobson, B.A.; R. A. Smith, B.A., F.S.A.; T. A. Joyce, M.A. £300 to £500
Assistant, and Class, H. J. Braunholtz, B.A. £150 to £300

Keeper of Coins and Medals, G. F. Hill, M.A. £700 to £800
Assistant, 1st Class, John Allan, B.A. £300 to £500

Assistants, and Class, G. C. Brooke, B.A.; Harold Mattingly, M.A.; E. S. G. Robinson, B.A. £150 to £300
Solicitors, Messrs. Warrens, 99 Gt. Russell Street.

MUSEUM, THE NATURAL HISTORY,

Cromwell Road, S.W.

The Natural History Collections in the British Museum were removed to South Kensington in 1881, the new museum being opened in the same year. The hours of opening, &c., will be found under "Places of Interest." The administrative expenses were estimated at £58,939 (plus £19,845 under Class I.—Office of Works) in 1913-14.
Director, L. Fletcher, Ph.D., F.R.S. £1,200
Assistant Secretary, Charles E. Fagan, I.S.O. £700
Assistant, 1st Class, Basil H. Soulsby, B.A., F.S.A. £300 to £500

Clerks, W. H. R. Holl; W. J. Anderson £250 to £350
Assistant, 1st Class (Library), B. B. Woodward £500
Keeper of Zoology, Dr. Sidney F. Harmer, M.A., F.R.S. £800

Assistant Keeper, W. R. Ogilvie-Grant £500 to £650
Assistants, 1st Class, George A. Boulenger, F.R.S.; Oldfield Thomas, F.R.S.; Fras. Jeffrey Bell, M.A.; Randolph Kirkpatrick; Dr. W. T. Calman; C. T. Regan, M.A. £300 to £500

Assistants, and Class, A. S. Hirst; J. G. Dollman, B.A.; W. P. Pycraft; G. C. Robson, B.A.; C. Court Treutt; H. A. Baylis, B.A. £150 to £300
Keeper of Entomology, C. J. Gahan, M.A. £700 to £800

Assistants, 1st Class, Sir George F. Hampson, Bart.; Ernest E. Austen; J. Hartley Durrant; G. J. Atow £300 to £500
Assistants, and Class, G. Meade-Waldo; F. W. Edwards, B.A.; K. G. Blair, B.Sc.; N. D. Riley; B. F. Cummings £150 to £300

Keeper of Geology, Dr. A. S. Woodward, F.R.S. £800
Assistant do., Dr. F. A. Rafter, F.R.S. £650

Assistants, 1st Class, R. B. Newton; Dr. C. W. Andrews, F.R.S.; G. C. Crick	£300 to £500
Assistant, 2nd Class, W. D. Lang, B.A.	£150 to £300
Keeper of Mineralogy, Dr. George T. Prior, M.A., F.R.S.	£700 to £800
Assistants, 1st Class, L. J. Spencer, M.A.; Dr. G. F. H. Smith, M.A.	£150 to £300
Assistant, 2nd Class, W. Campbell Smith, B.A.	£150 to £300
Keeper of Botany, Dr. A. B. Rendle, F.R.S.	£800
Assistants, 1st Class, A. Gepp, M.A.; E. G. Baker	£300 to £500
Assistants, 2nd Class, H. F. Wernham, B.A.; J. Ramsbottom, B.A.; A. J. Wilmott, B.A.	£150 to £300

MUSEUM, THE LONDON,

Stafford House, St. James's, S.W.

The London Museum was instituted, on the lines of the Carnavalet at Paris, for the conservation of the antiquities, &c., of London. The Collection was originally housed in Kensington Palace, and will reopen in the early spring of 1914 at Stafford House.

Keeper and Secretary, G. F. Laking, M.V.O., F.S.A.
Asst. Secretary, F. Harman Oates.
Assistant and Inspector of Excavations, G. F. Lawrence.
Technical Assistant, H. W. Murray.

NATIONAL LIBRARY OF WALES,

Aberystwyth.

Librarian, John Ballinger.

NATIONAL MUSEUM OF WALES,

Cardiff.

Director, W. Evans Hoyle, D.Sc.

NATIONAL DEBT OFFICE,

19 Old Jewry, E.C.

The National Debt Commissioners were appointed under 26 Geo. III, c. 31 (1786), by which a permanent Sinking Fund was to be established, and a sum of £250,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as "Mr. Pitt's Sinking Fund." In 1823 this was superseded by appropriating the surplus income of the year as "The Old Sinking Fund, and this is commonly known as "The Old Sinking Fund." In 1875 "The New Sinking Fund" was set up by Sir Stafford Northcote (38-39 Vic., c. 45), and this, with the Old Sinking Fund, now mainly operates in reducing the Debt. The Commissioners are at the present time the Speaker, the Chancellor of the Exchequer, the Master of the Rolls, the Lord Chief Justice, the Paymaster-General, and the Governor and Deputy-Governor of the Bank of England. The administrative expenses of the Board were estimated at £12,583 in 1913-14.

<i>Comptroller-General</i> , W. G. Turpin, C.B.	£1,500
<i>Private Secretary</i> , G. Rackham	£100
<i>Assistant Comptroller</i> , Sir E. J. Soares	£800 to £1,000
<i>Actuary</i> , H. Weatherill, F.R.A.	£250
<i>Chief Clerk</i> , C. von Berg	£800
<i>Principal Clerks</i> , H. Manwaring; T. Gowland, £600 to £700; G. F. Ansell	£550 to £700
<i>Assistant do.</i> , E. R. Kennedy; H. Weatherill, F.R.A.; W. F. Doust; J. J. Bree; E. S. Jones	£350 to £450
<i>Brokers</i> , Messrs. Mullens, Marshall & Co.	£1,500

NATIONAL GALLERY, Trafalgar Square, S.W.

The National Gallery is the result of a Parliamentary grant of £60,000 in 1824 for the purchase and Exhibition of the Angerstein collection of pictures, the present building being opened in 1838 and enlarged in 1865, 1876, 1887 and 1911.

<i>Director</i> , Sir Charles Holroyd	£1,000
<i>Keeper and Secretary</i> , Hawes Turner	£750

NATIONAL GALLERY, BRITISH ART

(The Tate Gallery), Millbank, S.W.

The National Gallery of British Art, better known as "The Tate Gallery," was opened in 1897 on the site of Millbank Gaol, the cost of erection (£80,000) being borne by Sir Henry Tate, who also contributed the nucleus of the present collection. The "Turner Wing," built at the expense of the late Sir Joseph Duveen, was opened to the public in 1910.

<i>Director</i> , Sir Charles Holroyd	(see above)
<i>Keeper</i> , Charles Aitken	£350 to £500

NATIONAL HEALTH INSURANCE.

The administration of National Health Insurance is entrusted to a Joint Committee and four Commissions (one each for England, Wales, Scotland, and Ireland).

THE JOINT COMMITTEE.

Offices—Buckingham Gate, S.W.

<i>Chairman</i> , Rt. Hon. C. F. G. Masterman, M.P.	
<i>Private Sec.</i> , M. Heseltine	£150
<i>Vice-Chairman</i> , Sir R. L. Morant, K.C.B.	
<i>Members</i> , J. Smith Whitaker, M.R.C.S.; Sir J. Struthers, K.C.B.; The Chief Registrar of Friendly Societies; The Chairmen of the Commissions.	
<i>Legal Member and Legal Adviser</i> , Sir Claud Schuster	£1,500
<i>Financial Member</i> , H. N. Bunbury, C.B.	£1,200
<i>Chief Actuary</i> , A. W. Watson	£1,500
<i>Clerk</i> , R. W. Harris.	
<i>Actuaries</i> , S. J. H. W. Allin; J. Buchanan; W. R. Jarman; J. G. Kyd; J. W. Thompson	£550 to £700
<i>Asst. Actuaries</i> , V. P. A. Derrick; G. S. W. Epps; P. N. Harvey; A. Henry; G. Gillies; C. W. S. Jamieson	£350 to £500

THE ENGLISH COMMISSION,

Buckingham Gate, S.W.

<i>Chairman</i> , Sir R. L. Morant, K.C.B.	£2,000
<i>Private Sec.</i> , J. S. Eagles	
<i>Deputy Chairman</i> , J. Smith Whitaker, M.R.C.S.	£1,500
<i>Commissioners</i> , T. Neill, D. J. Shackleton, J. L. Stead, and Miss Mona Wilson, each	£1,000
<i>Chief Registrar of Friendly Societies (q.v.)</i>	
<i>Legal Member</i> , Sir Claud Schuster	
<i>Financial Member</i> , H. N. Bunbury, C.B.	
<i>Secretary</i> , J. Anderson	£1,000

Secretariat.

<i>Asst. Secs.</i> , L. G. Brock; J. A. Salter; S. P. Vivian	£850 to £1,000
<i>Senior Clerks</i> , J. R. Brooke; E. Hackforth; R. W. Harris; A. Woodgate	£600 to £800
<i>Junior Clerks</i> , J. N. Beckett; J. S. Eagles; A. Gray; R. E. Harwood; M. Heseltine; H. A. de Montmorency; J. Rae; W. L. Rind	£200 to £300
<i>Principal Clerks</i> , J. G. Bell; W. H. Dawson; C. F. A. Hore; R. C. Richards; C. M. Wynne	£550 to £700
<i>1st Class Clerks</i> , E. W. Baynes; C. E. Coward; J. N. Dark; G. G. Fiddes; H. Greer; H. S. Hunter; J. A. Pearce-Edgumbe; J. Poyser; P. N. Russell; W. Sutherland; E. F. Wise	£350 to £500

<i>Staff Clerks</i> , H. J. Glanville, £400 to £500; J. A. Cutforth; W. T. Fitzgerald; E. W. H. Harbour; R. A. Nurse; A. Sharp; T. W. Sissens	£300 to £400
---	--------------

Accountant and Comptroller-General's Department.

Accountant and Comptroller-General,

<i>Accountants</i> , A. C. Hayward; J. A. Heaton; J. McK Hendrie; S. H. G. Hughes; W. G. Hunter; G. W. Jeffery; E. J. Strohmengor; J. Y. Watt	£550 to £700
<i>Asst. Accountants</i> , S. C. Alford, P. F. Atkin, A. H. Carter, J. Chown, I. P. Crowther, S. M. Gregory, R. T. Hogg, R. F. James, H. B. Lidstone, P. H. Mages, A. G. Roberts, R. J. Smith, G. A. Taylor, S. J. Tyack, L. N. Ure	£350 to £500

<i>Staff Clerk</i> , A. T. Moore	£300 to £400
<i>Superintendent of Female Staff</i> , A. H. Pope	£210 to £260

Professional Staff.

<i>Solicitor</i> , M. L. Gwyer	£1,000
<i>Legal Assistants</i> , W. H. S. Garnett; E. MacGowan	£600 to £800
<i>Law Clerks</i> , W. F. L. Braidwood; P. A. Koppel; H. W. V. Williams	£400 to £550
<i>Principal Medical Officer</i> , G. F. McCleary, M.D.	£1,000

Outdoor Staff.

Chief Inspector, E. A. Gowers	£1,000
Chief Woman Inspector, M. M. A. Ward	£400 to £550
Divisional Inspectors, P. R. T. Ashton, E. G. Bearn, G. W. Brake, F. N. Curtis-Bennett, S. A. Guest, W. T. Ivinney, A. Macfarlane, F. J. Matheson, J. J. Moynihan, W. F. Shinn	£550 to £700
Inspectors: Male, F. B. Alcock, J. C. Arnold, N. B. Batterbury, C. E. Brackenbury, F. C. Brook, T. A. Brook, H. W. Bromby, F. Bryan, L. E. Buncher, W. R. C. Clarke, A. H. Eady, J. W. Evans, T. M. Evans, R. J. Foot, E. G. Francis, T. A. Gailey, C. H. J. Garland, T. Gibson, G. E. Gladstone, H. T. Griffith, E. Holmes, O. W. Holstius, T. Jameson, C. B. Jeaffreson, S. M. Jessop, K. Loader, S. S. Lock- hart, F. G. Mackereth, J. N. P. Mackie, W. Milledge, F. Morton, A. W. Neville, G. Ormsby, G. M. Robinson, A. C. Scott, J. H. Sinkinson, H. L. T. West, F. C. Wheeler, G. Wigglesworth	£350 to £500
Female, J. J. Brown, M. M. Dalglish, E. M. Gardner, E. A. McCleverty, M. B. Murby, A. E. Otter, E. E. Page, E. G. Roe, H. Todd, E. G. Woodgate	£300 to £400

THE WELSH COMMISSION,
City Hall, Cardiff.

Chairman, Thomas J. Hughes	£1,500
Private Secretary, T. L. Roberts	
Deputy Chairman, H. Meredith Richards, M.D.	£1,200
Commissioners, J. Rowland, M.V.O., J.P., Hon. Violet Douglas-Pennant, each	£1,000; the Chief Registrar of Friendly Societies (q.v.)
Secretary, Thomas Jones, M.A.	£850 to £1,000
Isst. Secs., Arthur M. Leveaux; Percy E. Watkins	£550 to £700
Accountant, John C. Morgan	£550 to £700
Legal Adviser, Arthur M. Bulloch, B.A.	£500 to £700
Medical Officer, D. Ll. Williams, F.R.C.S. (Ed.), D.P.H.	£500 to £800
Asst. Accountant, F. J. Alban, F.S.A.A.	£350 to £500
st Class Clerks, H. E. James, B.A.; J. H. Jones; J. T. Davies; J. J. Scott	£350 to £500
Staff Clerk, D. E. Jones	£300 to £400
Superintendent of Registry, W. G. Hayward	£300 to £400

Outdoor Staff.

Chief Inspector, James Evans	£550 to £700
Inspectors, J. O. Evans; R. T. Williams	£350 to £500

NATIONAL PHYSICAL LABORATORY,
Teddington, Middlesex.

The National Physical Laboratory, founded in 1889 for standardising and verifying instruments, for testing materials, for the determination of physical constants, and for research into matters of technical and industrial importance, is controlled by a Board representing the Royal Society and the great Technical Institutions. In addition to capital sums, an annual grant of £7,000 is contributed by H. M. Treasury; and subscriptions from the Technical Societies and other sources amount to about £700 a year. A Government grant is also made to cover the expenses of Aeronautics work. The Laboratory comprises four main departments: (1) Physics; (2) Engineering; (3) Metallurgy and Metallurgical Chemistry; (4) The William Froude National Tank. The Physics Department of the Laboratory includes divisions for Thermometry, General Electrical Measurements, Electrical Standards, Electrotechnics and Photometry, Optics and Metrology (measurements of length, area, volume and mass). The Engineering Department, in addition to research, undertakes tests on engineering apparatus and machines. In addition, an Aeronautics division has been formed, to carry out investigations required by the Advisory Committee for Aeronautics, and arrangements have been made for tests on road materials, at the request of the Road Board. The Department of Metallurgy undertakes chemical, metallographic and other investigations into the nature and characteristics of metals and alloys, including examinations into the causes of failure of engineering structures, carried out jointly with the Engineering Department. New buildings for the Metallurgical work were provided by Sir Julius Wernher in 1910. The William Froude National Tank, the gift of Mr. A. F. Yarrow for the service of the nation, has been constructed for carrying out tests and researches on ship and propeller models,

for the information of designers and naval architects. Additional buildings for Optics, and for administration purposes, were recently opened by Mr. Balfour.

Chairman, The President of the Royal Society.
Do. of Executive Committee, Lord Rayleigh, O.M., F.R.S.
Director, R. T. Glazebrook, C.B., D.Sc., F.R.S.
Supt. Engineering Dept., T. E. Stanton, D.Sc., F.R.S.
Supt. Metallurgical Dept., W. Rosenhain, D.Sc., F.R.S.
Senior Asst., Physics Dept., J. A. Harker, D.Sc., F.R.S.
Supt. William Froude National Tank, G. S. Baker,
M. INST. N.A.

NATIONAL PORTRAIT GALLERY,
St. Martin's Place, Charing Cross, W.C.

The first grant to the institution was made in 1856; the collections being successively housed in Great George Street, Westminster, in South Kensington, and in Bethnal Green. The present building was opened in 1896, £80,000 being contributed to its cost by Mr. W. H. Alexander.

Director, Keeper, and Secretary, C. J. Holmes
£500 to £600
Clerk and Actg. Asst. Keeper, J. D. Milner.

NAUTICAL ALMANAC OFFICE,
3 Verulam Buildings, Gray's Inn, W.C.

The "Nautical Almanac" was first published in 1757, by H.M. Admiralty, under whose control the office now remains. The expenses of preparation were estimated at £5,547 in 1913-14.

Superintendent, P. H. Cowell, D.Sc., F.R.S. £650
Chief Assistant, B. F. Bawtree £400 to £500 || Assistants, J. A. Sprigge; W. F. Doak, M.A., F.R.A.S.; T. C. Hudson, B.A., F.R.A.S. | £300 to £400 |

OBSERVATORIES.

Royal Observatory, Greenwich.

The Royal Observatory was founded by Charles II. in 1675, the building, designed by Moore and Wren, being opened in 1676. The administrative expenses of the Observatory were estimated at £10,755 in 1913-14.

Astronomer Royal, F. W. Dyson, LL.D., F.R.S. £1,000
Chief Assistants, S. Chapman, D.Sc., F.R.A.S.; H. S.
Jones, B.Sc., F.R.A.S. £500 to £600
Assistants, Thomas Lewis, F.R.A.S.; William G.
Thackeray, F.R.A.S.; H. P. Hollis, B.A., F.R.A.S.;
Andrew C. D. Crommelin, D.Sc., F.R.A.S.; W. W.
Bryant, B.A., F.R.A.S. (Magnetic and Meteorological)

Clerical Assistant, H. Outhwaite £320 to £450 || Royal Observatory, Cape of Good Hope. — £9,407. | |
| Astronomer, S. S. Hough, M.A., F.R.S. | £867 to £967 |
| Chief Assist., J. K. E. Halm, Ph.D., F.R.A.S. | £667 to £767 |

Assistants, W. H. Cox; J. Lunt, D.Sc.; J. T. Pett; J.
Power £325 to £575 || Clerical Assistant, Arnold Pilling, B.A. | £333 to £433 |

For other Observatories, see p. 81.

PATENT OFFICE,

25 Southampton Buildings, W.C.

The prerogative of the Crown to grant monopolies was limited by 21 James I. c. 3 to the grant of Letters Patent for New Inventions, and the control of such grants was transferred to the Board of Trade by 46 & 47 Vict. c. 57. The duties are performed by a Comptroller-General with a staff of officials. The administrative expenses were estimated at £144,875 in 1913-14.

Comptroller-General, W. Temple Franks £1,500 || Private Secretary, A. J. Martin | £1,200 |
| Registrar of Designs and Trade Marks, R. Griffin | £1,100 |

Chief Examiner, H. Hatfield, I.S.O. £1,200
Chief Clerk, P. G. L. Webb £1,200 || Supervising Examiners, A. Cliff; W. Martin; A. R. Wright; W. H. D. Clark | £700 to £800 |
Principals, F. W. Hodges, £650 to £850; R. P. Chope; A. Neeves	£650 to £800
Librarian, E. W. Hulme	£650
Examiners, H. J. Adams; F. Ogden; W. Groves; J. E. Needham; A. S. A. Ormsby; F. M. Sexton; A. Sutton; A. F. Ravenshear; F. Gossling; G. Rutherford; H. F. Lowe; H. O. Minty; T. E. Lones; H. Newton; W. A. Stiven; R. Jenkins; L.

Consulting Engineer, F. Palmer, C.I.E., M.I.C.E.

Harbour Masters, (Upper District) Capt. D. R. Buchan, Temple Pier, W.C.; (Lower District) Capt. F. W. Kershaw, Gravesend.

POST OFFICE.

Chief Office, St. Martin's-le-Grand, E.C.

A House of Commons report in 1844 states: "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1536, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue-collecting departments, and while efficiently discharging its multifarious duties, shows an annual profit of about £4,000,000. It also receives large sums for duties and taxes on behalf of the Inland Revenue Department, and for certain licences for the Customs and Excise Department and for County Councils. The Post Office also pays Old Age Pensions. The Penny Post was inaugurated in 1840, the Book Post

Superintendents (Cable Room Staff), H. F. Van der Meulen; H. J. Broughton £350 to £415
Superintendent (Intelligence Duty), J. H. Coudrey £310 to £450

Gossling; T. Kearney; and R. H. A. Newsome	

£150 to £450

PRIVY COUNCIL OFFICE, Whitehall, S.W.

The Privy Council is of very ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, 895, and it discharged the functions of State now confined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy, it was reconstituted in 1679. At present it consists of certain eminent persons whose names are given on p. 120. Members of the Cabinet must be Privy Councillors, and they principally form the acting Privy Council. The Council is summoned as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, e.g., the Judicial Committee, the Board of Trade, &c. The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

Lord President of the Council, The Viscount Morley of Blackburn, O.M.	£2,000
Private Sec., G. Cunningham	£300
Clerk of the Council, Sir Almeric W. FitzRoy, K.C.B., K.C.V.O.	£1,500
Deputy do. & Chief Clerk, J. C. Ledlie, B.C.L.	£800 to £900
Senior Clerk, Chas. J. Dalrymple Hay	£600 to £800
Staff Clerk, H. E. Moon, I.S.O.	£310 to £400

* Transferred from National Telephone Company.

PUBLIC WORKS LOAN BOARD,
Old Jewry, E.C.

The Public Works Loan Board was created in 1837 for the purpose of advancing money to Municipal Authorities for Public Works. The total amount thus borrowed in 1913-14 amounted to £4,554,083.

<i>Chairman, B. Norman</i>	unp.

<i>Principal Clerk (in charge of accounts), F. W. B. Godrich</i>	£500 to £700

QUEEN ANNE'S BOUNTY, 3 Dean's Yard, S.W.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tithes" derived from the sees, dignitaries, and benefices, with a view to the augmentation of insufficiently endowed livings. These charges were originally levied on all clerical incomes and paid to the Pope, but were made part of the Crown revenue by Henry VIII. More than half of the benefices in England and Wales are free from these charges, having either been exempted from them by statute or formed since the charges were imposed.

"First fruits" represent one year's income of a benefice in the time of Henry VIII.; the "tithes" an annual sum of a tenth part of that income. The income from this source amounts to about £15,000 per year, which, with the surplus income from capital held by the Governors, is distributed in grants to meet benefactions awarded to benefices not exceeding £500 in net annual value. The total amount distributed in 1912 was about £21,180. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, in certain cases for rebuilding chancels, and for dilapidations.

<i>Secretary & Treasurer, William R. Le Fanu</i>	
<i>Chief Clerk, Wm. Lipscomb</i>	
<i>First Class Clerks (Senior Division), George Simpson;</i> <i>John F. Sapsford; V. Gonville Bromhead; R. G. Rowland; E. Jump.</i>

THAMES CONSERVANCY,

2 Norfolk Street, Strand, W.C.

The Conservancy of the River Thames was granted to the Lord Mayor of London in 1487, and delegated to 12 Conservators in 1857, the powers being reconstituted in 1894. The Port of London Act, 1908, took over as from March 31, 1909, all rights, powers, and duties of the Conservators in respect of the river below Teddington.

<i>Chairman, Rt. Hon. Lord Desborough, K.C.V.O.</i>	
<i>Vice-Chairman, Sir Robert Buckell.</i>	
<i>Secretary, F. W. Geary.</i>	

TRADE BOARD OF,

Whitehall Gardens and Gwydyr House, Whitehall, S.W.

A Board of Trade and Plantations was established by Charles II. in 1660, and in place of this body a Committee of the Council on Trade was established in 1786. The duties of this Committee (which, unlike the other Council Committees, has a president of its own) are to collect Trade Statistics, control the issue of Patents, keep the Standards of Weights and Measures, the non-legal machinery of Bankruptcy, the Registration of Joint Stock Companies, Railway, Tramway, Water and Gas Companies, Electric Lighting, Harbours and Light-houses, and Merchant Shipping, acting under the latter heading as Auditor of the accounts of the Trinity House and the Irish and Northern Lighthouse Authorities. In addition, it administers the Conciliation Act (1895) for the settlement of trade disputes, the Labour Exchanges Act of 1909, Part II. of the National Insurance Act, 1911 (Unemployment Insurance), and the Trade Boards Act, 1909. The administrative expenses were £213,579 in 1913-14.

<i>President, Rt. Hon. S. C. Buxton, M.P.</i>	£5,000
<i>Private Secs., J. A. Webster and R. W. Matthew, £400; Hon. E. D. Denman, M.P. (unpaid).</i>	
<i>Permanent Sec., Sir H. Llewellyn Smith, K.C.B.</i>	£2,000
<i>Private Sec., E. R. Eddison and S. W. Clark.</i>	
<i>Parliamentary Sec., J. M. Robertson, M.P.</i>	£1,500
<i>Private Sec., C. H. Grimshaw.</i>	
<i>Second Sec., G. Stapylton-Barnes, C.B.</i>	£1,500
<i>Private Sec., F. W. Leggett.</i>	
<i>Chief Industrial Commissioner, Sir G. R. Askwith, K.C.B., K.C.</i>	£2,000

* Receives additional annual allowance of £30.

Five Assistant Secretaries (£1,000 to £1,200).

Chief Examiner of Engineers, W. T. Seaton
£500 to £600

TREASURY, Whitehall, S. W.

The Lord High Treasurer of England is the Third
Great Officer of State, the office having been "in com-
mission" (with certain intervals) since 1612. The Com-
missioners for executing the office of Treasurer of the
Exchequer of Great Britain and Lord High Treasurer of
Ireland consist of the First Lord, who, if a Commoner,
is, *ex officio*, Leader of the House of Commons, the
Chancellor of the Exchequer, and some Junior Lords,
with certain Secretaries and a staff of officials. The
duties of the First Lord are mainly political, as also are
those of the Patronage Secretary and the Junior Lords;
the duties of the Chancellor of the Exchequer are mainly
financial, in that he performs the ancient duties of the
Under-Treasurer and, after agreement with the heads of
the great spending departments, arranges for the great
collecting departments to provide sufficient moneys to
meet the needs of the year. The papers are laid before
Parliament in the form of a Budget, which the Chan-
cellor expounds to the House, these plans being accepted,
modified, or rejected by the House.

FIRST LORD OF THE TREASURY—
The Rt. Hon. Herbert Henry Asquith, K.C., M.P.
(Prime Minister) £5,000
Private Secs. to Prime Minister, M. Bonham-Carter,
Hon. J. E. Drummond, F. W. Leith-Ross, (total
allowance £1,000); and C. H. Lyell, M.P. unnp.

CHANCELLOR OF THE EXCHEQUER—
Rt. Hon. David Lloyd George, M.P. £5,000
Private Secs., H. P. Hamilton, £300; J. T. Davies,
£200; and J. H. Whitehouse, M.P. unnp.

JUNIOR LORDS—
J. W. Gulland, M.P. £1,000
W. W. Benn, M.P. £1,000
W. Jones, M.P. £1,000
H. Webb, M.P. unnp.

JOINT SECRETARIES—
Financial, Rt. Hon. C. F. G. Masterman, M.P. £2,000
Private Secs., A. McFadyean, £150; T. E. Harvey,
M.P. unnp.
Parliamentary, P. H. Illingworth, M.P. £2,000
Private Secs., R. H. Davies, £300; S. A. Sweetman,
£100; W. Dudley Ward, M.P. unnp.

JOINT PERMANENT SECRETARIES:—
Sir Thomas Heath, K.C.B., F.R.S. £2,000
Private Sec., R. A. Cross £1,500

30 Abingdon Street, S.W.

Receiver, T. E. Kebbel, M.A.

TRINITY HOUSE, Tower Hill, E.C.

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to this Corporation. Until 1854 all light dues were collected by Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren. The present duties of the Elder Brethren have reference to Lighthouses, Buoys, Beacons, Pilotage, &c., and attendance at the Admiralty Court to act as Assessors, also to advise the Board of Trade in nautical matters. There are ten Acting Elder Brethren, of whom one is a retired officer of the Royal Navy and nine retired Commanders of the Mercantile Marine; there are also two Elder Brethren who have retired from the Active List and eleven Honorary Elder Brethren. The income of the Corporation derived from light dues levied on shipping entering and leaving British ports amounts to £300,000 per annum, which is expended in the maintenance of the Lighthouse and coast-marking system of England and Wales, under the financial control of the Board of Trade. The Corporation also administers certain charitable trusts specifically dedicated to the relief of decayed

master mariners and their widows, the accounts in respect of which are rendered to the Charity Commissioners.

ELDER BRETHREN.

H.M. The King; Master, Field-Marshal H.R.H. the Duke of Connaught and Strathearn, K.G.; Deputy Master, Capt. H. Acton Blake; Capt. Sir G. R. Vyvyan, K.C.M.G. (retired); Rt. Hon. Lord George Hamilton, C.S.I.; Rear-Adm. H. B. Stewart (retired); The Earl of Rosebery, K.C., K.T.; Capt. A. E. Bell; Capt. A. S. Thomson, C.B.; Capt. A. W. Clarke; Capt. R. Hoare; Rt. Hon. J. Chamberlain, M.P.; Capt. L. H. Crawford, C.B.; Rt. Hon. A. J. Balfour, M.P.; The Earl of Selborne, K.G., C.M.G.; Adm. H.S.H. Prince Louis of Battenberg, C.C.B.; Capt. O. P. Marshall; Capt. T. Golding; Capt. J. G. H. Flint; Rt. Hon. H. H. Asquith, K.C., M.P.; Maj. H.R.H. Prince Arthur of Connaught, K.G., K.T.; The Marquess of Crewe, K.G.; Capt. G. R. Mansell, R.N., M.V.O.; Rt. Hon. Assistant to Keeper, S. J. Camp £100 to £300

Inspector of Armouries, Guy F. Laking, M.V.O., F.S.A.
 hon.

WAR OFFICE, Whitehall, S.W.

A Secretary of State for War was first appointed in 1794, the control of the Land Forces of the Crown having been previously exercised by a Secretary at War, who was responsible to Parliament through the Home Secretary. In 1801 the Secretary of State for War was also given the business of the Colonies, of which he was relieved in 1854 by the appointment of a Secretary of State for that purpose. In 1904 an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the Commander-in-Chief. Statutory powers were transferred by the Army Annual Act of 1909 (9 Edw. VII. c. 3).

For Army Council and Departments and Staffs of the War Office, see pp. 257-9.

Coroners: Charles Henry Davis, Northampton; John Thos. Parker, Wellingborough; W. E. Whitton, Towcester.

NORTHUMBERLAND.

Coroners: Henry T. Rutherford, Blyth; Charles Percy, Alnwick.

NOTTINGHAMSHIRE.

Coroners: D. Whittingham, Nottingham; F. B. Footitt, Newark; E. S. Spencer, Retford.

OXFORDSHIRE.

Coroners: A. H. Franklin, Oxford; George Coggins, Deddington; Robert Frederick Cuthbert, Witney; J. F. Cooper, Henley.

RUTLAND.

Coroner: Valentine George Stapleton, Stamford.

SHROPSHIRE.

Coroners: John Vernon T. Lauder, Wellington; Thomas H. Garside, Market Drayton; Henry Thomas Weyman, Ludlow; R. E. Clarke, Shrewsbury; R. F. Haslewood, Bridgnorth; J. Herbert Williams, Ludlow; W. A. Aylmer Lewis, Oswestry.

SOMERSET.

Coroners: Samuel Craddock, M.R.C.S., Bath; Edward Queckett Louch, Yeovil; Thomas Foster Barham, Bridgwater.

STAFFORDSHIRE.

Coroners: H. W. Adams, Tunstall; T. B. Cull, Cheadle; William Morgan, Stafford; G. C. Lewis, Walsall; T. A. Stokes, Wolverhampton; T. E. Auden, Burton-on-Trent.

EAST SUFFOLK.

Coroners: Lionel F. Vulliamy, Stonham Aspal; Arthur F. Vulliamy, Ipswich; Walter Brooke, Woodbridge; Henry Edwin Garrod and Guy E. K. Burne (joint) Diss.

WEST SUFFOLK.

Coroners: Thomas Wilson, Bury St. Edmunds; J. M. Braithwaite, Sudbury; S. J. Eunion, Newmarket.

SURREY.

County Coroners: Croydon District, J. Nightingale, Reigate; Kingston District, M. H. Taylor, Newark House, Richmond; Guildford Dist., Gilbert H. White, Guildford.

EAST SUSSEX.

County Coroners: G. V. Benson, Lewes; T. T. Harratt, Rye; Charles Sheppard, Rape of Hastings and Hundred of Robertsbridge.

WEST SUSSEX.

County Coroners: F. W. Butler, Horsham; J. W. Loader Cooper, Chichester; O. C. B. Cheesman, Hundred of Bosham.

WARWICKSHIRE.

Coroners: Charles Webb Hiffe, M.D., Coventry; E. F. Hadow, Kenilworth; George F. Lodder, Henley-in-Arden.

WESTMORLAND.

Coroners: Geo. Edward Cartmel, Kendal; Wm. Hewitson, Appleby; E. A. Heelis, Appleby.

WILTSHIRE.

Coroners: A. L. Forrester, Malmesbury; F. A. P. Sylvester, Trowbridge; F. H. Tretowan, Salisbury; G. S. A. Waylen, Devizes; Dr. A. G. Wood, Corsham.

WORCESTERSHIRE.

Coroners: Edwin Docker, Birmingham; G. F. S. Brown, Worcester; G. H. T. Foster, Upton-on-Severn; Robert Marshall, Dudley.

YORKSHIRE (EAST RIDING).

Coroners: Sir Luke White, M.P., Driffield; John Richardson Wood, York; Jackson and Birks, Hull; Henry Green, Howden.

YORKSHIRE (NORTH RIDING).

Coroners: E. J. E. Gardner, North Allerton; William Richardson, Guisborough; George Buchanan, Whithy; John Richardson Wood, York; Joseph Francis Porter, Helmsley; Oswald H. Cochrane, Middlesbrough; Wm. Lowther Carrick, Stokesley.

YORKSHIRE (WEST RIDING).

Coroners: Edgar Wood, Skipton; J. R. Wood, York; J. K. Parker, Sheffield; Frank Allen, Doncaster; E. H. Hill, Halifax; Pelham Page Maitland, Wakefield; Walter Brown Arundel, Pontefract; F. D. Robinson, Clitheroe; J. Charles R. Husband, Ripon.

WELSH COUNTY CORONERS.

ANGLESEY.

Coroner : Robert Jones Roberts, Bangor.

BRECKNOCKSHIRE.

County Coroners : Richard H. Arlingham Davies, Crickhowell ; M. F. Thomas, Brecon ; Dr. Wm. Rees Jones, Senny Bridge.

CARDINGANSHIRE.

Coroners : John Henry Evans, Newcastle Emlyn ; John Evans, Aberystwyth ; Evan Lloyd, Tregaron.

CARMARTHENSHIRE.

Coroners : Thomas Walters, Carmarthen ; Richard Shipley Lewis, Llandilo ; J. W. Nicholas, Carmarthen.

CARNARVONSHIRE.

Coroners : J. Pentir Williams, Bangor ; O. Robyns Owen, Pwllheli.

DENBIGHSHIRE.

Coroners : Robert Davies, Denbigh ; Llewelyn Kenrick, Ruabon.

FLINTSHIRE.

Coroners : F. Llewellyn Jones, Mold ; Wm. Alma Aylmer Lewis, Oswestry.

GLAMORGANSHIRE.

Coroners : David Rees, Pontypridd ; R. J. Rhys, Aberdare ; H. Cuthbertson, Neath ; F. H. Glynn-Price, Swansea ; S. H. Stockwood, Bridgend.

MERIONETHSHIRE.

C. Coroner : R. Owen Jones, Blaenau Festiniog.

MONTGOMERYSHIRE.

County Coroners : Chas. E. Humphreys, Llanfyllin ; David Edwards, Machynlleth ; J. T. C. Gittins, Newtown ; R. D. Thomas, Welshpool.

PEMBROKESHIRE.

County Coroners : Ivor Evans, Cardigan ; H. J. E. Price, Haverfordwest.

RADNORSHIRE.

Coroners : Fred. L. Green, Presteigne (Eastern Division) ; E. Powell Careless, Llandrindod (Western Division).

HIS MAJESTY'S BODYGUARD OF THE HONOURABLE CORPS OF GENTLEMEN-AT-ARMS—(1509).

Captain, The Lord Colebrooke, C.V.O.
Lieutenant, Col. Sir Henry Hugh Oldham, C.V.O.

COST OF THE PRISON SERVICE.—The total cost of the Prison Service in England and Wales and the British Dominions in 1912-1913 was £801,550, reduced by Appropriations in Aid £25,000 (proceeds of Prison Labour £20,500, Sale of Refuse, etc., £4,500), to a net total of £776,550, a decrease of £4,350 on the net total for 1911-1912. Salaries and Allowances account for £23,240; Clothing, Bedding and Furniture, £42,900; Lighting, Water and Cleaning Articles, £34,600; New Buildings and Alterations, £66,250; Travelling and Removal Expenses of Officers, £5,500; Incidental Expenses, £3,600; Establishments in the Dominions, £1,000. The estimates provide for 3,400 convicts, 16,700 ordinary prisoners, 90 in State inebriate reformatories, 800 in Borstal institutions, and 110 in preventive detention.

Grand Total.....	£40,603,700	£44,392,500	£44,085,000	£46,309,300

(a) The *net totals* are arrived at by the deduction from the *gross totals* of *Appropriations in Aid*. These consist of sums paid: By India £167,400, Dominion of Canada £10,800, and Australia and New Zealand £141,600, the Union of South Africa £85,000, and Newfoundland £3,000—a total of £415,300. £370,000 is received from stoppages from pay for uniforms and extras, £75,000 from the sale of old ships, £120,000 from proceeds of sales of old stores, &c., and £30,000 from the sale of charts. The fees paid for training Naval Cadets in the R.N. Colleges at Dartmouth and Osborne amount to £62,500. *Navy Coal*. The estimated value of steam coal in stock on 31 March, 1913, was £2,181,000; additions to the value of £2,747,000 and issues to the value of £2,406,000 were anticipated, and the estimated value of stock at 31 March, 1914, is £2,522,000. Steam coal to the value of about £2,500,000 is expended in one year.

The Navy List.

THE KING-EMPEROR. (Admiral of the Fleet, May 7, 1910.)

WEIGHT OF A BROADSIDE.

The increase in the weight of a broadside fired by the Dreadnought and by the super Dreadnoughts is shown in the following table. The 12-inch gun of the *Dreadnought* fired a projectile weighing 850 lb., the 15-inch gun of the *Queen Elizabeth* fires a projectile weighing 1,950 lb.

Ship.	Broadside.	
	Guns.	Weight.
Queen Elizabeth (1913)	8 15-in.	15,600 lb.
King George V. (1911)	10 13.5-in.	13,750 lb.
Orion (1910)	10 13.5-in.	12,500 lb.
Neptune (1909)	10 12-in.	8,500 lb.
Dreadnought (1906)	8 12-in.	6,800 lb.

12. War Office		429,000	436,000	440,000	443,000
Total of Effective Services		23,927,000	23,829,000	24,281,000	24,281,000
II.—NON-EFFECTIVE SERVICES.					
13. Half Pay, Retired Pay for Officers, &c.		1,789,000	1,808,000	1,843,000	1,849,000
14. Pensions for N.C.O. and Men, &c.		1,890,000	1,900,000	1,917,000	1,950,000
15. Civil Superannuation, &c.		154,000	153,000	145,000	140,000
Total		27,760,000	27,690,000	28,220,000	28,220,000
REPAYMENTS.					
Repayments by Govt. of India	£	1,941,614	1,949,511	1,961,591	1,953,023
Deduct Cost of Aden Garrisons, &c.		230,000	230,000	230,000	230,000
	£	1,711,614	1,719,511	1,731,591	1,723,023

(a) The Gross and Net Totals are arrived at by deducting Appropriations in Aid. These consist of further contributions from India, net £63,500; Ceylon, £57,000; Mauritius, £22,000; Hong Kong, £150,000; Straits Settlements, £270,000; and of £150,000 paid by Egypt. The sum of £35,590 is derived from the sale of horses, &c.; £37,000 is derived from the purchase of discharges; £45,000 from sale of provisions and forage; £100,000 from the sale of old stores, &c.; £51,000 barrack damages, &c.; £191,000 from the sale and rents of land, &c.; and £32,150 fees from gentlemen cadets at Woolwich and £72,070 from Sandhurst.

The sums appended to the various offices are the full incomes derivable from the estates and revenues of the Church. The Deans and Chapters of certain Dioceses (marked * in the following pages) preferred several years ago to retain in lieu of fixed annual money payments, estates estimated at that time to produce the same annual income; they are consequently suffering more or less from the agricultural depression of recent years.

*Canterbury. £15,000.

MEMBERS OF CONVOCATION.

In theory the Church of England is governed by means of its Convocations of Bishops and Clergy: there is a House of Convocation for each province, Canterbury and York. Each Convocation consists of two Houses, the upper confined to the archbishops and bishops, the lower composed of the dean of every cathedral, the archdeacons, with proctors elected from every cathedral chapter, and two more elected by the clergy of every diocese in the province of Canterbury, and by every archdeaconry in the province of York. A fresh election is made with every new Parliament.

PROVINCE OF CANTERBURY.

Upper House.

President.—The Most Rev. the Lord Archbishop.

The Right Rev. the Lords Bishops of London; Winchester; Bangor; Bath and Wells; Birmingham; Chichester; Ely; Exeter; Gloucester; Bristol; Hereford; Lichfield; Lincoln; Llandaff; Norwich; Oxford; Peterborough; Rochester; Salisbury; Southwark; Southwell; St. Albans; St. Asaph; St. Davids; Truro; Worcester.

Apparitor-General, Edward Hewish Ryle.

Lower House.

Prolocutor, Ven. J. E. Stocks, D.D.
 The Very Rev. the Deans; the Venerable the Archdeacons; and the Elected Proctors.

Registrar, F. H. Lee.

Actuary, K. J. Muir Mackenzie.

PROVINCE OF YORK.—Upper House.

President.—The Most Rev. the Lord Archbishop.
 The Right Rev. the Lords Bishops of Durham; Ripon; Chester; Newcastle; Wakefield; Liverpool; Manchester; Carlisle; Sodor and Man.

Lower House.

Prolocutor, Rt. Rev. the Bishop of Beverley, D.D.
 The Very Reverend the Deans of the Province; the Venerable the Archdeacons; and the Elected Proctors.

Registrar, A. V. Hudson.

THE HOUSES OF LAYMEN.

The House of Laymen for the Province of Canterbury, as also for that of York, consists of members elected by the various Diocesan Conferences, who are themselves elected by the Laity of their respective Parishes or Rural Deaneries. The members are elected with every fresh Parliament.

ST. PATRICK'S NATIONAL CATHEDRAL, DUBLIN.

Dean and Ordinary, Very Rev. Charles Thomas Ovenden, D.D.

GENERAL SYNOD,

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. Wm. Colquhoun, B.D.; Ven. I. K. Latham, D.D.; Capt. R. Wade Thompson; J. A. Maconchy.

Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870), A. F. Maude, 52 St. Stephen's Green E., Dublin.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign, as one of its members, supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are 23 Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a Board of Nomination, consisting of 7 persons, viz.:—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on 31 Dec., 1912, was only £262,933, charged with annuities to 74 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £9,403,956, made up of Commutation £262,933, Parochial Sustentation £5,938,218, Episcopal Sustentation £563,674, Glebes purchase £401,650, Miscellaneous purposes £2,198,512, and Balances £38,966.

Since 1869, members of the Church have paid in to the Representative Body a total sum of £7,414,388. The interest of the Parochial Sustentation Fund is approximately £217,497. The total amount of assessment for stipend paid by parishes, 1910, was £97,481, and the total amount paid for stipends under Diocesan Schemes was £277,661.

The number of members of the Church of Ireland, by the Census of 1911, was 524,375, or 12.0 per cent. of the entire population.

The Church of Scotland.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the universities and royal burghs. It is presided over by a Moderator (chosen annually by the Assembly), to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 towards his expenses. The country, for Church purposes, is divided into 16 synods and 84 presbyteries, and there are over 1,800 ministers and licentiates engaged in ministerial work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland; the number of communicants at the close of 1912 was 713,849. The sum of £528,562 was raised in 1912 for church and missionary purposes. Within the

last 50 years 471 chapels, at a cost of £1,739,000, have been endowed and erected into parishes *quoad sacra*. The parish churches number 1,446. There are in addition 283 churches and mission stations, in all of which worship is regularly conducted. The Presbyterian form of Church government as first set up in Scotland was superseded in 1662 by the Episcopal Church under the Stuarts; but at the Revolution in 1688, Presbyterianism regained the legal establishment, which it still preserves.

LORD HIGH COMMISSIONER, Lord Glenconner.

MODERATOR, 1913, Right Rev. Andrew Wallace Williamson, D.D., High Kirk, Edinburgh.

Principal Clerk, Rev. David Paul, LL.D., Edinburgh.

Depute Clerk (Vacant).

Procurator, Christopher N. Johnston, K.C., LL.D.

Agent, A. L. Menzies, W.S., 54 Castle St., Edinburgh.

Parliamentary Solicitor, A. H. Spens.

OTHER PRESBYTERIAN CHURCHES.

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.

(1) *The United Free Church of Scotland* was formed by the Union on October 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 12 Synods and 64 Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. In the year ending 31 Dec., 1912, there were 1,541 congregations and 35 preaching stations. The total membership exceeded 504,901, and there were 2,269 Sunday Schools, with 232,720 scholars and 24,460 teachers. In 15 Foreign Mission Fields there are 374 European Mission Agents and 4,639 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church at the close of last financial year amounted to £997,532.—*Offices*, 121 George Street, Edinburgh.

(2) *The Presbyterian Church in Ireland*.—According to the Census of 1911, the members of the various Presbyterian churches in Ireland were 439,876. The largest of these, under the superintendence of the General Assembly, consists of 36 presbyteries, 658 ministers, 562 congregations, with 108,849 communicants, 87,215 families, 7,928

Sabbath-school teachers, and 108,740 scholars. During the year 1912-1913 this branch contributed by congregational effort £230,712 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £300,368. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 14 professors and 2 lecturers, and has 34 ministerial with 4 medical missionaries in foreign parts.—*General Secretary*, Rev. W. J. Lowe, D.D., Church House, Belfast.

(3) *The Presbyterian Church of England* has 12 presbyteries, 354 congregations, 6 preaching stations, and 86,783 members. It has a Theological College (Westminster College, Cambridge), and supports 88 missionaries abroad, including 37 women. In 1912 the amount raised for all purposes was £297,529.—*General Secretary*, Rev. W. M. Macphail, M.A. *Financial Sec.*, John Leggat, 7 E. India Avenue, E.C. *Publications Office*, 21 Warwick Lane, Paternoster Row, E.C.

(4) The less numerous divisions are: *The Free Church of Scotland*, consisting of those members who did not unite with the U.P. Church; the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

The Welsh Calvinistic Church.

THE WELSH CALVINISTIC METHODIST CONNECTION is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. The form of Church government is presbyterian, and the Church is in federation with the United Free Church of Scotland and with the Presbyterian Church of England, &c. At the present time the body numbers—churches, 1,473; chapels and places of worship, 1,664; ministers and preachers, 1,327; deacons, 6,584; communicants, 183,854; on probation, 2,465; Sunday-school teachers, 28,243; scholars and teachers, 213,946; number belonging to the congregations (including communicants),

337,294. A sum amounting to £287,416 8s. 4d. was collected for various religious purposes in 1912. One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children; the vernacular is the language generally used in these schools. There are 339 English chapels and preaching stations with 29,095 communicants; all the rest are Welsh.—*Moderator of General Assembly*, Rev. John Williams. *Secs.*, Revs. E. P. Jones, B.A., Cardiff, and T. Charles Williams, M.A., Menai Bridge. *Statistical Secs.*, Rev. T. J. Morgan, Garn, Cardiganshire; and Rev. E. Jones Evans, Walton, Liverpool.

The Methodist Churches.

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are—

WESLEYAN METHODISTS.

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first Conference, consisting of six clergymen and four laymen, was held in 1744. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleys are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. Membership of the Society is through connexion with a "class meeting," in which religious experience is narrated, suitable advice or instruction being given by the "class-leader." The question of some modification of the present terms of membership was discussed by the Conference of 1911, and a scheme was remitted to the various Synods for consideration and report in 1912, but no change was made. When Wesley died the number of members was 76,968, and since then the increase has been so great that about 18,000,000 people are now receiving Methodist instruction in various parts of the world. At Washington, in October, 1891, it was reported that there were more than 30,000,000 Methodists. This statement has been recently repeated by leading Wesleysans.—*Pres.*, Rev. S. F. Collier; *Sec.*, Rev. S. Johnson.

THE PRIMITIVE METHODISTS.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings" the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleys they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. J. Ritson.

THE METHODIST NEW CONNEXION.

3. *The Methodist New Connexion*, which was formed in 1797 by the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the

source of all power in Methodism; and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference and at once founded a new community.

THE BIBLE CHRISTIANS.

4. *The Bible Christians*, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They exist principally in the West of England.

THE UNITED METHODIST CHURCH.

5. *The United Methodist Free Churches*, which are an amalgamation of three different secessions—the Protestant Methodist, formed in 1828; the Wesleyan-Methodist Association, which sprang out of a controversy in 1834, concerning the training of ministers; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to leading Wesleyan officials was organised, which found expression in the Conference debates, but more strongly in anonymous pamphlets, on suspicion of being the authors and circulators of which three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

United Methodist Church.—The three latter denominations—the Methodist New Connexion, the Bible Christians and the United Methodist Free Churches—secured an Act of Parliament in 1907 to authorise their union into one denomination, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline. A fund of 100,000 guineas was raised to commemorate the union.—*President*, Rev. W. Redfern; *Secretary*, G. P. Dymond, M.A.

INDEPENDENT METHODISTS.

6. *Independent Methodists*.—This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805.—*President*, J. W. Johnson.

FINANCES.

Finances.—The *Wesleys* raised in 1912-13 £197,168 to sustain their very extensive missionary operations. At the same time their Home missionary income was £38,018; and £18,011 was expended on the training of candidates for the ministry, of whom there are 256 in the four theological colleges. The *Primitive Methodists* raised £22,971 for new chapels, and the *United Methodist Church* £14,940 for their missions.

The number of Members is for the United Kingdom; of Chapel and Scholars, Great Britain only.

The Independents and the Baptists.

THE INDEPENDENTS, OR CONGREGATIONALISTS, are the most ancient community of Dissenters. They maintain that each church is its own ruler, and thus dispense with both episcopacy and presbyteries. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902. There are 51 county and other Associations in England and Wales, with 4,732 churches and preaching stations containing 1,723,196 sittings; the number of ministers in the British Isles is 3,755. Of these 231 are temporarily without pastoral charge, 94 are engaged in collegiate and tutorial duties, 40 are occupied in secretarial work, and 419 by reason of age or ill-health have retired from pastoral duty. *Chairman of the Congregational Union of England and Wales, 1913-1914*, Rev. J. Morgan Gibbon. 1914-1915, Rev. W. B. Selbie, D.D. *Secretary*, Rev. Richard J. Wells, *Office*, 16, Memorial Hall, Farringdon Street, E.C.

The *Countess of Huntingdon's Connexion*, with 43 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Sec.*, E. Dolby Shelton. *Office*, 41, Holborn Hall, Gray's Inn Road, W.C.

THE BAPTISTS are, in all respects but one, similar to the Independents; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1912, 4,186 chapels and 2,160 pastors. The members numbered 416,377, Sunday-school teachers 60,211, and Sunday scholars 570,906. In the U.S. they form one of the most numerous religious bodies, the "members" alone numbering nearly 7,000,000. Their missionaries are employed in India, Ceylon, China, Palestine, the West Indies, Africa, Brittany, and Italy. The Baptist World Alliance was formed in 1905, and embraces the Baptist Unions and Conventions of almost every country in the world. Special attention is now being given to Baptist advance in the East of Europe.—*President of the Baptist Union, 1913-14*, Rev. G. P. Gould, D.D. *Sec.*, Rev. J. H. Shakespeare, M.A. *Office*, Baptist Church House, Southampton Row, London, W.C.

Minor Religious Denominations.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the Unitarians, with about 350 ministers, 345 chapels, and other places of worship. The Society of Friends, which consists of 19,785 members and about 10,000 other adherents in Great Britain and Australasia, and 2,349 in Ireland, has 373 recorded ministers, including over 130 women; their places of worship, in 1912, numbered 439. *Central Offices for Great Britain*, 136 Bishopsgate, E.C. Ireland has a separate organisation, with *Office*, 6 Ennace Street, Dublin. The Churches of Christ have 14,277 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,719 teachers, and 16,811 scholars. The Moravians (*Offices*, 32 Fetter Lane, E.C.) have about 60 congregations and preaching stations. The Catholic Apostolic Church have above 80 churches; the New Church (Swedenborgians), 75 societies, with

about 6,800 registered members; the Latter-Day Saints (Mormons) have 82 churches. The Brethren, or Plymouth Brethren, have 23 places of worship in London and the suburbs. Among the inhabitants of the United Kingdom are about 230,000 Jews, mainly in London and other large towns, who possess 200 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev. Dr. J. H. Hertz. *Chief Rabbi's Office* (*pro tem.*), Mulberry Street, Commercial Road, E. The Jews support their own poor, and raise about £150,000 annually for religious and benevolent purposes. Their number throughout the world is computed at eleven millions. The Greeks have churches in London, Manchester, Liverpool, and Cardiff. The Armenians have churches in London and Manchester; the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury; and there is a mosque for Moslems.

The Salvation Army.

THE SALVATION ARMY was founded by General William Booth (*b.* 1829, *d.* 1912), and is one of the most recent religious denominations, and one of the most successful. In Sept., 1913, the number of *Officers*, *Cadets* and *Employés* was 21,339, of *Corps* and *Outposts* 9,337, *Local Officers* 55,250. The number of countries occupied was 59, and of languages used 34. Connected with the Salvation Army are numerous philanthropic institutions, including 117 Rescue Homes for Fallen Women, 25 Maternity Homes and 49 Children's Homes, 146 Slum Posts, 17 Prison-Gate Homes, 262 Shelters and Cheap Food Depôts for the Homeless, 189 Workshops and Factories, 54 Labour Bureaux, 26 Farms, &c. 32,500 open-air meetings are held

weekly, and a still larger number in the various halls of the organisation. At a large number of police courts, many gaols, and some convict establishments, Salvation Army officers are constantly in touch with prisoners, both of the first-offender class and confirmed criminals. In many instances, men and women of both classes are taken into the care of the Army at the prison gate. Magistrates sometimes commit first offenders to the care of the Army instead of to prison. Balance-sheets and statements of account relating to the General Funds or to the Social Funds can be obtained, post free, from 101 Queen Victoria St., E.C.—GENERAL, Bramwell Booth (1912), 101 Queen Victoria St., London, E.C.

The Brotherhood.

A DEMOCRATIC movement, founded in 1875, with the object of attracting the non-religious masses by the provision of religious services ("Pleasant Sunday Afternoons") in places of worship and public buildings. The Brotherhood, though closely associated with the churches, in whose premises the meetings are held, manages its own

affairs and owns no allegiance to any religious organisation, nor does it possess a ritual or creed. It has grown with much rapidity during recent years, and there are now some 2,500 societies, with a total membership of over 500,000.—*Secretary of the National Brotherhood Council*, William Ward, 37 Norfolk Street, Strand, W.C.

Moral Training for the Young.

THE BOYS' BRIGADE.

THE senior boys' organisation; founded in 1883 by Sir William A. Smith. The object of the Brigade is attained by a combination of military and religious training. Every company is connected with a Church or other Christian body. The total strength throughout the world is 2,300 companies with 120,000 officers and boys. *Brigade Secretary*, Sir William A. Smith, 30 George Square, Glasgow. *London Secretary*, Roger S. Peacock, 34 Paternoster Row, E.C.

CHURCH LADS' BRIGADE.

An appendage of the religious influence of the Parish Church; was founded in 1891, and combines a military organisation with moral and religious instruction. It is estimated that 300,000 lads have had the advantage of the

Brigade's training, and to-day there are 1,270 companies throughout the Empire, with upwards of 60,000 lads.—*Headquarters*, Aldwych House, Catherine Street, W.C. *Secretary*, W. M. Gee.

THE BOY SCOUTS' ASSOCIATION.

The aim of this Association (which is incorporated by Royal Charter) is to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance, inculcating loyalty and thoughtfulness for others, and teaching them services useful to the public and handicrafts useful to themselves. The Association has no military or political aims. Recent estimates show a membership of about 160,000 in the United Kingdom and 40,000 in other parts of the British Empire.—*Headquarters*, 116 Victoria Street, S.W.

THE UNIVERSITY OF OXFORD.

UNIVERSITY OFFICERS, &c.

Chancellor, The Earl Curzon of Kedleston, D.C.L., <i>All Souls</i>	Elect.
High Steward, The Earl of Halsbury, D.C.L., <i>Merton</i>	1907
Vice-Chancellor, Very Rev. T. B. Strong, D.D., Dean of <i>Ch. Ch.</i>	1896
Proctors, A. S. L. Farquharson, M.A., <i>University</i> ; J. L. Stocks, M.A., <i>St. John's</i> ... Burgesses, Rt. Hon. Sir W. R. Anson, Bart., D.C.L., Warden of <i>All Souls</i> , 1899; Lord Hugh R. H. Cecil, M.A., <i>Hertford</i>	1913 1913
Assessor of the Chancellor's Court, Sir E. J. Trevelyan, D.C.L., <i>All Souls</i>	1910
Deputy Steward, Sir T. Raleigh, K.C.S.I., D.C.L., Fellow of <i>All Souls</i>	1910
Public Orator, A. D. Godley, M.A., <i>Magdalen</i> Member of the Medical Council of the United Kingdom, A. Thomson, M.A., <i>Exeter</i>	1905 1910
Bodley's Librarian, Falconer Madan, M.A., B.N.C.	1899
Sub-Librarians, A. E. Cowley, D.Litt., <i>Magdalen</i> , 1899; H. N. E. Craster, M.A., <i>All Souls</i>	1912
Keeper of Archives, R. L. Poole, M.A., <i>Magd.</i> Radcliffe's Librarian, W. H. Jackson, M.A., D.Sc., <i>New Coll.</i>	1912 1909
Keeper of the Ashmolean Museum, D. G. Hogarth, M.A., <i>Magdalen</i>	1900
Keeper of Art Galleries, C. F. Bell, M.A., <i>Magdalen</i>	1909
Registrar of the University, C. Leudesdorf, M.A., <i>Pembroke</i>	1909
Assistant Registrar and Secretary to the Boards of Faculties, E. S. Craig, M.A., <i>Univ.</i>	1906
Radcliffe Observer, A. A. Rambaut, D.Sc. (Dublin), <i>Queen's</i>	1907
Secretary to the Curators of the University Chest and Board of Finance, William B. Gamlen, M.A., <i>Exeter</i>	1897
Acting Curator of Sheldonian Theatre, Rev. C. H. O. Daniel, D.D., <i>Worcester</i> ... Acting Curator of Schools, Rev. G. B. Cronshaw, M.A., <i>Queen's</i>	1873
Registrar of the Chancellor's Court, John D. Peel, M.A., <i>Magd.</i>	1910
Coroners of the Univ., W. T. Brooks, M.A., <i>Ch. Ch.</i> 1899; F. E. Marshall, M.A., <i>St. John's</i>	1908
University Council, George Cave, K.C., M.A., <i>St. John's</i>	1913
Solicitor, John D. Peel, M.A., <i>Magd.</i>	1908
Betels, H. M. Lodge, <i>Divinity</i> ; W. E. Chivers, <i>Medicine</i> ; E. Parker, <i>Law</i> ; W. Moon, <i>Arts</i>	
Organist, F. Blife, Mus.D., <i>St. John's</i>	1900
Clerk of the University, E. H. Bellamy.....	1900
Secretary to Delegates of— Examination of Schools, P. E. Matheson, M.A., <i>New Coll.</i>	
Extension of Teaching, J. A. R. Marriott, M.A., <i>New Coll.</i>	
Local Examinations, H. T. Gerrans, M.A., <i>Worcester</i>	
University Museum, Prof. H. L. Bowman, D.Sc., <i>Magdalen</i>	
University Press, C. Cannan, M.A., <i>Trinity</i> . Women Students, R. W. Jeffery, M.A., B.N.C.	1911
Secretary of— Committee for Appointments, N. Waterfield, M.A., <i>New Coll.</i>	

The Rhodes Trustees, F. J. Wylie, M.A., B.N.C.
The Trustees of the Oxford Endowment Fund, Nigel Bond, M.A., *Magdalen*, 49 Sloane Square, London, S.W.
Association for Education of Women, Miss Rogers, Old Clarendon Building.

HEBDOMADAL COUNCIL.

Official Members, The Chancellor; Vice-Chancellor; Proctors.
Heads of Houses, The President of *Magdalen*; Warden of *New Coll.*; Warden of *Merton*; President of *St. John's*; Master of *Univ.*; Principal of B.N.C.
Professors, The Professor of Exegesis; the Camden Professor of Ancient History; the Professor of Comparative Philology; the Wylie Professor of Pure Mathematics; the Vinerian Professor of English Law; the Professor of Human Anatomy.
Members of Convocation, H. T. Gerrans, M.A.; P. E. Matheson, M.A.; E. M. Walker, M.A.; G. B. Cronshaw, M.A.; C. G. Robertson, M.A.; A. D. Godley, M.A.

<i>Chinese</i> —H. C. Brownell, Oriel.	
<i>Burdett-Coutts</i> —D. E. Isaacs Innes, B.A., Univ.	
<i>Kennicott (senior)</i> —E. F. Morison, B.D., Linc.	
<i>Kennicott (junior)</i> —A. Guilleme, Wadh.	
<i>Pusey and Ellerton</i> —R. Levy, Jesus; C. G. Herbert, Wadh.	
<i>Boden Sanskrit</i> —D. Gladding, B.A., B.N.C.	
<i>Denyer and Johnson (senior)</i> —H. S. Hooke, B.A., Jesus.	
<i>Eldon</i> , Law—C. (junior)—J. C. West, Hertf. B.A., New Coll.	
<i>Mathematics (senior)</i> —R. J. Pocock, B.A., Queen's.	
" (junior)—H. F. Slade, Balliol.	
" (exhibition)—J. L. Burchall, Ch.Ch.	
<i>Geography</i> —J. Bygott, Worc.	
<i>Passmore Edwards</i> —M. R. Ridley, Balliol.	
<i>Squire</i> —C. K. Hughes, Queen's; A. H. Raynes, Worc.; J. H. Spencer, B.N.C.	
<i>Pelham Student</i> —D. Atkinson, B.A., B.N.C.	
<i>Philip Walker Student</i> —W. Ray, B.Sc., Magd.	
<i>Theodore Williams</i> —G. Perkins, Hertf.; J. M. C. Campbell, New; J. J. Conybeare, New Coll.	
<i>Naples Biological Scholar</i> —H. A. Baylis, B.A., Jesus.	
<i>Charles Oldham</i> —F. A. Rose, Ch. Ch.	
<i>Arabic (Mew)</i> —B. Leibermann, Worc.	

Recognised Societies of Women Students.

LADY MARGARET HALL.

<i>Chairman of Council</i> , J. Wells, M.A.
<i>Principal</i> , Miss H. Jex Blake.
<i>Vice-Principal</i> , Miss Lodge.
<i>Resident Tutors</i> , Miss Spens, Miss McCutcheon.
<i>Hon. Sec.</i> , Mrs. A. H. Johnson, 5 South Parks Rd.
<i>Resident Librarian</i> , Miss E. Jamieson.
<i>Bursar</i> , Miss Deneke.

SOMERVILLE COLLEGE.

<i>Principal</i> , Miss E. Penrose, M.A.
<i>Vice-Principal</i> , Hon. Alice Bruce, M.A.
<i>Tutors</i> , Miss M. Pope, Miss Lorimer, Miss H. Darbishire, Miss Hayes Robinson, Miss J. W. Kirkaldy, Miss E. Jebb.
<i>Librarian</i> , Miss L. Kempson, M.A.
<i>Bursar</i> , Miss H. Walton.

ST. HUGH'S COLLEGE.

<i>Principal</i> , Miss C. A. E. Moberly.
<i>Tutors</i> , Miss Eleanor Jourdain (<i>Vice-Principal</i>); Miss Thomas (<i>Librarian</i>); Miss Ady, Miss Kirkaldy, Miss Rogers, Miss Wardale.

ST. HILDA'S HALL.

<i>Principal</i> , Miss Burrows.
<i>Tutors</i> , Miss A. E. Levett (<i>Vice-Principal</i>), Miss L. F. Todd.
<i>Bursar</i> , Miss G. A. Holland.

SOCIETY OF OXFORD HOME STUDENTS.

<i>Chairman</i> , Prof. W. M. Geldart, M.A., B.C.L.
<i>Prin.</i> Mrs. A. H. Johnson, 5 South Parks Rd., Oxford.
<i>Tutors</i> , Miss Atchison, Miss R. Butler, Miss M. Lee, Miss E. Paxton.

THE UNIVERSITY OF CAMBRIDGE.

	Elect.		Elect.
Chancellor, The Lord Rayleigh, O.M., M.A.,		Astronomy (Plumian), A. S. Eddington,	
Hon. Sc.D., <i>Trin.</i>	1908	M.A., <i>Trin.</i>	1913
Vice-Chancellor, M. R. James, Litt.D.,		Astrophysics, H. F. Newall, M.A., <i>Trin.</i> ...	1909
Provost of King's	1913	Biology (Quick), G. H. F. Nuttall, sc.D., <i>Magd.</i>	1912
High Steward, The Lord Walsingham,		Botany, A. C. Seward, M.A., <i>St. John's</i>	1906

Tyson (Medal), H. Glaucott, <i>Trin.</i>	1913
Walsingham (Medal), E. D. Adrian, B.A., <i>Trin.</i>	1913
Wiltshire, E. V. Appleton, <i>St. John's</i>	1912
Winbolt Prize, W. T. David, B.A., <i>Trin.</i> ...	1913
Winchester, (1) F. L. Birch, B.A., <i>King's</i> , H. G. Dorrell, <i>Emman.</i> , <i>Æq.</i> ; (2) R. E. C. Gordon, B.A., <i>Pemb.</i>	1913
Yorke, not awarded	1912
Bendall Sanskrit Exhibition, N. B. Jopson, <i>St. John's</i>	1913
UNIVERSITY RECEIPTS FOR 1912, £58,525	5 10
UNIVERSITY EXPENDITURE FOR 1912, £56,073	18 8
Total payments	2,451 7 2
Balance due to Chest	£58,525 5 10

COLLEGES FOR WOMEN.

GIRTON COLLEGE.

Mistress, Miss E. E. Constance Jones.	
Vice-Mistress, Miss K. Jex-Blake.	
Directors of Studies.—Classics, Miss K. Jex-Blake. Mathematics, Miss Meyer, Miss F. E. Cave-Browne-Cave. Mediæval and Modern Languages, Miss M. G. Beard, Miss M. E. Seaton, Miss C. Kirchberger. History, Miss E. Power.	
Assistant Resident Lecturers.—Mathematics, Miss F. E. Cave-Browne-Cave. Mediæval and Modern Languages, Miss M. E. Seaton, Miss Kirchberger.	
Bursar, Assistant Vice Mistress and Registrar, Miss E. M. Allen.	
Junior Bursar, Miss D. Martin Leake.	
Librarian, Miss V. Cochran.	
Secretary, Miss M. Clover, Coleby, Grange Road, Cambridge.	

NEWNHAM COLLEGE.

Principal, Miss Katharine Stephen.	
Vice-Principals, Miss B. A. Clough; Miss A. B. Collier; Miss J. P. Strachey; Miss E. M. Sharpley.	
Treasurer, Mrs. H. Sidgwick.	
Lecturers.—Miss A. B. Collier, Mathematics. Miss J. E. Harrison, L. E. Matthæi, Mrs. Wedd, Classics. Miss E. R. Saunders, Miss G. L. Elles, Nat. Science. Miss A. Gardner, History. Miss M. Steele-Smith, Miss A. C. Paines, Mlle. Cory, Mlle. Melle Lefèvre, Fraulein E. Rotten, Mod. Lang.	

THE UNIVERSITY OF LONDON, South Kensington, S.W. 1836 and 1900.

Visitor, H.M. the King in Council.
 Chancellor, Rt. Hon. Earl of Rosebery, K.G., K.T.,
 D.C.L., LL.D., F.B.A., F.R.S.
 Vice-Chancellor, W. P. Herringham, M.D., F.R.C.P.
 Chairman of Convocation, Sir Edward Henry
 Busk, M.A.
 Principal, Sir Henry A. Miers, D.Sc., F.R.S.
 Registrars: (Academic Council) P. J. Hartog,
 M.A.; (External Council) A. Milnes, M.A.;
 (University Extension Board) J. Lea, M.A.
 Secretary to the Senate, P. M. Wallace, M.A.
 Sec. to Finance Committee, W. K. Hill, B.A.

Representative in Parliament, Sir Philip Magnus,
 B.Sc.
 Public Orator, Prof. E. A. Gardner, Litt.D.

THE SENATE.

The Chancellor, The Vice-Chancellor, The
 Chairman of Convocation. *By the Crown*, F. D.
 Acland, Hon. W. P. Reeves, Prof. A. Schuster,
 Dr. W. C. Unwin. *By Convocation—(Divinity)*,
 Rev. J. A. Douglas; *(Arts)*, Miss E. C. Higgins,
 Prof. S. L. Loney, Dr. T. L. Mears, Lord
 Moulton, Sir Albert Rollet; *(Laws)*, The Master
 of the Rolls (Sir Herbert Cozens-Hardy);
(Music), C. B. Edgar; *(Medicine)*, Prof. Sir
 Thomas Barlow, Dr. E. G. G. Little; *(Science)*,
 Dr. C. W. Kimmins, Sir Philip Magnus, Dr.
 G. T. Moody, Dr. G. Senter, Dr. R. M. Walms-
 ley, Dr. S. R. Wells. *By Royal College of Phy-*
sicians, Dr. S. J. Sharkey, Dr. F. Taylor. *By*
Royal College of Surgeons, Prof. Sir Rickman
 Godlee, Sir Alfred Gould. *Co-opted to repre-*
sent University College, Dr. T. Gregory Foster,
 Lord Reay. *Co-opted to represent King's Col-*
lege, Dr. R. M. Burrows. *By King's College*
(Theological Department), T. B. Saunders. *By*
Lincoln's Inn, N. Micklem. *By Inner Temple*,
 Arthur Cohen. *By Middle Temple*, R. A. McCall.
By Gray's Inn, Mr. Justice Atkin. *By Law*
Society, J. W. Budd, Sir Henry Johnson.
By Corporation of London, Alderman Sir
 Thomas B. Crosby. *By London County Council*,
 Sir Wm. Collins, Cyril Jackson. *By City and*
Guilds of London Institute, R. C. Palmer. *By*
the Faculties—(Theology), Rev. Prof. S. W.
 Green; *(Arts)*, Rev. Prof. A. Caldecott, Prof.
 M. J. M. Hill, Prof. A. F. Pollard, Miss M. J.
 Tuke; *(Laws)*, G. H. J. Hurst; *(Music)*, Prof.
 Sir Frederick Bridge; *(Medicine)*, H. L. Eason,
 Dr. W. P. Herringham, H. J. Waring; *(Science)*,
 Prof. A. W. Crossley, J. L. S. Hutton, Prof. A. D.
 Waller, Prof. W. W. Watts; *(Engineering)*, Prof.
 W. E. Dalby; *(Economics)*, Graham Wallas.

ORGANISATION OF TEACHING.

On January 1, 1907, University College was
 transferred to the University, of which it now
 forms an integral part in the Faculties of
 Arts, Laws, Medicine, Science, Engineering,
 and Economics. On January 1, 1910, King's
 College was, in respect of all its Departments
 except that of Theology, transferred to the
 University, of which it now forms an integral
 part, but is divided into two separate institu-
 tions, viz.: (a) "King's College" (in the Faculties
 of Arts, Laws, Medicine, Science, Engineering,
 and Economics) and (b) "King's College for
 Women" (in the Faculties of Arts and Science).
 The Theological Department of the College
 remains a "School of the University" in the

Faculty of Theology. Other Institutions main-
 tained by the University are the Brown Animal
 Sanatory Institution in Wandsworth Road, the
 Physiological Laboratory in the University build-
 ings at South Kensington, Goldsmiths' College
 at New Cross, and the Francis Galton Laboratory
 for National Eugenics at University College.

UNIVERSITY COLLEGE, Gower Street, W.C.
 Chairman of Committee, Lord Reay, K.T., G.C.S.I.
 Provost, T. Gregory Foster, Ph.D.

KING'S COLLEGE, Strand, W.C.
 Chairman of Delegacy, Viscount Hambleden.
 Principal, R. M. Burrows, D.Litt.

KING'S COLLEGE FOR WOMEN, Kensington
 Square, W.

Chairman of Delegacy, R. M. Burrows, D.Litt.
 Warden, Miss Hilda D. Oakeley, M.A.

GOLDSMITHS' COLLEGE, New Cross, S.E.
 Warden, William Loring, M.A.

TEACHING STAFF.

PROFESSORS.

Agricultural Zoology, F. V. Theobald, M.A.
 Anatomy, F. G. Parsons, F.R.C.S.; G. D. Thane,
 LL.D.; David Waterston, M.D.; William
 Wright, D.Sc.
 Applied Mathematics and Mechanics (Goldsmid),
 L. N. G. Filon, D.Sc., F.R.S.
 Applied Physics, S. P. Thompson, D.Sc., F.R.S.
 Archaeology (Yates), E. A. Gardner, Litt.D.
 Architecture, F. M. Simpson, F.R.I.B.A.
 Bacteriology, William Bulloch, M.D.; R. T. Hew-
 lett, M.D.
 Bio-Chemistry, Arthur Harden, D.Sc., F.R.S.
 Botany, Miss M. J. Benson, D.Sc.; W. B. Bottom-
 ley, Ph.D.
 Botany (Quain), F. W. Oliver, D.Sc., F.R.S.
 Chemistry, G. Barger, D.Sc.; A. W. Crossley,
 D.Sc., F.R.S.; J. T. Hewitt, D.Sc., F.R.S.; R.
 Meldola, D.Sc., F.R.S.
 Chemistry, General, F. G. Donnan, Ph.D., F.R.S.
 Chemistry, General and Inorganic (Daniell), J.
 M. Thomson, LL.D., F.R.S.
 Chemistry, Organic, J. Norman Collie, LL.D.,
 F.R.S.; Herbert Jackson, F.I.C.
 Civil Engineering, A. H. Jameson, M.Sc.
 Civil & Mechanical Engineering, E. H. Lamb, M.Sc.
 Classical Literature, W. C. F. Walters, M.A.
 Commerce, A. J. Sargent, M.A.
 Comparative Law (Quain), Sir John Macdonell,
 C.B., LL.D., F.B.A.
 Education, John Adams, LL.D.; J. W. Adamson, B.A.
 Egyptology (Edwards), W. M. Flinders Petrie,
 D.C.L., F.R.S.
 Electrical Engineering, J. A. Fleming, D.Sc., F.R.S.
 Do. (William Siemens), Ernest Wilson, M.Inst.C.E.
 Engineering, D. S. Capper, M.A.; W. E. Dalby,
 M.A., F.R.S.; H. M. Waynforth, M.I.Mech.E.
 English History, A. F. Pollard, Litt.D.
 English Lang. and Lit., Israel Goldenzweig, Litt.D.,
 F.B.A.; Sir Sidney Lee, D.Litt., F.B.A.
 English Lang. and Lit. (Quain), W. P. Ker, LL.D.
 English Literature, Miss C. F. E. Spurgeon.
 Ethnology, C. G. Seligmann, M.D., F.R.C.P.
 Eugenics (Galton), Karl Pearson, LL.D., F.R.S.
 Experimental Pathology, C. J. Martin, D.Sc.,
 F.R.S.; Sir Almroth E. Wright, M.D., F.R.S.
 Fine Art (Slade), Frederick Brown.
 French & Romance Philology (Fielden), L. M.
 Brandin, Ph.D.
 French Literature, G. Rudler, D.-ès-L.
 Geology (Yates-Goldsmid), E. J. Garwood, M.A.

German, R. C. Priebisch, Ph.D.; J. G. Robertson, Ph.D.
 Greek, J. A. Platt, M.A.
 Hygiene (Chadwick), H. R. Kenwood, C.M.
 Latin, H. E. Butler, M.A.
 Mathematics (Astor), M. J. M. Hill, LL.D., F.R.S.
 Mathematics, Harold Hilton, D.Sc.; J. W. Nicholson, D.Sc.; S. A. F. White, M.A.
 Mechanical Engineering (vacant).
 Mediæval History, F. J. C. Hearnshaw, LL.D.
 Metallurgy, A. K. Huntington, A.R.S.M.
 Modern French History and Institutions, P. J. Mantoux, D.ès-L.
 Modern History, Sir John Laughton, D.Litt.
 Morbid Anatomy, S. G. Shattock, F.R.C.S.
 Music (King Edward), Sir Frederick Bridge, C.V.O., Mus.Doc.
 Pathology, F. W. Andrewes, M.D., F.R.C.P.
 Pharmaceutics, H. G. Greenish, F.I.C.
 Pharmacology, A. R. Cushny, LL.D., F.R.S.
 Philosophy of Mind and Logic (Grote), C. E. Spearman, Ph.D.
 Physics, C. H. Lees, D.Sc., F.R.S.
 Do. (Quain), F. T. Trouton, D.Sc., F.R.S.
 Do. (Wheatstone), O. W. Richardson, D.Sc., F.R.S.
 Physiology, W. D. Halliburton, M.D., F.R.S.; L. E. Hill, M.B., F.R.S.
 Physiology (Jodrell), E. H. Starling, M.D., F.R.S.
 Physiology (and Director of the Physiological Laboratory), A. D. Waller, M.D., F.R.S.
 Physiology, General, W. M. Bayliss, D.Sc., F.R.S.
 Political Economy, Edwin Cannan, LL.D.; H. S. Foxwell, M.A.
 Protozoology, E. A. Minchin, M.A.
 Public Administration, S. J. Webb, LL.B.
 Sociology (Martin White), L. T. Hobhouse, D.Litt.; E. A. Westernmark, Ph.D.
 Veterinary Pathology and Bacteriology, Sir John McFadyean, LL.D.
 Zoology, Arthur Dendy, D.Sc., F.R.S.
 Do. & Comparative Anatomy (Jodrell), J. P. Hill, D.Sc.

READERS.

Accountancy, L. R. Dicksee, M.Com.
 Ancient History, M. O. B. Caspari, M.A.; J. K. Fotheringham, D.Litt.
 Applied Physiology, G. A. Buckmaster, M.D.
 Bacteriology, J. W. H. Eyre, M.D.; J. C. G. Ledingham, M.A.
 Botany, Miss E. N. Thomas, B.Sc.
 Chemistry, T. M. Lowry, D.Sc.; G. Senter, D.Sc.
 Economic History, Mrs. Knowles, Litt.D.
 English Lang. & Lit., P. G. Thomas, M.A.
 English Law, G. H. J. Hurst, M.A.
 Geography, H. J. Mackinder, M.A., M.P.
 Geometry, A. N. Whitehead, Sc.D., F.R.S.
 German, H. G. Atkins, M.A.; W. Perrett, Ph.D.; J. Steppat, Ph.D.
 Graphics, W. H. Eccles, D.Sc.
 Greek, J. M. MacGregor, M.A.
 History, Miss H. Johnstone, M.A.
 Hygiene and Public Health, A. G. R. Foulerton, F.R.C.S.
 Logic and Ethics, Abraham Wolf, D.Lit.
 Meteorology, W. N. Shaw, Sc.D., F.R.S.
 Mycology, E. S. Salmon.
 Palæogeography and Economic History, Hubert Hall, F.S.A.
 Pathology, L. S. Dudgeon, F.R.C.P.
 Physiological Chemistry, J. A. Gardner, M.A.; R. H. A. Plimmer, D.Sc.
 Physiology, Miss W. C. Cullis, D.Sc.; M. S. Pembrey, M.D.
 Plant Physiology, T. G. Hill, A.R.C.S.

Psychology, W. Brown, D.Sc.; Miss B. Edgell, Ph.D.
 Public Administration, Graham Wallas, M.A.
 Statistics, A. L. Bowley, Sc.D.
 Thermodynamics, A. W. Porter, B.Sc., F.R.S.
 Tibetan Language, F. W. Thomas, Ph.D.
 Veterinary Hygiene, G. H. Wooldridge, F.R.C.V.S.
 Zoology, W. G. Ridewood, D.Sc.; H. W. M. Tims, M.D.

RECOGNISED TEACHERS.

The number of "Recognised Teachers" in the several Faculties is as follows:—

Theology, 23; Arts, 143; Laws, 22; Music, 18; Medicine, 366; Science, 208; Engineering, 66; Economics, 11.

DEANS OF THE FACULTIES, 1912-14.

Theology, Rev. W. T. Davison, D.D.
 Arts, Prof. E. A. Gardner, Litt.D.
 Laws, J. S. Green, M.A.
 Music, F. J. Read, Mus. Doc.
 Medicine, Sir A. P. Gould, K.C.V.O., F.R.C.S.
 Science, Prof. W. W. Watts, Sc.D., F.R.S.
 Engineering, Prof. Ernest Wilson, M.Inst.C.E.
 Economics, Prof. A. J. Sargent, M.A.

SCHOOLS OF THE UNIVERSITY.

In the Faculty of Theology:—

New College, Hampstead (Congregational).
 Principal, Rev. A. E. Garvie, D.D.
 Hackney College, Hampstead (Congregational).
 Principal, Rev. P. T. Forsyth, D.D.
 Regent's Park College, N.W. (Baptist).
 Principal, Rev. G. P. Gould, M.A.
 King's College (Theological Department), Strand, W.C. (Church of England).
 Dean, Rev. A. Caldecott, D.D.
 Wesleyan College, Richmond (Wesl. Methodist).
 Principal, Rev. W. T. Davison, D.D.
 St. John's Hall, Highbury (Church of England).
 Principal, Rev. A. W. Greenup, D.D.
 Arts, Science, and Engineering:—
 East London College, Mile End Road, E.
 Principal, John L. S. Hatton, M.A.

Arts and Science:—

Royal Holloway College, Englefield Green.
 Principal, Miss Ellen C. Higgins, B.A.
 Bedford College for Women, Regent's Park, N.W.
 Principal, Miss M. J. Tuke, M.A.

Arts:—

Westfield College, Hampstead, N.W.
 Principal, Miss A. de Sélincourt.
 Arts—in Pedagogy only:—
 London Day Training College, Southampton Row, W.C.
 Principal, Prof. J. Adams, LL.D.

Medicine:—

The Medical Schools of certain Hospitals, &c. (see pp. 302-303.)

Science and Engineering:—

Imperial College of Science and Technology, South Kensington, S.W.

Science:—

Royal College of Science and Royal School of Mines.
 Rector, Sir Alfred Keogh, K.C.B., LL.D.

Engineering:—

City and Guilds (Engineering) College.
 Dean, Prof. W. E. Dalby, B.Sc., F.R.S.
 Science—in Agriculture only:—
 South-Eastern Agricultural College, Wye, Kent.
 Principal, M. J. R. Duustan, M.A., F.R.S.E.
 Economics and Political Science:—
 London School of Economics and Political Science, Clare Market, Kingsway, W.C.
 Director, Hon. W. P. Reeves.

THE UNIVERSITY OF DURHAM. 1831.

Chancellor, The Duke of Northumberland, K.G.
 Vice-Chancellor, Sir G. H. Philipson, D.C.L.
 Proctors, Rev. S. R. P. Mouldsdales, B.D.; P. P. Bedson, D.Sc.

Registrar (vacant).

Librarian, E. V. Stocks, M.A.

Observer, F. C. H. Carpenter, M.A.

UNIVERSITY COLLEGE, Durham.

Master, Rev. H. Gee, D.D.

HATFIELD HALL, Durham.

Principal, F. B. Jevons, D.Litt.

ST. CHAD'S HALL, Durham.

Principal, Rev. S. R. P. Mouldsdales, M.A.

ST. JOHN'S HALL, Durham.

Principal, Rev. D. Walker, D.D.

WOMEN'S HOSTEL, Durham.

Principal, P. Wragge.

NON-COLLEGIATE STUDENTS.

Censor, Rev. V. K. Cooper, M.A.

HOME STUDENTS (Women).

Censor, E. M. Ellershaw, B.A.

COLLEGE OF MEDICINE, Newcastle.

President, Sir G. H. Philipson, D.C.L.

ARMSTRONG COLLEGE, Newcastle.

Principal, W. H. Hadow, D.Mus.

DURHAM COLLEGES.

Divinity, Rev. R. J. Knowling, D.D.

Greek, Rev. A. H. Cruickshank, M.A.

Mathematics, Percy John Heawood, M.A.

Hebrew, Ven. H. W. Watkins, D.D.

Church History, Rev. Henry Gee, D.D., F.S.A.

Philosophy, Frank Byron Jevons, D. Litt.

Biblical Exegesis, Rev. Dawson Walker, D.D.

English Language and Literature, Rev. Henry Ellershaw, M.A.

Latin, Rev. John Hall How, M.A.

Logic and Psychology, Arthur Robinson, D.C.L.

Modern Languages, Chas. Fredk. Herdener, M.A.

Music, Joseph Cox Bridge, D.Mus.

COLLEGE OF MEDICINE, Newcastle, 1832.

Medicine, (Principles and Practice), Sir G. H.

Philipson, D.C.L.; D. Drummond, D.C.L.; Sir T.

Oliver, LL.D.

Do. (Psychological), T. W. McDowall, M.D.

Surgery, J. R. Morison, M.D.; H. B. Angus, M.S.

Ophthalmology, J. W. Wardale, B.S.

Midwifery, E. P. R. Lyle, M.D.

Pathology, S. McDonald, M.D.

Med. Jurisprudence, R. A. Bolam, M.D.

Public Health, T. E. Hill, B.Sc.

Anatomy, R. Howden, M.B.

Physiology, F. A. Bainbridge, M.D.

Materia Medica, W. E. Hume, M.D.

Therapeutics, Thomas Beattie, M.D.

Comparative Pathology, H. J. Hutchens, M.A.

ARMSTRONG COLLEGE, Newcastle, 1871.

Mathematics, C. M. Jessop, M.A.

Physics, H. Stroud, D.Sc.

Chemistry, P. Phillips Bedson, D.Sc.

Geology, G. A. Lebour, D.Sc.

Zoology, A. Meek, M.Sc.

Botany, M. C. Potter, Sc.D.

Agriculture & Rural Econ., D. A. Gilchrist, M.Sc.

Classics, J. W. Duff, D.Litt.

Eng. Lang. & Literature, Allen Mawer, M.A.

Engineering, R. L. Weighton, D.Sc.

Electrical Engineering, W. M. Thornton, D.Sc.

Naval Architecture, J. J. Welch, M.Sc.

Mining & Surveying, Henry Louis, D.Sc.

Modern History, K. H. Vickers, M.A.

Mental and Moral Phils., R. F. A. Hoerlé, B.Sc.

Modern Languages, A. G. Latham, M.A.

Economics, H. M. Hallsworth, M.A.

Education, Mark R. Wright, M.A.

THE VICTORIA UNIVERSITY OF MANCHESTER. (£2,000.)

Founded 1850; re-organised 1880 and 1903.

Chancellor, Viscount Morley of Blackburn, O.M.

Vice-Chancellor, Prof. F. E. Weiss, D.Sc.

Treasurer (vacant).

Registrar and Senior Tutor (Men), Edward Fiddes, M.A.

Bursar, Sydney Chaffers, M.A.

Senior Tutor (Women), Phoebe Sheavyn, D.Lit.

Clerk of Convocation, W. Fletcher Shaw, M.D.

Faculty of Arts.

Greek, W. M. Calder, M.A.

Hellenistic Greek, J. H. Moulton, D.Lit.

Latin, R. S. Corway, Litt.D.; W. B. Anderson, M.A.

English Lit. & Language, C. H. Herford, Litt.D.

W. J. Sedgefield, D.Litt.

French, L. E. Kastner, M.A.

German, Arwid Johannson, M.A.

Semitic Languages, Maurice A. Canney, M.A.

Chinese, E. H. Parker, M.A.

Mediæval & Ecclesiastical History, T. F. Tout,

M.A., F.B.A.

Ancient & Mediæval History, J. Tait, M.A.

Economic History, George Unwin, M.A.

Philosophy, S. Alexander, LL.D., F.B.A.

Education, J. J. Findlay, Ph.D.; H. Bompas

Smith, M.A.

Economics, S. J. Chapman, M.A.

Architecture, A. C. Dickie, M.A., F.S.A.

Faculty of Science.

Mathematics, Horace Lamb, LL.D., F.R.S.

Physics, Ernest Rutherford, D.Sc., F.R.S.; Arthur

Schuster, Sc.D., F.R.S.

Electro-Technics, Robert Beattie, D.Sc.

Engineering, J. E. Petavel, D.Sc., F.R.S.

Chemistry, H. B. Dixon, Ph.D., F.R.S.; A. Lap-

worth, D.Sc.

Metallurgy, H. C. H. Carpenter, Ph.D.

Zoology, S. J. Hickson, D.Sc., F.R.S.

Botany, F. E. Weiss, D.Sc.

Do., Cryptogamic, W. H. Lang, D.Sc., F.R.S.

Geology, Sir T. H. Holland, K.C.I.E., D.Sc., F.R.S.;

W. Boyd Dawkins, D.Sc., F.R.S.

Faculty of Law.

Professors, Sir A. Hopkinson, K.C., LL.D., and

J. S. Seaton, B.C.L.

Faculty of Commerce.

Professors, S. J. Chapman, M.A.; and George

Unwin, M.A.

Faculty of Music.

Dean, Walter Carroll, Mus.D.

Faculty of Theology.

Biblical Criticism, A. S. Peake, D.D.; Maurice A.

Canney, M.A.

Comp. Religion, T. W. Rhys Davids, LL.D., F.B.A.

Faculty of Technology.

Dean, J. C. Maxwell Garnett, M.A.

Electrical Engineering, Miles Walker, M.A.

Chemistry, E. Knecht, Ph.D.

Faculty of Medicine.

Anatomy, Grafton Elliot Smith, M.D., F.R.S.

Physiology, W. Stirling, M.D.

Materia Medica, R. B. Wild, M.D.

Pathology, A. E. Boycott, D.M.

Medicine, Clinical, E. S. Reynolds, M.D.

Do., Systematic, George R. Murray, M.D.

Clinical Surgery, William Thornburn, F.R.C.S.

Systematic Surgery, J. W. Smith, F.R.C.S.

Obstetrics & Gynecology, A. Donald, M.D.

Forensic Medicine, William Sellers, M.D.

Public Health & Bacteriology, A. S. Delépine, M.B.

TRAINING DEPARTMENT (for Men and Women).

Professors, J. J. Findlay, Ph.D.; H. Bompas

Smith, M.A.

THE UNIVERSITY OF BIRMINGHAM.

Birmingham, 1900. (£2,000.)

Chancellor, Rt. Hon. Joseph Chamberlain, M.P.
Vice-Chancellor, Gilbert Barling, F.R.C.S.
Principal, Sir Oliver Lodge, D.Sc., F.R.S.
Vice-Principal & Registrar, Robert S. Heath, D.Sc.
Secretary, George H. Morley.

PROFESSORS.

Faculties of Science, Arts, and Commerce.
Mathematics, R. S. Heath, D.Sc.
Physics, J. H. Poynting, Sc.D., F.R.S.
Chemistry, P. F. Frankland, Ph.D., F.R.S.
Zoology, F. W. Gamble, D.Sc., F.R.S.
Botany, G. S. West, D.Sc.
Geology & Physiography, Wm. S. Boulton, D.Sc.
Mechanical Engineering, F. W. Burstall, M.A.
Civil Engineering (vacant).
Electrical Engineering, Gisbert Kapp, M.Sc.
Brewing, Adrian J. Brown, M.Sc., F.R.S.
Metallurgy, T. Turner, M.Sc.
Mining, J. Cadman, D.Sc.
Greek and Latin, E. A. Sonnenschein, D.Litt.
English Lang. & Lit., E. de Selincourt, D.Litt.
Mental and Moral Philosophy, J. H. Muirhead, LL.D.
French, H. L. Chatelain, D.ès-Lett.
German, Karl Wichmann, Ph.D.
History, C. R. Beazley, D.Litt.
Education, Alfred Hughes, M.A.
Music, Granville Bantock, M.A.
Commerce, W. J. Ashley, Ph.D.
Accounting, C. E. Martineau, M.A.
Finance, A. W. Kirkaldy, M.Com.

Faculty of Medicine.

Medicine, R. Saundby, M.D.; O. J. Kauffmann, M.D.
Surgery, W. F. Haslam, F.R.C.S.; G. A. Leedham Green, F.R.C.S.
Anatomy, P. Thompson, M.D.
Physiology, E. W. Wace Carlier, M.D.
Therapeutics, Sir Robert M. Simon, M.D.
Forensic Medicine, J. T. J. Morrison, F.R.C.S.
Hygiene and Public Health, A. Bostock Hill, M.D.
Midwifery, Thomas Wilson, F.R.C.S.
Pathology, R. F. C. Leith, F.R.C.P.
Dental School, J. Humphreys, M.D.S. (Hon. Sec.).

DAY TRAINING COLLEGES.

Head Mistress (Women), Miss M. L. Lilley, M.A.
Master of Method (Men), R. A. Jones, M.A.

THE UNIVERSITY OF LIVERPOOL.

Liverpool, 1903. (£2,000.)

Chancellor, The Earl of Derby, G.C.V.O., C.B., LL.D.
Vice-Chancellor, Sir Alfred Dale, LL.D.
Registrar, Edward Carey, LL.B.
Librarian, John Sampson, D.Litt.

PROFESSORS.

Faculties of Arts, Science, Medicine, Law and Engineering.
Greek, C. F. F. Lehmann-Haupt, LL.D.
Latin, J. P. Postgate, F.B.A.
English Lang. & Philol., H. C. K. Wyld, B.Litt.
English Literature, Oliver Elton, M.A.

Botany, R. J. H. Gibson, M.A.
Physiology, C. S. Sherrington, M.D., F.R.S.
Anatomy, A. Melville Paterson, M.D.
Therapeutics, J. Hill Abram, M.D.
Pathology, E. E. Glyn, M.D.
Medicine, T. Robinson Glynn, M.D.
Surgery, Rushton Parker, F.R.C.S.
Regional Surgery, W. Thelwall Thomas, F.R.C.S.
Midwifery and Gynaecology, H. Briggs, F.R.C.S.
Hygiene, E. W. Hope, D.Sc.
Forensic Medicine, R. J. M. Buchanan, M.D.
Bio-Chemistry, B. Moore, D.Sc.
Tropical Sanitation, Sir R. Ross, K.C.B., F.R.S.
Tropical Medicine, J. W. W. Stephens, M.D.
Entomology, R. Newstead, M.Sc.
Engineering, W. H. Watkinson, M.Eng.
Electrical Engineering, E. W. Marchant, D.Sc.
Civil Engineering, S. W. Perrott, M.A.I.
Naval Architecture, W. S. Abell, M.I.N.A.

HALL OF RESIDENCE FOR WOMEN.

Warden, Miss D. Chapman, M.A.

DAY TRAINING COLLEGE (Men and Women).

Principal, J. H. Gettins, B.A.
Warden, F. T. Sharpe, M.A.

THE UNIVERSITY OF LEEDS.

Leeds, 1904. (£2,000.)

Chancellor, The Duke of Devonshire, G.C.V.O., LL.D.
Pro-Chancellor, Arthur G. Lupton, LL.D.
Vice-Chancellor, Michael E. Sadler, C.B., LL.D.
Clerk to the Senate, F. T. Baines, B.A.
Secretary, Archibald E. Wheeler.

PROFESSORS.

Faculties of Arts (including Commerce & Law), Science & Technology.
Classics, W. Rhys Roberts, Litt.D.; B. M. Connal, M.A.
English Lang. and Lit., G. S. Gordon, M.A.
English Lang., F. W. Moorman, Ph.D.
French, Paul Barbier fils, M.A.
German, A. W. Schiidekopf, Ph.D.
History, Arthur J. Grant, M.A.
Philosophy, C. M. Gillespie, M.A.
Economics, D. H. Macgregor, M.A.
Education, J. Welton, M.A.
Law, W. R. Phillips, LL.M.
Mathematics, L. J. Rogers, M.A.
Physics, W. H. Bragg, M.A., F.R.S.
Chemistry, A. Smithells, B.Sc., F.R.S.
Organic Chemistry, J. B. Cohen, Ph.D.
Zoology, W. Garstang, D.Sc.
Botany, J. H. Priestley, B.Sc.
Geology, P. F. Kendall, M.Sc.

Engineering, J. Goodman, M.Sc.
Mining, E. L. Hummel, B.Sc.
Textile Industries, Roberts Beaumont, M.Sc.
Dyeing, A. G. Green, M.Sc.
Leather Industries, E. Staismy, Ph.D.
Coal Gas and Fuel Industries, with Metallurgy,
 J. W. Cobb, B.Sc.

Agriculture, R. S. Seton, B.Sc.
Agricultural Chemistry, C. Crowther, Ph.D.
School of Medicine.
Anatomy, J. Kay Jamieson, M.B.
Physiology and Histology, De Burgh Birch, M.D.
Pathology, A. S. Grünbaum, F.R.C.P.
Medicine, T. Wardrop Griffith, M.D.
Clinical Medicine, A. G. Barrs, M.D.
Surgery, R. Lawford Knaggs, M.D.
Clinical Surgery, Sir Berkeley Moynihan, F.R.C.S.
Obstetrics, J. B. Hellier, M.D.
Therapeutics, Pharmacy, and Materia Medica,
 H. J. Campbell, M.D.
Public Health, J. S. Cameron, M.D.
Forensic Medicine, F. W. Eurich, M.D.
Mental Diseases, J. Shaw Bolton, M.D.

UNIVERSITY OF SHEFFIELD. 1905. (£2,000.)

Chancellor, The Duke of Norfolk, E.M., K.G., Litt.D.
Pro-Chancellors, G. Franklin, Litt.D.; H. K. Stephenson.

Vice-Chancellor, H. A. L. Fisher, LL.D., F.B.A.
Treasurer, A. J. Hobson.
Registrar, W. M. Gibbons, M.A.
Librarian, A. P. Hunt, B.A.
Curator of the Observatory, A. H. Leahy, M.A.
Tutor for Women Students, Miss M. J. Sorby.

PROFESSORS.

Mathematics, A. H. Leahy, M.A.
Physics, W. M. Hicks, Sc.D., F.R.S.
Chemistry, W. Palmer Wynne, D.Sc., F.R.S.
Zoology, Alfred Denny, M.Sc.
Botany, B. H. Bentley, M.A.
Geology, W. G. Fearnside, M.A.
Geography, R. N. Rudmose Brown, D.Sc.
English Lang. & Lit., G. C. Moore Smith, Litt.D.
History, H. W. Appleton, M.A.
Greek, E. S. Forster, M.A.
Latin, W. C. Summers, M.A.
French, A. T. Baker, Ph.D.
German, Julius Freund, Ph.D.
Philosophy, T. Loveday, M.A.
Economics, D. Knoop, M.A.
Accounting, T. E. Shuttleworth, B.A.
Education, J. A. Green, M.A.
Music, H. Coward, Mus. Doc.
Law, W. F. Trotter, LL.M.; E. Bramley, M.A.
Engineering, W. Ripper, D.Eng.
Mining, F. E. Armstrong, M.Sc.
Applied Chemistry, L. T. O'Shea, M.Sc.
Metallurgy, J. O. Arnold, D.Met.
Architecture, W. S. Purchon, A.R.I.B.A.
Anatomy, C. J. Patten, M.D.
Physiology, J. S. Macdonald, B.A.
Medicine, D. Burgess, F.R.C.P.; A. J. Hall, M.D.
Forensic Medicine, A. E. Naish, M.B.
Materia Medica, &c., E. W. Adams, M.D.
Surgery, Sinclair White, F.R.C.S.
Pathology, H. R. Dean, M.D.
Midwifery, P. E. Barber, B.A.
Diseases of Women, M. H. Phillips, M.B.
Public Health, R. P. Williams, M.D.
Ophthalmology, G. H. Pooley, F.R.C.S.

TRAINING COLLEGE.

Master of Method, C. Birkenough, M.A.
Mistress of Method, Miss N. G. R. Taylor, B.A.

UNIVERSITY OF BRISTOL. 1909. (£2,000.)

Chancellor, Viscount Haldane, K.T., LL.D.

Vice-Chancellor, Sir Isambard Owen, D.C.L.
Treasurer, George A. Wills, LL.D.
Registrar, James Rafter, M.A.

PROFESSORS.

Agriculture, Drysdale Turner, P.A.S.I.
Agricultural Biology, Bertie T. P. Barker, M.A.
Anatomy, Edward Fawcett, M.D.
Applied Chemistry, Julius Wertheimer, D.Sc.
Applied Mathematics, Edmund S. Boulton, M.A.
Chemistry, Francis Francis, D.Sc.
Civil Engineering, Robert M. Ferrier, M.Sc.
Classics, Francis Brooks, M.A.
Electrical Engineering, David Robertson, D.Sc.
English, Arthur R. Skemp, Ph.D.
Geology, Sidney H. Reynolds, M.A.
Greek, John F. Dobson, M.A.
Mathematics, Frank R. Barrell, M.A.
Mechanical and Mining Engineering, John
 Munro, M.Sc.
Medicine, J. Michell Clarke, M.D.; Francis H.
 Edgeworth, M.D.
Modern History, George H. Leonard, M.A.
Motor-Car Engineering, William Morgan, B.Sc.
Natural History, J. R. Ainsworth-Davis, M.A.
Obstetrics, Walter C. Swayne, M.D.
Pathology, I. Walker Hall, M.D.
Physiology, A. F. Stanley Kent, M.A.
Psychology and Ethics, C. Lloyd Morgan, D.Sc.
 F.R.S.
Surgery, Charles A. Morton, F.R.C.S.; James
 Swain, M.D.

**Agricultural and Horticultural Research
 Station, Long Ashton.**

Director, Professor B. T. P. Barker, M.A.

Secondary Training Department.

Lecturer in Education, Miss G. E. Hodgson,
 D.Litt.

Elementary Training Department.

Master of Method, T. S. Foster, M.A.
Mistress of Method, Miss A. Mullock, M.Sc.

Hall of Residence for Women.

Warden, Miss M. C. Staveley, M.A.

ENGLISH UNIVERSITY COLLEGES.

**EXETER—ROYAL ALBERT MEMORIAL,
 UNIVERSITY COLLEGE.**

Principal, A. W. Clayden, M.A.
Sec. and Registrar, A. Woodbridge.
DAY TRAINING COLLEGE (Men and Women).
Prof of Education, A. E. Dean, M.A.
Lady Tutor, Miss A. J. Walker, M.A.

**MUNICIPAL SCHOOL OF TECHNOLOGY,
 Manchester.**

Principal, J. C. M. Garnett, M.A.
Registrar, H. Williams.

**NEWCASTLE - UPON - TYNE — ARMSTRONG
 COLLEGE. (See University of Durham.)**

NOTTINGHAM—UNIVERSITY COLL. 1880.

Principal, W. H. Heaton, M.A.
Registrar, T. P. Black, Ph.D.

TRAINING COLLEGE.

Head of Department, Prof. Henderson, B.A.
Normal Mistress, Miss Bird, L.L.A.

READING—UNIVERSITY COLLEGE. (£5,500.)

Principal, W. M. Childs, M.A.
Registrar, F. H. Wright, M.A.

SOUTHAMPTON—HARTLEY UNIV. COLL.

Principal, Alex. Hill, M.A.
Registrar, D. Kiddle.

Wales.

THE UNIVERSITY OF WALES, 1893.

(£5,500.)

"PRIFYSGOL CYMRU."

Chancellor, H.M. The King.
 Senior Deputy *do.*, The Lord Kenyon, K.C.V.O.
 Vice-Chancellor, Principal T. F. Roberts, LL.D.
 Warden, *Guild of Graduates*, F. D. Chattaway, D.Sc., F.R.S.
Treas., Lt.-Gen. Sir J. Hills-Johnes, F.C., G.C.B.
Registrar, J. M. Angus (Cathays Park, Cardiff).
Treas., *Guild of Graduates*, A. H. Trow, D.Sc.
Clerk, *Guild of Graduates*, J. G. Davies, M.A.

I. UNIVERSITY COLLEGE OF WALES—Aberystwyth (1872). (£9,500.)

Principal, Thomas Francis Roberts, LL.D.
Registrar, J. H. Davies, M.A.
Librarian, J. D. Williams, B.A.

PROFESSORS.

Greek, J. W. Marshall, M.A.
 Latin, E. Bensly, M.A.
 Oriental, German, & Italian Lang., H. Ethé, Ph.D.
 English Lang. and Lit., J. W. H. Atkins, M.A.
 History, E. Edwards, M.A.; T. S. Roberts, M.A.
 Math., Nat. Philos., & Astron., R. W. Genese, M.A.
 Applied Mathematics, G. A. Schott, D.Sc.
 Logic and Philosophy, W. Jenkin Jones, M.A.
 Political Science, E. A. Lewis, D.Sc.
 Chemistry, Alex. Findlay, D.Sc.
 Physics, D. Morgan Lewis, M.A.
 Zoology, H. J. Fleure, D.Sc.
 Geology, O. T. Jones, D.Sc.
 Botany, R. H. Yapp, M.A.
 Welsh & Comparative Philology, Sir Edward Anwyl, M.A.
 French, André Barbier, L.èa.L.
 Education, Foster Watson, D.Litt.
 Law, T. Arthur Levi, B.C.L.
 Music, David Jenkins, Mus.Bac.
 Agriculture (vacant).

Do. (Chemistry), J. J. Griffith, B.Sc.

HALL OF RESIDENCE FOR WOMEN.

Warden, Miss E. A. Fewings.

MEN STUDENTS' HOSTEL.

Warden, C. R. Chapple, M.A.

II. UNIVERSITY COLLEGE OF NORTH WALES—Bangor (1884). (£9,500.)

Principal, Sir Harry R. Reichel, LL.D.
 Secretary and Registrar, J. E. Lloyd, M.A.

PROFESSORS.

Constitutional History, The Principal.
History, J. E. Lloyd, M.A.
 Greek, T. Hudson Williams, D.Litt.
 Latin, E. V. Arnold, Litt.D.
 French, O. H. Fynes-Clinton, M.A.
 German, E. L. Milner-Barry, M.A.

 Semitic Languages, T. Witton Davies, Ph.D.
 Logic, Philosophy and Pol. Econ., J. Gibson, M.A.
 Mathematics, G. H. Bryan, Sc.D., F.R.S.
 Physics, E. Taylor Jones, D.Sc.
 Chemistry, K. J. P. Orton, Ph.D.
 Botany, R. W. Phillips, D.Sc.
 Welsh, J. Morris Jones, M.A.
 Agriculture, Robert G. White, M.Sc.
 Zoology, P. J. White, M.B., F.R.S.E.
 Education, R. L. Archer, M.A.
 Forestry, Fraser Story, F.R.S.E.

HALL OF RESIDENCE FOR WOMEN.

Warden, Miss E. Steel, M.A.

III. UNIVERSITY COLL. OF SOUTH WALES AND MONMOUTHSHIRE—Cardiff (1883). (£9,500.)

Principal, Ernest Howard Griffiths, Sc.D., F.R.S.
 Registrar, D. J. A. Brown.

PROFESSORS.

Greek, G. Norwood, M.A.
 Latin, D. A. Slater, M.A.
 Logic and Philosophy, J. S. Mackenzie, Litt.D.
 Economics and Polit. Science, W. J. Roberts, M.A.
 English Lang. & Literature, H. Littledale, M.A.
 French Lang. & Literature, Paul Barbier.
 Education, W. Phillips, M.A.; H. M. Mackenzie, M.A.
 Applied Mathematics, R. H. Pinkerton, M.A.
 Celtic, Thomas Powell, M.A.
 Experimental Philosophy, The Principal.
 Physics, A. L. Selby, M.A.
 Chemistry, C. M. Thompson, D.Sc.
 Engineering, F. Bacon, M.A.
 Zoology, W. N. Parker, Ph.D.;
 Botany, A. H. Trow, D.Sc.
 Geology, T. F. Sibly, D.Sc.
 History, H. Bruce, M.A.
 Metallurgy, A. A. Read, M.Met.
 Music, D. Evans, Mus.Bac.

Faculty of Medicine.

Anatomy, David Hepburn, M.D., F.R.S.E.
 Physiology, J. B. Hayercraft, M.D., F.R.S.E.
 Pathology and Bacteriology, E. Emrys Roberts, M.D.

ABERDARE HALL.

Principal, Miss Kate Hurlbatt.

LAMPETER.

ST. DAVID'S COLLEGE (1827).

Principal & Sen. Bursar, Rev. Ll. J. M. Bebb, D.D.

PROFESSORS.

Theology and Greek, The Principal.
Math. & Phys. Science, A. W. Scott, M.A.
 Latin, G. W. Wade, D.D., *Librarian*.
 English & Philos., H. Walker, LL.D.
 Theology and Hebrew, E. T. Green, M.A.
 Welsh, E. L. Thomas, M.A.
 Theology (Lect.), Rev. C. Cryer, M.A.
 History (Lect.), A. H. Dainton, M.A.
 Mathematics (Lect.), W. H. D. Whitfield, B.A.

[Lampeter possesses by Charter the privilege of conferring degrees B.A. and B.D., and is affiliated to Oxford and Cambridge.]

Scotland.

UNIVERSITY OF ST. ANDREWS. 1411.

(£16,800.)

Chancellor, Rt. Hon. Lord Balfour of Burleigh, K.T.
 Vice-Chancellor, Principal Sir James Donaldson, LL.D.
 Rector, The Earl of Rosebery, K.G., K.T., P.C., LL.D.
 Principal, Sir James Donaldson, LL.D.
 Representative in Parliament, Rt. Hon. Sir R. B. Finlay, K.C., LL.D.
 Registrar & Secretary, Andrew Bennett.
 Librarian, J. M. Anderson, LL.D. Factor, W. Wilkie.

UNITED COLLEGE OF ST. SALVATOR AND ST. LEONARD.

Principal, Sir James Donaldson, LL.D. ...£1,875

PROFESSORS.

Humanity, Wallace M. Lindsay, M.A. 750
 Logic & Metaphysics, G. F. Stout, LL.D. 650

<i>Greek</i> , John Burnet, M.A.	£750
<i>Mathematics</i> , P. R. Scott Lang, M.A.	750
<i>Moral Philosophy</i> , Alfred E. Taylor, M.A. ...	650
<i>Nat. Philos.</i> , A. S. Butler, M.A.	750
<i>Natural History</i> , W. C. McIntosh, M.D.	650
<i>Chemistry</i> , James C. Irvine, Ph.D.	650
<i>Education</i> , John Edgar, M.A.	550
<i>Engl. Literature</i> , A. Lawson, M.A.	650
<i>Anatomy</i> , James Musgrove, M.D.	643
<i>Physiology</i> , Percy T. Herring, M.D.	550

COLLEGE OF ST. MARY.

Prin., Very Rev. A. Stewart, D.D.

PROFESSORS.

<i>Primarius Prof. of Divinity</i> , The Principal	£650
<i>Biblical Criticism</i> , Rev. Allan Menzies, D.D.	581
<i>Ecclesiastical Hist.</i> , Rev. John Herkless, D.D.	597
<i>Oriental Languages</i> , Rev. D. M. Kay, B.D.	650

UNIVERSITY COLLEGE, DUNDEE (1880).

<i>Principal</i> , John Yule Mackay, LL.D.	£850
<i>Secretary</i> , W. Arnot Watterston.	

PROFESSORS.

<i>Mathematics</i> , J. E. A. Steggall, M.A.	£600
<i>Natural Philosophy</i> , William Peddie, D.Sc.	600
<i>Chemistry</i> , Alexander Mackenzie, B.Sc.	600
<i>Natural History</i> , D'Arcy W. Thompson, B.A.	600
<i>Botany (White's)</i> , Patrick Geddes, F.R.S.E.	239
<i>Anatomy (Cox's)</i> , J. Yule Mackay, LL.D.	600
<i>Physiology</i> , E.W. Reid, B.A.	600
<i>Engin. and Drawing</i> , A. H. Gibson, D.Sc.	600

CONJOINT MEDICAL SCHOOL, DUNDEE.

PROFESSORS.

<i>Pathology</i> , L. R. Sutherland	£556
<i>Surgery</i> , D. MacEwan, M.D.	247
<i>Medicine</i> , Alex. M. Stalker	270
<i>Midwifery</i> , Jno. A. C. Kynoch	270
<i>Materia Medica</i> , Chas. R. Marshall	496

UNIVERSITY OF GLASGOW. 1450.

(£20,880.)

<i>Chancellor</i> , The Earl of Rosebery, K.G., K.T., LL.D.	
<i>Vice-Chancellor</i> , The Principal.

WOOLWICH—ROYAL MILITARY ACADEMY (1741).

TERMS (*about*), Feb. 1—July 24 and Sept. 15—Dec. 23.

Commandant, Brig.-Gen. A. E. A. Holland, M.V.O., D.S.O.
Adjutant, Capt. V. Asser, D.S.O., R.A.
Asst. Adj., Maj. D. Smith, R.A.
Med. Off., Maj. H. V. Prynn, R.A.M.C.
Chaplain, Rev. H. J. Fleming, M.A.

SANDHURST—ROYAL MILITARY COLLEGE (1799).

TERMS (*about*) Feb. 1—July 25 and Sept. 8—Dec. 20.

Commandant, Brig.-Gen. L. A. M. Stopford, *p.s.c.*
Asst. do., Col. O. C. Wolley-Dod, D.S.O., *p.s.c.*
Adjutant, Maj. H. T. Crispin.
Quarter-Master, Capt. J. C. Duff.
Riding Master, Maj. W. Sykes.
Surgeon, Lt.-Col. H. C. Thurston, C.M.G., R.A.M.C.
Asst. Surg., Maj. J. F. Martin, M.B., R.A.M.C.
Chaplain, Rev. D. F. Carey, M.A.

GYMNASIUM, Queen's Avenue, Aldershot.

Inspector of Gymnasia, Col. V. A. Couper.
Asst. do., Capt. W. Wright.
Instructor, Capt. J. S. N. de Joux.
Master at Arms, Lieut. J. Betts.

ARMY SIGNALLING SCHOOL, Aldershot.

Commandant, Col. R. S. Curtis, C.M.G., D.S.O., R.E.

ARMY SERVICE CORPS TRAINING ESTABLISHMENT, Aldershot.

Commandant, Lt.-Col. F. M. Wilson.

DUKE OF YORK'S ROYAL MILITARY SCHOOL, Guston, near Dover.

Commandant, Col. G. C. Nugent, M.V.O.
Gr.-Mr. & Adj., Maj. J. S. Dyke, M.V.O.
Headmaster, R. Dark, B.A.

ROYAL HIBERNIAN MILITARY SCHOOL, Phoenix Park, Dublin.

Commandant, Col. A. J. W. Dowell.
Adjutant and Sec., Capt. R. W. Smyth.
Headmaster, Lt. A. J. H. McCleesh.

QUEEN VICTORIA SCHOOL, Dunblane, Scotland.

Commandant, Col. M. G. Wilkinson, M.V.O.
Gr.-Mr. & Adj., Capt. D. Mathers.
Headmaster, Lt. W. L. B. White.

MISCELLANEOUS.

COLLEGE OF PRECEPTORS, Bloomsbury Square, W.C.

All persons engaged in education who have passed an examination satisfactory to the Council are admissible as members. Diplomas granted are F.C.P., L.C.P., and A.C.P.
President, Sir Philip Magnus, M.P.
Dean, W. G. Rushbrooke, LL.M.
Treasurer, G. Armitage Smith, D.Lit.
Secretary, G. Chalmers.

GILCHRIST EDUCATIONAL TRUST, 1 Plowden Buildings, Temple, E.C.

Founded by the late Dr. Gilchrist (died 1841), for "the benefit, advancement, and propagation of education and learning in every part of the world, as far as circumstances will permit." The income is applied to the maintenance of Scholarships, to the carrying on of lectures on scientific and other subjects for artisans, and to the assistance of approved educational objects.

Trustees, Rt. Hon. Lord Shuttleworth, LL.D.,
Chairman, Walter Leaf, Litt.D.; Michael E.
 Sadler, C.B.; Mrs. Sophie Bryant, D.Sc.; Rt.
 Hon. Lord Richard Cavendish.
Secretary, A. H. Fison, D.Sc.

LONDON PAROCHIAL CHARITIES

(Trustees of the), 3 Temple Gardens, E.C.
 [The income (£102,000) is applied mainly in
 support of Polytechnics, in furtherance of Techni-
 cal Education, in grants of pensions, and for
 the maintenance of City Churches.]
Chairman of Governors, Sir J. Savory, Bart.
Vice-Chairman, Sir Owen Roberts.
Clerk, Ernald R. Warre.

MUSIC.

ROYAL ACADEMY OF MUSIC (1822),
 York Gate, Marylebone Road, N.W.

[The R.A.M. was founded in 1822 by Lord
 Burghersh (afterwards Earl of Westmorland)
 for the cultivation of the science of music. The
 average number of students attending in 1913
 was 555. There are 99 Fellows (F.R.A.M.), 493
 Associates (A.R.A.M.), and 5,506 Licentiates
 (L.R.A.M.), of whom 1 Fellow, 30 Associates, and
 400 Licentiates were elected in 1913.]

President, H.R.H. the Duke of Connaught, K.G.
Chairman of Committee, Sir Edward E. Cooper.
Principal, Sir A. C. Mackenzie, Mus.D., F.R.A.M.
Lady Superintendent, Mrs. Russell, A.R.A.M.
Secretary, F. W. Renaut.

ROYAL COLLEGE OF MUSIC (1883),
 Prince Consort Road, South Kensington, S.W.

Patron, H.M. The King.
President, H.R.H. Prince Christian, K.G.
Director, Sir Hubert Parry, Bt., C.V.O., D.C.L.,
 Mus.Doc.

Hon. Secretary, Charles Morley.
Registrar, Frank Pownall, M.A.

ROYAL IRISH ACADEMY OF MUSIC,
 Westland Row, Dublin.

Secretary, C. E. Grahame-Harvey.

GUILDHALL SCHOOL OF MUSIC.

Principal, Landon Ronald.
Secretary, H. Saxe-Wyndham.
Lady Superintendent, Mrs. Hemmings.
Professors, 130 in number.

LONDON COLLEGE OF MUSIC,
 Gt. Marlborough Street, W.

Principal, Frederick J. Karn, Mus.B.
Director of Examin., G. Augustus Holmes.
Secretary, T. Weekes Holmes.

TONIC SOL-FA COLLEGE, 26 Bloomsbury
 Square, W.C. (1875).

President, Sir Walter Parratt, M.V.O., Mus.D.
Secretary, Walter Harrison, Mus.Bac.

TRINITY COLLEGE OF MUSIC (1872),

Mandeville Place, Manchester Square, W.
Chairman of Board, Sir Frederick Bridge, C.V.O.,
 Mus.D.
Secretary, Shelley Fisher.

ROYAL COLLEGE OF ORGANISTS,
 Kensington Gore, S.W.

President, C. Harford Lloyd, Mus.D.
Hon. Sec., Dr. H. A. Harding.
Registrar, Thomas Shindler, LL.B.

ROYAL MANCHESTER COLLEGE OF MUSIC
 (1893), Ducie St., Oxford Rd., Manchester.

Patroness, H.M. Queen Alexandra.
President, Sir W. H. Houldsworth, Bart., LL.D.
Principal, Dr. Adolph Brodsky.
Registrar, Stanley Withers.

ROYAL MILITARY SCHOOL OF MUSIC,
 Kneller Hall, Hounslow.

Commandant, Col. T. C. F. Somerville, M.V.O.
Adjutant & Qr.-Mr., Major J. M. Bett.
Director of Music, Major A. J. Stretton, M.V.O.

ROYAL NAVAL SCHOOL OF MUSIC,
 Eastney Barracks, Portsmouth.

Superintendent, Lt.-Col. F. T. Phillips, R.M.L.
Assist. do., Maj. A. P. L. Foulis, R.M.A.; Capt.
 E. H. Barr, R.M.A.
Musical Director, Lt. C. Franklin, R.M.L.I.

VICTORIA COLLEGE OF MUSIC,
 18 Berners Street, W.

Principal, J. H. Lewis, Mus.D.
Chairman, J. M. Bentley, Mus.Doc.
Secretary, George A. Stanton, A.R.C.M.

NAVAL.

ROYAL NAVAL COLLEGE, Greenwich.

President, Admiral Sir F. W. Fisher, K.C.V.O.
Captain, W. F. Slayter, R.N.
Commander, Eric V. E. R. Dugmore, R.N.
Director of Naval Education, Sir J. Alfrie
 Ewing, K.C.B., LL.D., F.R.S.
Medical Officers, Fleet-Surg. R. C. Munday, R.N.
 C. H. Fernie, M.R.C.S.
Store Officer, Cashier, &c., Staff-Paymaster George
 Whitcroft, R.N. (ret.).
Secretary, Henry F. V. Negus.
Clerk, A. Wotton.
Civil Engineer, H. D. Dormer, A.M.I.C.E.
Curator of Museum, Lieut. J. T. Berry, R.N.
 (ret.).

ROYAL NAVAL COLLEGE, Dartmouth.

Captain, Hon. Victor Stanley, M.V.O., R.N.
Commander, Cecil D. S. Raikes, R.N.
Headmaster, C. E. Ashford, M.V.O., M.A.

ROYAL NAVAL COLLEGE, Osborne.

Captain, R. W. Bentinck, R.N.
Commander, E. J. A. Fullerton, R.N.
Headmaster, C. Godfrey, M.V.O., M.A.

ROYAL NAVAL WAR COLLEGE, Portsmouth.

Vice-Admiral, Hon. Sir A. E. Bethell, K.C.M.G.
Flag Captain, C. E. Le Mesurier, R.N.
Secretary, Paymaster M. G. Bennett, R.N.

ROYAL HOSPITAL SCHOOL, Greenwich.

Supt., Captain E. M. C. Cooper Key, M.V.O.
 R.N.
Headmaster, J. E. Evans, B.A.

Mechanical Training Establishment, R.N.,
 Chatham.

Commander, J. W. G. Innes, R.N.
FOR MECHANICIANS:—*Schoolmaster*, C. W. Wil-
 steed, A.M.I.Mech.E.

FOR BOY ARTIFICERS:—*Schoolmasters*, W. H. T.
 Pain (Portsmouth); L. W. Mathieson (Devon-
 port).

Training Ships for Royal Navy.

FOR MEN:—*H.M.S. Albemarle* (gunnery)
Duncan (gunnery), *Argonaut*, *Vestal*, *Vindictive*,
Niger, *Dryad* (Navigation School Ship)
 and *Harrier* (tender to *Dryad*).

FOR BOYS:—*H.M.S. Fisgard* (4 ships, for boy
 artificers), *Ganges*, *Impregnable* (2 ships), *Indefatigable*
 (5 ships, for supernumerary artificers); and
 Marine Society's Ship *Warspite* and National
 Refuges Ships *Arethusa* and *Chichester* (Societies).

Training Ships for Mercantile Marine.

THAMES NAUTICAL TRAINING COLLEGE (INCORPORATED).—H.M.S. *Worcester*, off Greenhithe. *Capt. Supt.*, D. Wilson Barker, R.N.R., F.R.S.E. CADET SCHOOL SHIP *Conway*, Rock Ferry, Birkenhead. *Captain*, Comm. H. W. Broadbent, R.N.R.

TRAINING SHIP *Cornwall*, off Purfleet (Reformatory Ship). *Supt.*, Capt. H. W. Steele, R.N.; *Sec.*, W. Millachip, 66 Coleman Street, E.C.

TRAINING SHIP *Clio*, Bangor (North Wales, Chester, and Border Counties Training Ship Society). *Capt. Supt.*, Capt. F. G. Langdon, R.N.

TRAINING SHIP *Indefatigable*, New Ferry, Birkenhead. For boys of good character only. *Capt. Supt.*, Commander H. Butterworth, R.N.

TRAINING SHIP *Mercury*, Hamble, Southampton, Hants. For boys of good character only. *Hon. Director in Charge*, C. B. Fry, M.A.

Hospital Training Ship.

Exmouth, METROPOLITAN ASYLUMS BOARD, &c.

TECHNICAL EDUCATION.

In addition to the Institutions enumerated below there are Faculties of Engineering at the Universities of Birmingham, Bristol, Cambridge, Durham, Leeds, Liverpool, London, Manchester, and Sheffield; Wales; St. Andrews, Glasgow, and Edinburgh; Dublin, National University of Ireland, and the Queen's University of Belfast.

I.—UNDER LONDON COUNTY COUNCIL.

The principal technical institutes maintained or aided by the London County Council are the following:—

Institutes entirely maintained by the L.C.C.

BEAUFY INSTITUTE, Prince's Road, Vauxhall Street, S.E.—*Headmaster*, A. Ritchie-Scott, B.Sc.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS, Peckham Road, S.E.—*Principal*, W. B. Dalton.

CAMDEN SCHOOL OF ART, Dalmeny Avenue, N.—*Principal*, Francis Black, R.B.A.

CENTRAL SCHOOL OF ARTS AND CRAFTS (with which is incorporated the ROYAL FEMALE SCHOOL OF ART), Southampton Row, W.C.—*Principal*, F. V. Burridge, R.E., A.R.C.A.

CLAPHAM SCHOOL OF ART, Edgely Road, High Street, Clapham, S.W.—*Principal*, L. C. Nightingale.

HACKNEY INSTITUTE.—*Principal*, Percy R. Kirk, M.A.

(a) *Hackney Institute*, Dalston Lane, N.E.

(b) *Sir John Cass's Hackney Institute*, Cassland Road, N.E.

HAMMERSMITH SCHOOL OF ARTS AND CRAFTS, Lime Grove, Shepherd's Bush, W.—*Acting Principal*, Chas. A. Eva, A.R.C.A.

NORWOOD TECHNICAL INSTITUTE, Knight's Hill, West Norwood, S.E.—*Principal*, W. Huntington, B.Sc.

PADDINGTON TECHNICAL INSTITUTE, Saltram Crescent, W.—*Principal*, A. G. Cooke, M.A.

PUTNEY SCHOOL OF ART, Oxford Road, Putney.—*Headmaster*, J. Bowyer.

SCHOOL OF BUILDING, Ferndale Road, Brixton, S.W.—*Principal*, H. W. Richards.

SCHOOL OF ENGINEERING AND NAVIGATION, High Street, Poplar, E.—*Principal*, H. A. Garratt, M.I.N.A.

SCHOOL OF PHOTO-ENGRAVING AND LITHOGRAPHY, 6 Bolt Court, Fleet Street, E.C.—*Principal*, A. J. Bull.

SHOREDITCH TECHNICAL INSTITUTE, Pitfield Street, Hoxton, N.—*Principal*, S. Hicks.

TRADE SCHOOL FOR GIRLS, L.C.C. Hammersmith School of Arts and Crafts, Lime Grove, Shepherd's Bush, W.—*Lady Superintendent*, Miss M. A. J. Boon.

TRADE SCHOOL FOR GIRLS, Queen Square, Bloomsbury, W.C.—*Lady Superintendent*, Miss F. E. I. Smythe.

WESTMINSTER TECHNICAL INSTITUTE, Vincent Square, S.W., with which is incorporated the WESTMINSTER SCHOOL OF ART.—*Principal*, J. Stuart Ker, B.Sc. *Headmaster*, School of Art, Mouat Loudan.

Polytechnics aided by the L.C.C.

BATTERSEA POLYTECHNIC, Battersea Park Road, S.W.—*Principal*, S. G. Rawson, D.Sc.

BIRKBECK COLLEGE, Bream's Buildings, Chancery Lane.—*Principal*, G. Arncliffe Smith, D.Lit.

BOROUGH POLYTECHNIC, Borough Road, S.E.—*Principal*, C. T. Millis, M.I.MECH.E.

CITY OF LONDON COLLEGE, White Street, Moorfields.—*Principal*, Sidney Humphries, B.A., LL.B.

NORTHAMPTON POLYTECHNIC, Clerkenwell.—*Principal*, R. M. Walmsley, D.Sc.

NORTHERN POLYTECHNIC, Holloway Rd., N.—*Principal*, R. S. Clay, D.Sc.

REGENT STREET POLYTECHNIC, 309 Regent Street, W.—*Director of Education*, Robert Mitchell.

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate.—*Principal*, C. A. Keane, D.Sc.

SOUTH-WESTERN POLYTECHNIC, Manresa Road, Chelsea, S.W.—*Principal*, S. Skinner, M.A.

WOOLWICH POLYTECHNIC, William Street, Woolwich.—*Principal*, A. F. Hogg, M.A.

Technical Institutes, &c., aided by the L.C.C.

ALBANY INSTITUTE DOMESTIC ECONOMY SCHOOL FOR GIRLS, Albany Street, Deptford.—*Head Mistress*, Miss R. Mason.

ALDENHAM INSTITUTE, Goldington Crescent, N.W.—*Hon. Sec.*, H. S. Mingard.

BERMONDSEY SETTLEMENT, Farncombe Street, Jamaica Road, S.E.—*Warden*, Rev. J. Scott Lidgett, D.D.

CHURCH INSTITUTE, Wiseton Rd., Upper Tooting.—*Hon. Secretary*, C. H. Baker.

COLLEGE FOR WORKING WOMEN, Fitzroy Street, W.—*Hon. Secretary*, Miss F. Martin.

CRAFT SCHOOL, 37-39 Stepney Green, E.—*Principal*, Gilbert C. Cooke.

DEVAS INSTITUTE, New Road, Battersea, S.W.—*Secretary*, W. F. Holmes.

GOLDSMITHS' COLLEGE, New Cross, S.E.—*Warden*, W. Loring, M.A.

HEROLD'S INSTITUTE, Drummond Road, Bermondsey. (*In connexion with the Borough Polytechnic*).

LEATHERSELLERS' COMPANY'S TECHNICAL COLLEGE, Tower Bridge Road, S.E.—*Principal*, Dr. T. Gordon Parker.

MARYON WILSON SCHOOL OF DOMESTIC ECONOMY, Old Woolwich Road, Charlton, S.E.—*Headmistress*, Miss R. Mason.

MORLEY COLLEGE, Waterloo Road, S.E.—*Acting Vice-Principal*, Miss C. I. Brennan.

NEWCOMEN'S FOUNDATION TRADE SCHOOL FOR DOMESTIC SERVICE, Newcomen Street, Borough, S.E.—*Lady Superintendent*, Miss R. A. Roberts.

ROYAL SCHOOL OF ART NEEDLEWORK, Exhibition Road, S.W.—*Secretary*, Miss M. Fennell.

SAILORS' HOME, Dock Street, E. (School of Nautical Cookery).—*Secretary*, A. E. Loder.
ST. BRIDE FOUNDATION INSTITUTE, Bride Lane, Fleet Street, E.C. (for Printing Trades).—*Principal*, J. R. Riddell.

SCHOOL OF ART WOOD-CARVING, 39 Thurloe Place, S.W.—*Secretary*, J. Saltmarsh, I.S.O.

WANDSWORTH TECHNICAL INSTITUTE, High Street, Wandsworth, S.W.—*Principal*, G. F. Goodchild, M.A.

WORKING MEN'S COLLEGE, Crowndale Rd., N.W.—*Superintendent*, E. C. Duchesne.

Schools of Art aided by the L.C.C.

BLACKHEATH, LEE, LEWISHAM AND GREENWICH, Lee Road, Blackheath.—*Headmaster*, J. H. Hale.

CLAPTON AND STAMFORD HILL, 81 Clapton Common.—*Headmistress*, Miss F. Edith Giles.

LAMBETH, St. Oswald's Place, Upper Kennington Lane.—*Headmaster*, T. McKeggie.

ST. MARTIN'S, Charing Cross Road, W.C.—*Headmaster*, J. E. Allen.

In addition to the above schools there are Art Schools or Classes attached to all the Polytechnics, except the Northern Polytechnic. Schools of Art are also conducted by the City and Guilds of London Institute at Finsbury Technical College and at the South London Technical Art School, 122-124 Kennington Park Road (see below).

II.—OTHER LONDON INSTITUTIONS.

Imperial College of Science and Technology, South Kensington, S.W.

The Royal College of Science.

The Royal School of Mines.

The City and Guilds' (Engineering) College.

The Imperial College is an Institution for the most advanced training and research in various branches of Science, especially in its application to Industry.

Visitor, H. M. The King.

Chairman of Governing Body, The Marquess of Crewe, K.G.

Chairman of Executive Committee, R. Kaye Gray, M.I.E.E.

Chairman of Delegacy, Sir John Wolfe Barry, K.C.B., F.R.S.

Rector, Sir Alfred Keogh, K.C.B., F.R.S.

Secretary, Alexander Gow, B.Sc.

CRYSTAL PALACE (School of Practical Engineering).—*Principal*, J. W. Wilson, M.INST.C.E.
EAST LONDON COLLEGE (see University of London).

FARADAY HOUSE ELECTRICAL ENGINEERING COLLEGE (Southampton Row, W.C.).—*Princ.*, A. Russell, D.Sc.

POLYTECHNIC SCHOOL OF ENGINEERING (Electrical, Civil, Motor, Aero, and Mechanical), 307-311 Regent Street, W.—*Henry J. Spooner*, M.I.Mech.E.

SCHOOL OF CARRIAGE BUILDING (Balderton St., W.).—*Headmaster*, W. Bailey.

SCHOOL OF CHEMISTRY AND PHARMACY (Brixton, S.W.).—*Principal*, A. B. Griffiths, F.C.S.

TRADES' TRAINING SCHOOLS, 153 Great Titchfield St., W.—*Director*, H. Phillips Fletcher, F.R.I.B.A.

WILLESDEN POLYTECHNIC, Priory Park Road, N.W.—*Principal*, A. J. Bird.

PROVINCIAL TECHNICAL COLLEGES.

ASHTON-UNDER-LYNE (Heginbottom Techn.Sch.).—*Sec.*, J. H. Wade.

BANBURY (Munic. Techn. Sch.).—*Headmaster*, S. H. Beale.

BARROW-IN-FURNESS (Techn. Sch.).—*Princ.*, G. Grace, B.Sc.

BATH (City Techn. Sch.).—*Director*, A. G. Day, A.M.I.Mech.E.

BATLEY (Techn. and Art Sch.).—*Director*, G. R. M. Dauby, M.A.

BELFAST (Munic. Techn. Inst.).—*Princ.*, F. C. Forth, A.R.C.S.C.I.

BIRKENHEAD (Holt Techn. Sch., Tranmere).—*Princ.*, J. E. L. Barnes.

BIRMINGHAM (Munic. Techn. Sch.).—*Princ.*, W. E. Sumpner, D.Sc.

„ (Techn. Sch., Aston).—*Princ.*, C. A. White, M.Sc.

„ (Vittoria St.—For Jewellers and Silver-smiths).—*Headmaster*, A. J. Gaskin.

BLACKBURN (Munic. Techn. Sch.).—*Princ.*, R. H. Pickard, D.Sc.

BOLTON (Munic. Techn. Sch.).—*Director*, F. Wilkinson, F.G.S.

BOOTLE (Munic. Techn. Sch.).—*Headmaster*, L. Small, B.Sc.

BRADFORD CITY (Techn. Coll.).—*Princ.*, Prof. W. M. Gardner, M.Sc.

BRIERLEY HILL, STAFFS (Techn. Inst.).—*Princ.*, A. Gibbons, F.R.A.S.

BRIGHOUSE (Techn. Sch.).—*Sec.*, T. Walling, M.A.

BRIGHTON (Munic. Techn. Coll.).—*Princ.*, W. Beckitt Burnie, D.Sc.

BRISTOL (Merchant Venturers' Technical Coll.).—*Princ.*, Prof. J. Wertheimer, D.Sc.; *Sec.*, G. H. Pope, B.C.L.

BURNLEY (Munic. Techn. Inst.).—*Princ.*, T. Crossland, B.Sc.

BURY (Munic. Techn. Sch.).—*Princ.*, R. Wilkin-son, B.A.

CAMBORNE (Sch. of Metalliferous Mining).—*Princ.*, J. J. Beringer (*acting*).

CARDIFF (Munic. Techn. Sch.).—*Supt.*, Charles Coles, B.Sc.

CHORLEY (Munic. Techn. Inst.).—*Princ.*, G. B. Alcock, B.A.

COVENTRY (Munic. Techn. Inst.).—*Princ.*, J. H. Belcher, B.Sc.

CREWE (Mechanics' Inst.).—*Sec.*, R. J. Hempton.

CROYDON (Central, S. Norwood, and Thornton Heath Polytechnic).—*Princ.*, T. C. Baillie, D.Sc.

DARLINGTON (Techn. Coll.).—*Princ.*, J. S. Hague, M.Sc.

DARWEN (Munic. Techn. Sch.).—*Sec.*, W. Bretherick.

DERBY (Techn. Coll.).—*Princ.*, F. W. Shurlock, B.Sc.

DEVONPORT (Munic. Techn. Sch.).—*Princ.*, W. S. Templeton, B.Sc.

DEWSBURY (Techn. Sch.).—*Sec.*, Geo. E. Featherston.

DONCASTER (Munic. Techn. Sch.).—*Princ.*, J. Eagles, A.R.C.S.C.

DUBLIN (Royal College of Science).—*Dean of Faculty*, G. A. J. Cole, F.G.S.

EAST HAM (Techn. Coll.).—*Princ.*, W. H. Barker, B.Sc.

EDINBURGH (Heriot-Watt Coll.).—*Princ.*, A. P. Laurie, D.Sc.

GLASGOW (Royal Technical College, George St., affiliated to the University of Glasgow 1913).

—*Director*, H. F. Stockdale, F.R.S.E.

HALIFAX (Munic. Techn. Coll.).—*Princ.*, J. Crowther, B.Sc.

HANLEY (Munic. Sch. of Technology).—*Headmaster*, G. Cartlidge, A.R.C.A.

HUDDERSFIELD (Techn. Coll.).—*Princ.*, J. F. Hudson, M.A.
 HULL (Munic. Techn. Coll.).—*Princ.*, T. Luxton, B.Sc.
 IPSWICH (Munic. Techn. Sch.).—*Princ.*, P. Wilkinson, B.Sc.
 KEIGHLEY (Techn. Inst.).—*Princ.*, T. P. Watson, M.A.
 LANCASTER (Storey Inst.).—*Headmaster*, W. McBretney, B.Sc.
 LEEDS (Institute).—*Sec.*, A. Tait.
 LEICESTER (Munic. Techn. Sch.).—*Headmaster*, J. H. Hawthorn, M.A.
 LINCOLN (Munic. Techn. Sch.).—*Headmaster*, A. E. Collis, M.I.M.E.
 LIVERPOOL (Munic. Techn. Sch.).—*Director*, W. Hewitt, B.Sc.
 MANCHESTER (Munic. Sch. of Technology).—*Princ.*, J. C. M. Garnett, M.A.
 MANSFIELD (The Brunts Sch.).—*Princ.*, C. E. Stacey, B.Sc.
 NEWCASTLE-UPON-TYNE (Rutherford Technical College).—*Princ.*, C. L. Eclair-Heath, A.M.I.M.E.
 NEWRY (Munic. Techn. Sch.).—*Princ.*, E. Holden, A.R.S.I.
 NORTHAMPTON (Techn. Sch.).—*Principal*, J. Blakeman, M.A.
 NORWICH (Techn. Inst.).—*Princ.*, H. Ramage, M.A.
 NOTTINGHAM (Munic. Sch.).—*Principal*, J. Harrison, A.R.C.A.
 OLDHAM (Munic. Techn. Sch.).—*Principal*, H. H. Wareing.
 PAISLEY (Techn. Coll.).—*Princ.*, A. McLean, B.Sc.
 PETERBOROUGH (County Techn. Sch.).—*Headmaster*, Charles Armstrong.
 PLYMOUTH (Munic. Techn. Sch.).—*Headmaster*, J. B. Brown, B.Sc.
 PORTSMOUTH (Munic. Techn. Coll.).—*Princ.*, O. Freeman, B.Sc.
 PRESTON (Harris Inst.).—*Princ.*, T. R. Jolly.
 ROCHDALE (Munic. Techn. Sch.).—*Sec.*, J. E. Holden.
 ROTHERHAM (Techn. Inst.).—*Principal*, J. Barclay Jamieson, B.Sc.
 SHEFFIELD University (*q.v.*).
 SOUTHAMPTON (Hartley Univ. Coll., *q.v.*).
 STOCKPORT (Munic. Techn. Sch.).—*Princ.*, R. J. Brown, M.Sc.
 STOKE-ON-TRENT (Longton Sutherland Inst.).—*Principal*, W. Harris, M.A.
 SUNDERLAND (Munic. Techn. Coll.).—*Princ.*, V. A. Mundella, B.Sc.
 SUTTON COLDFIELD (Munic. Techn. Sch.).—*Princ.*, H. Pochin, M.A.
 SWANSEA (Techn. Coll.).—*Princ.*, W. M. Varley, D.Sc.
 SWINDON (Techn. Sch.).—*Princ.*, G. H. Burkhardt, M.Sc.
 TONBRIDGE (Techn. Inst.).—*Director*, T. Newsome, A.R.C.S.
 TOTTENHAM (Polytechnic).—*Sec.*, J. W. Tomlinson.
 TRURO (Sch. of Mining).—*Princ.*, H. G. Henderson.
 TUNBRIDGE WELLS (Techn. Inst.).—*Princ.*, J. Lister, B.Sc.
 WALSALL (Munic. Inst.).—*Princ.*, F. E. Thompson, A.R.C.S.
 WALTHAMSTOW (Techn. Inst.).—*Princ.*, A. J. Dicks, B.Sc.
 WARRINGTON (Munic. Techn. Inst.).—*Princ.*, E. S. A. Robson, M.Sc.
 WELLINGBOROUGH (Techn. Inst.).—*Princ.*, A. J. Ensor, B.Sc.

WEST BROMWICH (Munic. Science and Techn. Sch.).—*Princ.*, R. Lloyd Whiteley, F.I.C.
 WEST HAM (Munic. Techn. Inst.).—*Princ.*, J. R. Airey, B.Sc.
 WIDNES (Munic. Techn. Sch.).—*Princ.*, J. A. Cooper, B.Sc.
 WIGAN (Mining and Techn. Coll.).—*Princ.*, T. T. Rankin, B.Sc.
 WILLESDEN (Polytechnic).—*Sec.*, A. J. Bird.
 WOLVERHAMPTON (Munic. Techn. Sch.).—*Princ.*, J. D. Coales, D.Sc.
 WORCESTER (Victoria Inst.).—*Sec.*, T. Duckworth.

Zoology, J. A. Clarke, M.B.

UNIVERSITY EXTENSION.

The Universities of Oxford, Cambridge, London, Manchester, Liverpool, and Leeds organise courses of University Extension Lectures, followed by examinations, in all parts of the kingdom. Full particulars may be obtained from the following:—

Oxford.

J. A. R. Marriott, M.A., University Extension Delegacy, Examination Schools, Oxford.

Cambridge.

Rev. D. S. H. Cranage, Litt.D., Syndicate Buildings, Cambridge.

London.

John Lea, M.A., University of London, South Kensington, S.W.

Manchester.

The Secretary, University Extension Committee, The University, Manchester.

Liverpool.

The Secretary, University Extension Board, Liberty Buildings, School Lane, Liverpool.

Leeds.

The Secretary, University Extension Committee, The University, Leeds.

Secondary Education.

THE HEAD MASTERS' CONFERENCE (*Secy.*, W. A. Evans, M.A., 12 King's Bench Walk, Temple, E.C.).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. The annual meetings are, as a rule, held in December, alternately (a) at some school represented on the Conference, (b) at London or some University town. In considering applications for admission to the Conference the committee has regard to the scheme or other instrument under which the school is administered and the numbers in the school, and as a general rule there should be 100 boys at least in any school represented at the Conference, and about ten resident undergraduates at the Universities who have gone direct from the school, but regard is paid to the *proportion* of undergraduates to the total number of boys in

the school. The Universities Joint Committee (consisting of 5 Headmasters, 5 members of the Hebdomadal Council of Oxford, and 5 members of the Council of the Senate of Cambridge) meets periodically to consider matters of joint interest to the Universities and Public Schools.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS (*Asst. Secy.*, H. Bendall, M.A., 37 Norfolk Street, Strand, W.C.).—The qualification for membership is the holding of the head mastership of a day school for boys, the school being (a) recognised by the Board of Education as Secondary; (b) administered under a definite form of public or corporate control (e.g., Board of Education Scheme); (c) managed by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

*The * denotes membership of the Head Masters' Conference; the †, of the Incorporated Association of Head Masters.*
